The bestselling and highly acclaimed 100 Cupboards series starts here. What dangers are locked behind the cupboard doors? Henry isn't brave, but when he hears a thumping and scratching on the other side of his bedroom wall, he can't ignore it. He scrapes off the plaster and discovers mysterious doors—cupboards of all different shapes and sizes. Through one he sees a glowing room and a man strolling back and forth. Through another he sees only darkness and feels the cold sense that something isn't right. When his cousin Henrietta boldly travels into the worlds beyond the cupboards, it's up to Henry to follow her. Now that he's opened the doors, can he keep the evil inside from coming through? The Book We Wish We Had Jeremy Baka, Matthew Molino, 2023-03-14 A book so simple, its purpose would be in its title One night, over a couple of dirty martinis, Jeremy Baka and Matt Molino sat discussing hard lessons learned during their marketing careers, smart moves, and dumb decisions, they realized something—that something was missing from the business books of our day. These books all focus on the same usual suspects: leadership attributes, management skills, new marketing paradigms, and about a half-dozen other trampled topics. They concluded that the world didn't need another typical business book. What it needed was something real and raw, something higher education doesn't teach, and companies don't train, but everyone somehow expects you to know. The Book We Wish We Had is less interested in how to hit a business homerun and more fascinated by the game itself. It is a humble collection of in-the-trenches lessons obtained while working at some of the world's largest agencies and for some of the biggest brands on the planet. It represents teachings learned the hard way, from being a boss to working for one, from failing miserably to achieving considerably, from mentoring to being mentored, from doing the wrong thing to discovering the right thing. It's the book they wish they had when they started, and here it is for you.

Who's Counting? John Allen Paulos, 2022-09-15 For decades, New York Times best-selling author John Allen Paulos has enlightened readers by showing how to make sense of the numbers and probabilities behind real-world events, political calculations, and everyday personal decisions. Who's Counting? features dozens of his insightful essays—original writings on contemporary issues like the COVID-19 pandemic, online conspiracy theories, “fake news,” and climate change, as well as a selection of enduring columns from his popular ABC News column of the same name. With an abiding respect for reason, a penchant for puzzles with societal implications, and a disarming sense of humor, Paulos does in this collection what he's famous for: clarifies mathematical ideas for everyone and shows how they play a role in government, media, popular culture, and life. He argues that if we can't critically interpret numbers and statistics, we lose one of our most basic and reliable guides to reality.

Cost Management Leslie G. Eldenburg, Liang-Hsuan Chen, Susan K. Wolcott, Gail Cook, 2016-03-28 Cost Management: Measuring, Monitoring, and Motivating Performance, Third Canadian Edition was written to help students learn to appropriately apply cost

accounting methods in a variety of organizational settings. To achieve this goal, students must also develop professional competencies, such as strategic/critical thinking, risk analysis, decision making, ethical reasoning and communication. This is in line with the CPA curriculum and the content of this edition and the problem materials is mapped to the CPA. Many students fail to recognize the assumptions, limitations, behavioural implications, and qualitative factors that influence managerial decision making. The textbook is written in an engaging step-by-step style that is accessible to students. The authors are proactive about addressing the challenges that instructors and students face in their teaching and learning endeavors. They utilize features such as realistic examples, real ethical dilemmas, self-study problems and unique problem material structured to encourage students to think about accounting problems and problem-solving more complexly.

Doors Close, Doors Open Morton A. Lieberman,1996 Doors Close, Doors Open is based on Morton Lieberman's interviews with seven hundred widows and widowers over the course of seven years. In this book he shares the wisdom he has gained, retelling women's stories about the pain and anger and challenges they face in the first few months of being widowed. But most important, Lieberman has made discoveries that expose many of the pernicious myths about widows, and discloses the surprising sources of help for women and the fact that there is light at the end of the tunnel. The vast majority of women, after a painful time, found themselves flourishing - living different but satisfying lives, and changing and growing in ways they never could have dreamed of. This is a book that offers comfort and consolation by understanding so much of what so many women go through and by revealing the truth about widows: that women of all ages have the ability to respond to tragedy, to deal effectively with challenges, and to realize new ways to live and be well.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Operations Research: Introduction To Models And Methods Richard Johannes Boucherie, Henk Tijms, Aleida Braaksma, 2021-10-26 This attractive textbook with its easy-to-follow presentation provides a down-to-earth introduction to operations research for students in a wide range of fields such as engineering, business analytics, mathematics and statistics, computer science, and econometrics. It is the result of many years of teaching and collective feedback from students.
