Encyclopedia of Humor Studies Salvatore Attardo, 2014-02-25 The Encyclopedia of Humor Studies explores the concept of humor in history and modern society in the United States and internationally. This work's scope encompasses the humor of children, adults, and even nonhuman primates throughout the ages, from crude jokes and simple slapstick to sophisticated word play and ironic parody and satire. As an academic social history, it includes the perspectives of a wide range of disciplines, including sociology, child development, social psychology, life style history, communication, and entertainment media. Readers will develop an understanding of the importance of humor as it has developed globally throughout history and appreciate its effects on child and adult development, especially in the areas of health, creativity, social development, and imagination. This two-volume set is available in both print and electronic formats. Features & Benefits: The General Editor also serves as Editor-in-Chief of HUMOR: International Journal of Humor Research for The International Society for Humor Studies. The book's 335 articles are organized in A-to-Z fashion in two volumes (approximately 1,000 pages). This work is enhanced by an introduction by the General Editor, a Foreword, a list of the articles and contributors, and a Reader's Guide that groups related entries thematically. A Chronology of Humor, a Resource Guide, and a detailed Index are included. Each entry concludes with References/Further Readings and cross references to related entries. The Index, Reader's Guide themes, and cross references between and among related entries combine to provide robust search-and-browse features in the electronic version. This two-volume, A-to-Z set provides a general, non-technical resource for students and researchers in such diverse fields as communication and media studies, sociology and anthropology, social and cognitive psychology, history, literature and linguistics, and popular culture and folklore. Jews and Humor Leonard J. Greenspoon, 2011-10-01 Jews and humor is, for most people, a natural and felicitous collocation. In spite of, or perhaps because of, a history of crises and living on the edge, Jews have often created or resorted to humor. But what is humor? And what makes certain types, instances, or performances of humor Jewish? These are among the myriad queries addressed by the fourteen authors whose essays are collected in this volume. And, thankfully, their observations, always apt and often witty, are expressed with a lightness of style and a depth of analysis that are appropriate to the many topics they cover. The scholars who contributed to this collection allow readers both to discern the common features that make up Jewish humor and to delight in the individualism and eccentricities of the many figures whose lives and accomplishments are narrated here. Because these essays are written in a clear, jargon-free style, they will appeal to everyone—even those who don't usually crack a smile!

Albion's Seed David Hackett Fischer, 1991-03-14 This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In

this sense, nearly all Americans are Albion's Seed, no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Literature Incorporated John O'Brien, 2016 Introduction: the corporation as metaphor -- John Locke, desire, and the incorporation of money -- Wonderful event: the South Sea bubble and the crisis of property -- Insurance and the problem of sentimental representation -- Bodies of men: abolitionist writing and the question of interest -- Held in reserve: banks, serial crises, and the ekphrastic turn -- Coda: the entrepreneur as corporate hero

Food and Theatre on the World Stage Dorothy Chansky, Ann Folino White, 2015-06-12 Putting food and theatre into direct conversation, this volume focuses on how food and theatre have operated for centuries as partners in the performative, symbolic, and literary making of meaning. Through case studies, literary analyses, and performance critiques, contributors examine theatrical work from China, Japan, India, Greece, Italy, France, Germany, England, the United States, Chile, Argentina, and Zimbabwe, addressing work from classical, popular, and contemporary theatre practices. The investigation of uses of food across media and artistic genres is a burgeoning area of scholarly investigation, yet regarding representation and symbolism, literature and film have received more attention than theatre, while performance studies scholars have taken the lead in examining the performative aspects of food events. This collection looks across dramatic genres, historical periods, and cultural contexts, and at food in all of its socio-political, material complexity to examine the particular problems and potentials of invoking and using food in live theatre. The volume considers food as a transhistorical, global phenomenon across theatre genres, addressing the explosion of food studies at the end of the twentieth century that has shown how food is a crucial aspect of cultural identity.

Andrew Marvell, Orphan of the Hurricane Derek Hirst, Steven N. Zwicker, 2012-06-14 This text studies the poetry and polemics of early modern writer Andrew Marvell. It situates Marvell and his writings within the patronage networks and political upheavals of mid-17th century England.

