Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, Blindsight Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Structuring of Organizations Henry Mintzberg,1979 Presents methods and examples of organizational structure using empirical literature to describe how organizations structure themselves. The book discusses the nature of managerial work, strategy formation process and issues associated with each type of structure.

Social Theory after the Internet Ralph Schroeder,2018-01-04 The internet has fundamentally transformed society in the past 25 years, yet existing theories of mass or interpersonal communication do not work well in understanding a digital world. Nor has this understanding been helped by disciplinary specialization and a continual focus on the latest innovations. Ralph Schroeder takes a longer-term view, synthesizing perspectives and findings from various social science disciplines in four countries: the United States, Sweden, India and China. His comparison highlights, among other observations, that smartphones are in many respects more important than PC-based internet uses. Social Theory after the Internet focuses on everyday uses and effects of the internet, including information seeking and big data, and explains how the internet has gone beyond traditional media in, for example, enabling Donald Trump and Narendra Modi to come to power. Schroeder puts forward a sophisticated theory of the role of the internet, and how both technological and social forces shape its significance. He provides a sweeping and penetrating study, theoretically ambitious and at the same time always empirically grounded.The book will be of great interest to students and scholars of digital media and society, the internet and politics, and the social implications of big data.

Discharge Measurements at Gaging Stations D. Phil Turnipseed,Vernon B. Sauer,2014-06-16 The techniques and standards for making discharge mea- surements at streamflow gaging stations are described in this publication. The vertical axis rotating-element current meter, principally the Price current meter, has been traditionally used for most measurements of discharge; however, advancements in acoustic technology have led to important developments in the use of acoustic Doppler current profilers, acoustic Dop- pler velocimeters, and other emerging technologies for the measurement of discharge. These new instruments, based on acoustic Doppler theory, have the advantage of no moving parts, and in the case of the acoustic Doppler current profiler, quickly and easily provide three-dimensional stream-velocity profile data through much of the vertical water column. For much of the discussion of acoustic Doppler current profiler moving-boat methodology, the reader is referred to U.S. Geo- logical Survey Techniques and Methods 3–A22 (Mueller and Wagner, 2009).

Sorolla: The Masterworks Blanca Pons-Sorolla,2012-10-02 A new survey of the best works by the elusive and spectacular Spanish Impressionist Joaquín Sorolla. Often compared to his contemporary, the American artist John Singer Sargent, Joaquín Sorolla (1863–1923) was a master draftsman and painter of landscapes, formal portraits, and monumental, historically themed canvases. Highly influenced by French Impressionism, the Valencian artist was a master plein-air painter known for his luminous seaside scenes of frolicking youths and for vivid depictions of Spanish rural life and its pleasures and customs. This beautifully designed and produced volume brings together one hundred of Sorolla's major paintings, selected by his great-granddaughter Blanca Pons-Sorolla, the foremost authority on the artist. Benefiting from close proximity to the artist and his personal archives, she presents an in-depth essay that explores Sorolla's life, work, and remarkable international legacy. With virtually all of the artist's previous publications now out of print, this much-anticipated volume is an important addition to the literature on this great Spanish master.

Generative Art Matt Pearson,2011-06-29 Summary Generative Art presents both the technique and the beauty of algorithmic art. The book includes high-quality examples of generative art, along with the specific programmatic steps author and artist Matt Pearson followed to create each unique piece using the Processing programming language. About the Technology Artists have always explored new media, and computer-based artists are no exception. Generative art, a technique where the artist creates print or onscreen images by using computer algorithms, finds the artistic intersection of programming, computer graphics, and individual expression. The book includes a tutorial on Processing, an open source programming language and environment for people who want to create images, animations, and interactions. About the Book Generative Art presents both the techniques and the beauty of algorithmic art. In it, you'll find dozens of high-quality examples of generative art, along with the specific steps the author followed to create each unique

piece using the Processing programming language. The book includes concise tutorials for each of the technical components required to create the book's images, and it offers countless suggestions for how you can combine and reuse the various techniques to create your own works. Purchase of the print book comes with an offer of a free PDF, ePub, and Kindle eBook from Manning. Also available is all code from the book. The Sweetest Remedy Jane Igharo,2021-09-28 When a woman travels to Nigeria to attend the funeral of the father she never knew, she meets her extravagant family for the first time, a new and inspiring love interest, and discovers parts of herself she didn't know were missing, from Jane Igharo, the acclaimed author of Ties That Tether. Hannah Bailey has never known her father, the Nigerian entrepreneur who had a brief relationship with her white mother. Because of this, Hannah has always felt uncertain about part of her identity. When her father dies, she's invited to Nigeria for the funeral. Though she wants to hate the man who abandoned her, she's curious about who he was and where he was from. Searching for answers, Hannah boards a plane to Lagos, Nigeria. In Banana Island, one of Nigeria's most affluent areas, Hannah meets the Jolades, her late father's prestigious family—some who accept her and some who think she doesn't belong. The days leading up to the funeral are chaotic, but Hannah is soon shaped by secrets that unfold, a culture she never thought she would understand or appreciate, and a man who steals her heart and helps her to see herself in a new light.

The Ultimate Sniper Major John Plaster,2006-01-01 Through revised text, new photos, specialised illustrations, updated charts and additional information sidebars, The Ultimate Sniper once again thoroughly details the three great skill areas of sniping; marksmanship, fieldcraft and tactics.

Sargent Richard Ormond,Trevor Fairbrother,Elaine Kilmurray,2015-02-12 Many of the sitters in this collection were John Singer Sargents close friends. They are posed informally, sometimes in the act of painting or singing, and it is evident from the bold way they confront us that they are personalities of a creative stamp. Brilliant as these pictures are as works of art and penetrating studies of character, they are also records of relationships, allegiances, influences and aspirations. This volume, and the exhibition it accompanies, aims to explore these friendships in depth and draw out their significance in the story of Sargents life and the development of his art. The book is structured chronologically, with sections arranged according to the places Sargent worked and formed relationships during his cosmopolitan career: Paris, London, New York, Italy and the Alps. The cast of characters includes famous names, among them Gabriel Fauré and Auguste Rodin, Robert Louis

Stevenson and Henry James. But the authors also make their point with images of Sargents familiars, such as the artists Jane and Wilfrid de Glehn who accompanied him on his sketching expeditions to the Continent, and the Italian painter Ambrogio Raffele, a recurrent model in his Alpine studies. In such paintings Sargent explored the making of art (his own included) and the relationship of the artist to the natural world. These are examples of an absorbing range of images and personalities, all distinguished in one way or another for their artistry, and all linked by friendship and a shared aesthetic to the central figure of Sargent himself.

The Glass Castle Jeannette Walls,2007-01-02 A triumphant tale of a young woman and her difficult childhood, The Glass Castle is a remarkable memoir of resilience, redemption, and a revelatory look into a family at once deeply dysfunctional and wonderfully vibrant. Jeannette Walls was the second of four children raised by anti-institutional parents in a household of extremes.
