**Neuro-Advertising** Elke Schwarz,2022-12-13 Find out how to increase your marketing success with this book on neuro-advertising. Marketing is one of the most important departments in a company. It is responsible for attracting new customers and retaining existing customers. Unfortunately, in many cases, high budgets are spent on marketing strategies that have little effect. This book on neuro-advertising will help you to effectively increase the impact of your advertising. It is based on the Subconscious Decision Marketing Index (SDMI). This neuroscientific method represents a new marketing tool that can be used to measure the subconscious impact of advertising. These include: Facial features Body Reactions Emotions Brain activity In this way, advertising strategies can be effectively planned and marketing efficiency sustainably increased. It is measured how successful advertising is or is not. Then advertising measures can be designed according to the target group. Marketing agencies can benefit from this technique as well as marketers working for companies. Key figures help to compare results Typically, it is difficult to measure unconscious emotions and emotions. However, this new method manages to do just that by creating metrics in the context of consumer research. In this way, individual indices of marketing effectiveness can be measured: Emotional Index: What emotions does advertising trigger? Benefit Index: To what extent does the advertising convince with brain-appropriate benefits? Memory index: How high is the actual memory value? Hormone index: Which hormonal reactions are triggered and how do they influence the buying process of customers? Impulse Index: How well does advertising use impulse opportunities? In turn, you can easily compare these indices with previous measurements and derive clear recommendations for action. The book on neuro-advertising explains this method in a practical way, allowing you to integrate it directly into your marketing planning.

*Prevention, Diagnosis and Treatment of Rare Disorders* Marc Marie Doms,Segolene Ayme,Timothy Martin Cox,Anna Tyłki-Szymańska,2022-11-10  
**Sustainable Cultural Management** Łukasz Wróblewski,Ana Gaio,Ellen Rosewall,2019-12-06 The connections between culture and sustainability have been in the public agenda since the 20th century. However, whilst global sustainability programmes at international institutional levels are yet to recognise the role of culture in their sustainability policies, the bid (albeit failed) in the early 2000s to formally add “culture” to the trilogy of sustainability pillars (economic, social, and environmental) mobilised a new discourse for the reframing of cultural policy narrative, which in turn urged a reassessment of methods of cultural management reflecting the same concerns among the sector’s grassroots. The idea of sustainability and culture working together and their envisioned role in future-proofing society and human development captured the imagination of cultural commentators, policy makers and practitioners alike, keen to fulfil these principles “out there”—in cultural organizations and events mega and small, in cities and regions, local and global. The papers in this Special Issue reflect this appeal. This publication covers a wide selection of issues related to sustainable cultural management, which means that it can be recommended to a varied audience. First of all, it can be recommended to managers experienced in cultural management, where success is measured more by the degree of mission accomplishment and the social benefits achieved rather than by profit. Another group comprises the employees of cultural organizations who want to improve their knowledge of sustainable cultural management. This Special Issue can also be recommended to artists, researchers, students, state and local government employees, founders and patrons of art, and all those who want to understand the importance of sustainable cultural management.

**Time Limited Interests in Land** Cornelius Van Der Merwe,Alain-Laurent Verbeke,2012-06-28 A comprehensive comparative treatment of six instances of time-limited interests in land as encountered in fourteen European jurisdictions. The survey explores the commercial or social origins of each legal institution concerned and highlights their enforceability against third parties, their content and their role in land development. The commercial purpose of residential and agricultural leases is contrasted with the social aim of personal servitudes (and its common-law equivalent liferent) to provide sustenance for life to mostly family members making the latter an important estate planning device. Whereas the ingrained principles of leases and personal servitudes restrain the full exploitation of land, it is indicated that public authorities and private capital could combine to turn the old-fashioned time-limited institutions of hereditary building lease (superficies) and hereditary land lease (emphyteusis) into pivotal devices in alleviating the acute shortage of social housing and in promoting the fullest exploitation of pristine agricultural land.

**European Kinship in the Age of Biotechnology** Jeanette Edwards,Carles Salazar,2009 Interest in the study of kinship, a key area of anthropological enquiry, has recently reemerged. Dubbed 'the new kinship', this interest was stimulated by the 'new genetics' and revived interest in kinship and family patterns. This volume investigates the impact of biotechnology on contemporary understandings of kinship, of family and 'belonging' in a variety of European settings and reveals similarities and differences in how kinship is conceived. What constitutes kinship for different publics? How significant are biogenetic links? What does family resemblance tell us? Why is genetically modified food an issue? Are 'genes' and 'blood' interchangeable? It has been argued that the recent prominence of genetic science and genetic technologies has resulted in a 'geneticization' of social life; the ethnographic examples presented here do show shifts occurring in notions of 'nature' and of what is 'natural'. But, they also illustrate the complexity of contemporary kinship thinking in Europe and the continued interconnectedness of biological and sociological understandings of relatedness and the relationship between nature and nurture.

