The 7 Worst Testosterone Killers Mike Westerdal, Sports Nutrition

Certified,2021-11-15 Men were created to be strong and virile. Testosterone is the anabolic male hormone that separates men from women. It is what gives men our male characteristics, including our virility and strength. Plus testosterone also drives muscle growth and strength while performing other functions such as: Maintaining reproductive tissues Stimulating sperm-production Stimulating and maintaining sexual function Supporting bone strength As men age, our testosterone production gradually declines from year to year. But it's not just aging that robs us of our testosterone- it is also changing societal norms where men are encouraged to repress our masculinity and even embrace our feminine side. Likewise, the modern environment is toxic to men. Every day, our bodies and spirits are under constant assault from testosterone-robbing enemies that slowly hammer away at our masculinity by inhibiting our God-given ability to naturally produce testosterone. I'm here to today to show you how to fight back and take charge of your masculinity by teaching you about the seven most common testosterone killers we encounter every day of our lives in this special report.