Inventing Maternity Susan C. Greenfield, Carol Barash, 2021-10-21 Not until the eighteenth century was the image of the tender, full-time mother invented. This image retains its power today. *Inventing Maternity* demonstrates that, despite its association with an increasingly standardized set of values, motherhood remained contested terrain. Drawing on feminist, cultural, and postcolonial theory, *Inventing Maternity* surveys a wide range of sources—medical texts, political tracts, religious doctrine, poems, novels, slave narratives, conduct books, and cookbooks. The first half of the volume, covering the mid-seventeenth to the late eighteenth centuries, considers central debates about fetal development, pregnancy, breastfeeding, and childbearing. The second half, covering the late eighteenth to the mid-nineteenth centuries, charts a historical shift to the regulation of reproduction as maternity is increasingly associated with infanticide, population control, poverty, and colonial, national, and racial instability. In her introduction, Greenfield provides a historical overview of early modern interpretations of maternity. She concludes with a consideration of their impact on current debates about reproductive rights and technologies, child custody, and the cycles of poverty.

Transnational Exchange in Early Modern Theater Robert Henke, Eric Nicholson, 2008 Emphasizing a performative and stage-centered approach, this book considers early modern European theater as an international phenomenon. Early modern theater was remarkable both in the ways that it represented material and symbolic exchanges across borders but also in the ways that it enacted them. In analyzing theater as a medium of dialogic communication, the volume emphasizes cultural relationships of exchange and reciprocity more than unilateral encounters of hegemony and domination.

Women, Medicine and Theatre 1500-1750 M.A. Katritzky, 2017-03-02 Well illustrated, accessibly presented, and drawing on a comprehensive range of historical documents, including

British, German and other European images, and literary as well as non-literary texts (many previously unconsidered in this context), this study offers the first interdisciplinary gendered assessment of early modern performing itinerant healers (mountebanks, charlatans and quacksalvers). As Katritzky shows, quacks, male or female, combined, in widely varying proportions, three elements: the medical, the itinerant and the theatrical. Above all, they were performers. They used theatricality, in its widest possible sense, to attract customers and to promote and advertise their pharmaceuticals and health care services. Katritzky investigates here the performative aspects of quack marketing and healing methods, and their profound links with the rise of Europe's professional actresses, fields of enquiry which are only now beginning to attract significant attention from historians of medicine, economics or the theatre. Women, Medicine and Theatre also recovers women's roles in the economy of the itinerant quack stage. Women associated with mountebank troupes were medically and theatrically active at every level from major stage celebrities to humble urine sample collectors, but also included sedentary relatives, non-performing assistants, door- and bookkeepers, wardrobe mistresses, prop and costume loaners, landladies, spectators, patrons and clients. Katritzky's study of the whole range of women who supported the troupes contextualizes the activities of their male counterparts, and rehabilitates a broad spectrum of diversely occupied women. The strength of this title's research method lies in its comparative examination of documents that are generally examined from the point of view of either their performative or their medical aspects, by historians of, respectively, the theatre and medicine. Taken as a whole, these handbills, literary descriptions a

Comics in French Laurence Grove, 2010 Whereas in English-speaking countries comics are for children or adults 'who should know better', in France and Belgium the form is recognized as the 'Ninth Art' and follows in the path of poetry, architecture, painting and cinema. The bande dessinée [comic strip] has its own national institutions, regularly obtains front-page coverage and has received the accolades of statesmen from De Gaulle onwards. On the way to providing a comprehensive introduction to the most francophone of cultural phenomena, this book considers national specificity as relevant to an anglophone reader, whilst exploring related issues such as text/image expression, historical precedents and sociological implication. To do so it presents and analyses priceless manuscripts, a Franco-American rodent, Nazi propaganda, a museum-piece urinal, intellectual gay porn and a prehistoric warrior who's really Zinedine Zidane. Laurence Grove is Senior Lecturer and Head of French at the University of Glasgow. His previous affiliations include the University of Pittsburgh, the Newberry Library (Chicago), Middlebury College (Vermont) and the Université Rennes 2. He works on text/image phenomena from the sixteenth century to the present day and has authored a number of works on the subject. Laurence Grove is President of the IBDS, an international society for the study of the bande dessinée.

Of Corpse Peter Narvaez, 2003-07 Laughter, contemporary theory suggests, is often aggressive in some manner and may be prompted by a sudden perception of incongruity combined with memories of past emotional experience. Given this importance of the past to our recognition of the comic, it follows that some traditions dispose us to ludic responses. The studies in *Of Corpse: Death and Humor in Folklore and Popular Culture* examine specific interactions of text (jokes, poetry, epitaphs, iconography, film drama) and social context (wakes, festivals, disasters) that shape and generate laughter. Uniquely, however, the essays here peruse a remarkable paradox---the convergence of death and humor.