**On Collective Goods, Voluntary Contributions, and Fundraising** Alexander von Kotzebue,2013-10-21 Alexander von Kotzebue investigates the interdependency of charitable giving, fundraising, and governmental intervention. His study comprises a literature survey, a model of the donor-fundraiser relation, and finally, an econometric analysis of the impact of fundraising on giving behaviour. The survey introduces theoretical approaches to donor motivation, groups them according to their central assumptions, and assesses their empirical relevance. The theoretical analysis takes for granted that fundraising is an integral part of the giving process, and models the potential conflict concerning the amount of fundraising exerted. Fundraising typically displays an ambiguous effect on donor utility. The empirical analysis employs two extensive datasets to investigate this complex donor-fundraiser relation, while establishing a convincing link of donor-level data to non-profit financial data.

**Political Party Funding and Private Donations in Italy** Chiara Fiorelli,2021-09-11 Despite any evidence against it, political parties still represent the most important collective actor in a democratic political system. Their role in representing pluralism and their electoral centrality is not undermined, even when it is strongly questioned. As long as political parties can be understood as representative actors articulating political demands, this book focuses on the capacity of Italian political parties to mobilize resources and financial resources in particular. Through the analysis of private financial donations to political parties, a neglected source of information that will be fundamental in the near future, the author assesses their connective capability with specific interests' representatives in the last decades in order to provide evidence of their changing representational role as collective actors.

**Capabilities, Innovation and Economic Growth** Michele Capriati,2017-07-28 The question of whether we can foster growth and innovation while promoting individual freedoms poses a challenge for everyone studying and working on innovation and development policies. Whilst innovation literature is largely dominated by a focus on efficiency, development literature tends to focus on equality and pays less attention to mechanisms

fostering economic and social change. This book aims to move beyond these barriers and to identify development policies that foster both efficiency and equality, exploring the connection between innovation policies and the improvement of individual freedoms. Capabilities, Innovation and Economic Growth argues that we can answer these questions by focusing on the relation between Amartya Sen's human development approach and the Neo-Schumpeterian analysis of innovation systems. After considering the connections between the two schools of thought and the way they enrich each other's perspectives, chapters go on to show how policy can support virtuous circles in which innovation, human development and economic growth interact and mutually reinforce each other. This is undertaken through the descriptive analysis and the empirical testing of a sample of nations and European regions. The volume concludes with an exploration of the contribution that the capabilities approach can give to the design of innovation policy, and with the analysis of macroeconomic policies favorable to innovation and human development. This will be essential reading for: students and academic economists interested in development, growth and innovation; policy makers and officers in charge of defining development and innovation plans at national and regional level; and consultants and managers in development agencies implementing innovation and development projects.

**Living Donor Organ Transplantation** Rainer W.G. Gruessner, Enrico Benedetti, 2024-01-26 Living Organ Donor Transplantation, Second Edition puts the entire discipline in perspective while guiding readers step-by-step through the most common organ transplant surgeries. Organized into four cohesive parts and featuring numerous surgical illustrations, this sourcebook delivers an incisive look at every key consideration for general surgeons who perform transplantations, from patient selection to recipient workup and outcomes, and emphasizes the most humanitarian approaches. Sections provide content on living donor uterus transplantation, new operative techniques, including the use of robotic and minimally invasive transplant procedures, new immunosuppressive regimens, new protocols of tolerance induction including stem cell therapy and transplantation, and much more. Chapter authors are international leaders in their fields and represent institutions from four continents (Americas: USA, Argentina, Brazil, Canada; Europe: France, Germany, Italy, Spain, Sweden, UK; Asia: China, Japan, Korea, Taiwan; Australia). Provides an A-Z, operation-oriented guide to the field of living donor organ transplantation Examines a wide spectrum of solid organ transplantation procedures (liver, pancreas, kidney, intestine), with accompanying chapters on the history of the procedure, the donor, the recipient, and cost analysis Covers techniques that explain adequate pretransplant workup and posttransplant care Covers cultural differences, ethical and legal issues, social issues, current financial incentives, and the illegal organ trade

