*Voices of American Women's History from Reconstruction to the Present* Kristine Ashton Gunnell,2023-11-30 This collection of historical and contemporary writing by women argues that, in addition to gender, identity markers such as race, class, religion, citizenship, sexuality, and marital status have influenced women's lives in the United States for more than 200 years. *Voices of American Women's History* illustrates that gender alone has never defined women's experiences in America. Women from diverse backgrounds are represented in media and documents that include pamphlets, book excerpts, personal narratives, photographs, advertisements, congressional testimonies, and Supreme Court rulings. Such issues as abortion, marriage equality, domestic violence, and gender parity are shown from historical and contemporary angles, as this collection of primary sources allows readers and students to easily trace how women's lives and histories have and continue to intersect. With a historical context for each selection, the book also features structured activities to help teachers with class discussion and exams, including suggestions for further reading, document analysis, essay questions, and manageable research assignments.

Info We Trust RJ Andrews,2019-01-03 How do we create new ways of looking at the world? Join award-winning data storyteller RJ Andrews as he pushes beyond the usual how-to, and takes you on an adventure into the rich art of informing. Creating Info We Trust is a craft that puts the world into forms that are strong and true. It begins with maps, diagrams, and charts — but must push further than dry defaults to be truly effective. How do we attract attention? How can we offer audiences valuable experiences worth their time? How can we help people access complexity? Dark and mysterious, but full of potential, data is the raw material from which new understanding can emerge. Become a hero of the information age as you learn how to dip into the chaos of data and emerge with new understanding that can entertain, improve, and inspire. Whether you call the craft data storytelling, data visualization, data journalism, dashboard design, or infographic creation — what matters is that you are courageously confronting the chaos of it all in order to improve how people see the world. Info We Trust is written for everyone who straddles the domains of data and people: data visualization professionals, analysts, and all who are enthusiastic for seeing the world in new ways. This book draws from the entirety of human experience, quantitative and poetic. It teaches advanced techniques, such as visual metaphor and data transformations, in order to create more human presentations of data. It also shows how we can learn from print advertising, engineering, museum curation, and mythology archetypes. This human-centered approach works with machines to design information for people. Advance your understanding beyond by learning from a broad tradition of putting things “in formation” to create new and wonderful ways of opening our eyes to the world. Info We Trust takes a thoroughly original point of attack on the art of informing. It builds on decades of best practices and adds the creative enthusiasm of a world-class data storyteller. Info We Trust is lavishly illustrated with hundreds of original compositions designed to illuminate the craft, delight the reader, and inspire a generation of data storytellers.

Managing Local Government Kimberly L. Nelson,Carl W. Stenberg,2017-08-04 *Managing Local Government: An Essential Guide for Municipal and County Managers* offers a practical introduction to the changing structure, forms, and functions of local governments. Taking a metropolitan management perspective, authors Kimberly Nelson and Carl W. Stenberg explain U.S. local government within historical context and provide strategies for effective local government management and problem solving. Real-life scenarios and contemporary issues illustrate the organization and networks of local governments; the roles, responsibilities, and relationships of city and county managers; and the dynamics of the intergovernmental system. Case studies and discussion questions in each chapter encourage critical analysis of the challenges of collaborative governance. Unlike other books on the market, this text's combined approach of theory and practice encourages students to enter municipal and county management careers and equips them with tools to be successful from day one.

International Dictionary of Marketing and Communication Frank William. Jefkins,2012-12-06 This dictionary covers marketing communications in the broadest sense, including advertising, but also extending to public relations which concerns many organizations not involved in marketing and which have little to do with advertising. Entries have been gathered from around the world, and this dictionary will therefore be valuable to those operating in an international environment where different terms, or terms with different spellings, are used. There are also terms with different meanings, depending on their country of origin. For example, in the UK newspapers are called press media, while in the USA the term print media is more usual. In the UK, print usually applies to printed items, such as sales or educational literature. Likewise, there are big differences between European and American broadcasting systems, and sponsored radio or TV can mean different things around the world. Outdoor advertising also has different terminology in different countries, especially in North America and the UK. In many cases, alternative British and American terms are given, while some are either European or American. Some terminology is specific to a certain country. Entries have been collected from all parts of the world, including the oral media or folk media of the Third World. Financial terms have been included because of their increasing importance in advertising and public relations, and the dictionary reflects the increasing relevance of satellites and computers.

Archaeology of Identity and Dissonance Diane F. George,Bernice Kurchin,2019-01-21 This volume demonstrates how humans adapt to new and challenging environments by building and adjusting their identities. By gathering a diverse set of case studies that draw on popular themes in contemporary historical archaeology and current trends in archaeological method and theory, it shows the many ways identity formation can be seen in the material world that humans create. The essays focus on situations across the globe where humans have experienced dissonance in the form of colonization, migration, conflict, marginalization, and other cultural encounters. Featuring a wide time span that reaches to the ancient past, examples include Roman soldiers in Britain, Vikings in Iceland and the Orkney Islands, sex workers in French colonial Algeria, Irish immigrants to the United States, an African American community in nineteenth-century New York City, and the Taino people of contemporary Puerto Rico. These studies draw on a variety of data, from excavated artifacts to landscape and architecture to archival materials. In their analyses, contributors explore multiple aspects of identity such as class, gender, race, and ethnicity, showing how these factors intersect for many of the individuals and groups studied. The questions of identity formation explored in this volume are critical to understanding the world today as humans continue to grapple with the legacies of colonialism and the realities of globalized and divided societies.

Injustice, Inc. Daniel L. Hatcher,2023-02-21 An unflinching exposé of how the family, juvenile, and criminal justice systems monetize the communities they purport to serve and trap them in crushing poverty *Injustice, Inc.* exposes the ways in which justice systems exploit America's history of racial and economic inequality to generate revenue on a massive scale. With searing legal analysis, Daniel L. Hatcher uncovers how courts, prosecutors, police, probation departments, and detention facilities are abandoning ethics to churn vulnerable children and adults into unconstitutional factory-like operations. Hatcher reveals stark details of revenue schemes and reflects on the systemic racialized harm of the injustice enterprise. He

details how these corporatized institutions enter contracts to make money removing children from their homes, extort fines and fees, collaborate with debt collectors, seize property, incentivize arrests and evictions, enforce unpaid child labor, maximize occupancy in detention and treatment centers, and more. Injustice, Inc. underscores the need to unravel these predatory operations, which have escaped public scrutiny for too long.

**American Disruptor** Roland De Wolk,2019-11-05 American Disruptor is the untold story of Leland Stanford – from his birth in a backwoods bar to the founding of the world-class university that became and remains the nucleus of Silicon Valley. The life of this robber baron, politician, and historic influencer is the astonishing tale of how one supremely ambitious man became this country's original disruptor – reshaping industry and engineering one of the greatest raids on the public treasury for America’s transcontinental railroad, all while living more opulently than maharajas, kings, and emperors. It is also the saga of how Stanford, once a serial failure, overcame all obstacles to become one of America’s most powerful and wealthiest men, using his high elective office to enrich himself before losing the one thing that mattered most to him – his only child and son. Scandal and intrigue would follow Stanford through his life, and even after his death, when his widow was murdered in a Honolulu hotel – a crime quickly covered up by the almost stillborn university she had saved. Richly detailed and deeply researched, American Disruptor restores Leland Stanford’s rightful place as a revolutionary force and architect of modern America.
