Learning and Collaboration Technologies: Designing and Developing Novel Learning Experiences Panayiotis Zaphiris,Andri Ioannou,2014-06-06 The two-volume set LNCS 8523-8524 constitutes the refereed proceedings Zof the First International Conference on Learning and Collaboration Technologies, LCT 2014, held as part of the 16th International Conference on Human-Computer Interaction, HCII 2014, in Heraklion, Crete, Greece in June 2014, jointly with 13 other thematically similar conferences. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences were carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 93 contributions included in the LCT proceedings were carefully reviewed and selected for inclusion in this two-volume set. The 45 papers included in this volume are organized in the following topical sections: design of learning technologies; novel approaches in eLearning; student modeling and learning behavior; supporting problem-based, inquiry-based, project-based and blended learning.

Machine and Deep Learning Using MATLAB Kamal I. M. Al-Malah,2023-10-12 MACHINE AND DEEP LEARNING In-depth resource covering machine and deep learning methods using MATLAB tools and algorithms, providing insights and algorithmic decision-making processes Machine and Deep Learning Using MATLAB introduces early career professionals to the power of MATLAB to explore machine and deep learning applications by explaining the relevant MATLAB tool or app and how it is used for a given method or a collection of methods. Its properties, in terms of input and output arguments, are explained, the limitations or applicability is indicated via an accompanied text or a table, and a complete running example is shown with all needed MATLAB command prompt code. The text also presents the results, in the form of figures or tables, in parallel with the given MATLAB code, and the MATLAB written code can be later

used as a template for trying to solve new cases or datasets. Throughout, the text features worked examples in each chapter for self-study with an accompanying website providing solutions and coding samples. Highlighted notes draw the attention of the user to critical points or issues. Readers will also find information on: Numeric data acquisition and analysis in the form of applying computational algorithms to predict the numeric data patterns (clustering or unsupervised learning) Relationships between predictors and response variable (supervised), categorically sub-divided into classification (discrete response) and regression (continuous response) Image acquisition and analysis in the form of applying one of neural networks, and estimating net accuracy, net loss, and/or RMSE for the successive training, validation, and testing steps Retraining and creation for image labeling, object identification, regression classification, and text recognition Machine and Deep Learning Using MATLAB is a useful and highly comprehensive resource on the subject for professionals, advanced students, and researchers who have some familiarity with MATLAB and are situated in engineering and scientific fields, who wish to gain mastery over the software and its numerous applications.

  eXplode: The X Fitness Training System Gino Arcaro, Sought after his entire adult life to help others achieve their workout goals, Arcaro put his weight lifting theories and routines into this manual. His "Case Studies," true stories from his 40+ years of working out (completely natural) bring a sense of reality to the average gym-goer who just wants to get in shape, stay in shape, and most-importantly, not quit. No gimmicks, just discussion and formulas that can be tailored to any situation regardless of how long or how intensely one has been working out.

  Strength Training for Basketball NSCA -National Strength & Conditioning Association,Javair Gillett,William Burgos-Fontanez Jr.,2019-12-11 Why is strength training important for the basketball athlete? In a dynamic game that changes by the instant, athletes need to be conditioned to sustain the highly stressful workloads experienced during practice or a game. For the basketball athlete, that means strength cannot be defined only as a measure of

how much weight the person can lift; rather, it is an ability that should be judged by whether it can successfully be applied on the court. Developed with the expertise of the National Strength and Conditioning Association (NSCA), Strength Training for Basketball shows you how to design resistance training programs that will develop your athletes' strength on the court—helping them to jump higher, accelerate faster, and abruptly change direction. The book will help you understand the specific physical demands of each position—point guard, shooting guard, small forward, power forward, and center. You will also find the following: 20 testing protocols for measuring and assessing athletes' strength, reactive strength, power, speed, agility, endurance, and anaerobic capacity 18 total body exercises with 2 variations 19 lower body exercises with 3 variations 17 upper body exercises 11 anatomical core exercises with 5 variations 16 sample programs for off-season, preseason, in-season, and postseason resistance training Each resistance training exercise consists of a series of photos and a detailed list of primary muscles trained, beginning position and movement phases, breathing guidelines, modifications and variations, and coaching tips to guide you in selecting the right exercises for a program. You'll also learn how to structure those programs based on the goals and length of each season and for each position. Backed by the NSCA and the knowledge and experience of successful high school, college, and professional basketball strength and conditioning professionals, Strength Training for Basketball is the authoritative resource for creating basketball-specific resistance training programs to help your athletes optimize their strength and successfully transfer that strength to the basketball court. Earn continuing education credits/units! A continuing education course and exam that uses this book is also available. It may be purchased separately or as part of a package that includes all the course materials and exam.