**Routledge Handbook of Primary Elections** Robert G. Boatright, 2018-02-15 Primary elections have been used for the past century for most U.S. elective offices and their popularity is growing in other nations as well. In some circumstances, primaries ensure that citizens have a say in elections and test the skills of candidates before they get to the general election. Yet primaries are often criticized for increasing the cost of elections, for producing ideologically extreme candidates, and for denying voters the opportunity to choose candidates whose appeal transcends partisanship. Few such arguments have, however, been rigorously tested. This innovative Handbook evaluates many of the claims, positive and negative, that have been made about primaries. It is organized into six sections, covering the origins of primary elections; primary voters; US presidential primaries; US subpresidential primaries; primaries in other parts of the world; and reform proposals. The Routledge Handbook of Primary Elections is an important research tool for scholars, a resource guide for students, and a source of ideas for those who seek to modify the electoral process.

**The Life You Can Save** Peter Singer, 2010 Argues that for the first time in history we're in a position to end extreme poverty throughout the world, both because of our unprecedented wealth and advances in technology, therefore we can no longer consider ourselves good people unless we give more to the poor. Reprint.

**Surfing the Past** Olivier Nyirubugara, 2012 This book discusses one of the most frequently discussed subjects in history education during the last two decades, namely how secondary school pupils use the World Wide Web for their learning activities. Based on two case studies in two Dutch schools, the book shows some ways in which the use of the Web has changed history education in at least three respects: first, the findings of the two case studies show that the Web has a huge potential to turn the history class - previously described as boring and too abstract - into a livelier and more attractive environment, where concepts, events, phenomena and processes of the past almost always have textual and/or [audio]visual representations; second, strong indications were observed showing that the Web fosters historical understanding, not only by triggering thinking processes that take pupils beyond the shown contents, but also by prompting them to evaluate sources and sample relevant fragments for their assignments; third, the Web has brought into history education sources that were previously excluded, including those described as unconventional. This book shows, among other things, that convergence is underway on both the user side - since pupils use both conventional and unconventional online sources - and the content-production side, where heritage institutions are increasingly getting involved in unconventional platforms like Wikipedia. The latter emerged from the two case studies as the most popular source of historical information, while the websites of heritage institutions tended to appear at the bottom of the list of references. Unlike personal sites, which also scored better, heritage sites face some obstacles, including the still dominant desire to preserve institutions' identity and uniqueness, conservatism - which often prevents the redefinition of collection management tasks -, and the tax-payers' dilemma. For that reason, collections are not hyperlinked and, therefore, remain invisible and not easy to find online.

**Altruism Reconsidered** Peter Sýkora, Urban Wiesing, 2016-04-01 As the use of human body parts has become increasingly commercialized, a need has arisen for new approaches to regulation that moves beyond the paradigm of altruism. During the course of this discussion, the notion of property has become a key concept. Focusing on practical and conceptual perspectives, the multidisciplinary group of authors, which includes specialists in philosophy, law, sociology, biology and medicine, have come together with practicing lawyers to consider both legal provisions and patterns of regulation in countries across Europe. Identifying divergences between different legal traditions, the authors explore various conceptual models which could be used to improve and to guide policy making. With this twin focus on practical and conceptual perspectives, this volume sets the standard for a detailed and innovative discussion of issues surrounding the regulation of research on human tissue.

**The History of Law in Europe** Bart Wauters, Marco de Benito, 2017-04-28 Comprehensive and accessible, this book offers a concise synthesis of the evolution of the law in Western Europe, from ancient Rome to the beginning of the twentieth century. It situates law in the wider framework of Europe's political, economic, social and cultural developments.

**The European Observatory for SMEs** European Observatory for SMEs, 2000 Against the background of completing the European Single Market is the observance and monitoring of small and medium-sized enterprises (SMEs). With about 20 million such businesses, employing some 117 million people, SMEs represent an economic lynchpin to the success of the Single Market concept. This 6th report, from the Observatory, and prepared by a consortium led by KPMG Consulting, focuses on the economic and financial needs of SMEs. Specific chapters look at their products and services, the recruitment and training of staff, particular vocational training, and their access to investment. The report is concluded with the set of policy recommendations, which are aimed at strengthening the entrepreneurial culture. These recommendations include: to provide more information on public procurement to SMEs; to promote further research on the impact of electronic commerce on the position of SMEs.
