Electronic Circuit Design Ideas V. Lakshminarayanan,2013-10-22 *Electronic Circuit Design Ideas* covers a wide variety of electronic circuit design, which consists of a circuit diagram, waveforms, and an explanation of how the circuit works. This text contains 14 chapters and starts with a review of the principles of digital circuits and interface circuits frequently used in circuit design. The next chapters describe the commonly used timer, op-amp, and amplifier circuits. Other chapters present some examples of waveform generators and oscillators used in circuit design. This work also looks into other classifications of circuits, including phase-locked loop, power-supply, and voltage regulator circuits. The final chapters are devoted to the methods of controlling DC servomotors and stepper motors. These chapters also examine other design ideas, specifically the use of slotted optical sensor based revolution detector, photodiode and magnetic transducer detector, and FSK circuit. This book will prove useful to electrical engineers, electronics professionals, hobbyists, and students.

Quantum Dots for Quantum Information Technologies Peter Michler,2017-06-01 This book highlights the most recent developments in quantum dot spin physics and the generation of deterministic superior non-classical light states with quantum dots. In particular, it addresses single quantum dot spin manipulation, spin-photon entanglement and the generation of single-photon and entangled photon pair states with nearly ideal properties. The role of semiconductor microcavities, nanophotonic interfaces as well as quantum photonic integrated circuits is emphasized. The latest theoretical and experimental studies of phonon-dressed light matter interaction, single-dot lasing and resonance fluorescence in QD cavity systems are also provided. The book is written by the leading experts in the field.

The Hundred-Year Marathon Michael Pillsbury,2015-02-03 One of the U.S. government's leading China experts reveals the hidden strategy fueling that country's rise – and how Americans have been seduced into helping China overtake us as the world's leading superpower. For more than forty years, the United States has played an indispensable role helping the Chinese government build a booming economy, develop its scientific and military capabilities, and take its place on the world stage, in the belief that China's rise will bring us cooperation, diplomacy, and free trade. But what if the China Dream is to replace us, just as America replaced the British Empire, without firing a shot? Based on interviews with Chinese defectors and newly declassified, previously undisclosed national security documents, *The Hundred-Year Marathon* reveals China's secret strategy to supplant the United States as the world's dominant power, and to do so by 2049, the one-hundredth anniversary of the founding of the People's Republic. Michael Pillsbury, a fluent Mandarin speaker who has served in senior national security positions in the U.S. government since the days of Richard Nixon and Henry Kissinger, draws on his decades of contact with the hawks in China's military and intelligence agencies and translates their documents, speeches, and books to show how the teachings of traditional Chinese statecraft underpin their actions. He offers an inside look at how the Chinese really view America and its leaders – as barbarians who will be the architects of their own demise. Pillsbury also explains how the U.S. government has helped – sometimes unwittingly and sometimes deliberately – to make this China Dream come true, and he calls for the United States to implement a new, more competitive strategy toward China as it really is, and not as we might wish it to be. *The Hundred-Year Marathon* is a wake-up call as we face the greatest national security challenge of the twenty-first century.

My Marathon Frank Shorter,2016-07-05 *My Marathon: Reflections on a Gold Medal Life* is a revealing memoir by Frank Shorter, the father of American distance running. After winning the 1969 NCAA title in the 10,000-meters title during his senior year at Yale, Shorter went on to win a staggering 24 national titles on track, road, and cross country courses, but it was in the marathon that Shorter achieved his greatest fame and recognition. At the 1972 Munich Games, Shorter won the Olympic marathon finishing more than 2 minutes ahead of the second-place finisher. Four years later, he finished a controversial second in the Olympic marathon in Montreal. The controversy, still unresolved to this day, revolved around the East German winner being a possible drug cheat. Shorter later founded the United States Anti-Doping Agency. Written with noted sportswriter John Brant, *My Marathon* details these inspiring events, as well as the physical and emotional abuse Shorter suffered as a child. This inspiring memoir is a testament to the resiliency of the human spirit and the transformative power of sports.

Duel in the Sun John Brant,2007-03-06 The 1982 Boston Marathon was great theater: Two American runners, Alberto Salazar, a celebrated

champion, and Dick Beardsley, a gutsy underdog, going at each other for just under 2 hours and 9 minutes. Neither man broke. The race merely came to a thrilling, shattering end, exacting such an enormous toll that neither man ever ran as well again. Beardsley, the most innocent of men, descended into felony drug addiction, and Salazar, the toughest of men, fell prey to depression. Exquisitely written and rich with human drama, John Brant's *Duel in the Sun* brilliantly captures the mythic character of the most thrilling American marathon ever run—and the powerful forces of fate that drove these two athletes in the years afterward.
