Strategic Intelligence for the Future 2 Henri Dou,Alain Juillet,Philippe Clerc,2019-04-10 Information in all its forms is at the heart of the economic intelligence process. It is also a powerful vector of innovation and, more than ever, a balance between economic and societal forces. That is why a large part of Strategic Intelligence for the Future 2 analyzes the various aspects of information, from traditional processing and research to the psychological and epigenetic aspects of its development. This leads to a new vision of its integration into organizations. In addition, new technologies offer extensive access to information, including social networks which are critically analyzed here. In a complex world where geopolitics and the new concept of information warfare are becoming increasingly important, it becomes imperative to better apprehend and understand our environment, in order to develop critical thinking that will reinforce the different global aspects of security in economic intelligence.

Separation of Powers in African Constitutionalism Charles M. Fombad,2016-03-03 The new series Stellenbosch Handbooks in African Constitutional Law will engage with contemporary issues of constitutionalism in Africa, filling a notable gap in African comparative constitutional law. Separation of Powers in African Constitutionalism is the first in the series, examining one of the critical measures introduced by African constitutional designers in their attempts to entrench an ethos of constitutionalism on the continent. Taking a critical look at the different ways in which attempts have been made to separate the different branches of government, the Handbook examines the impact this is having on transparent and accountable governance. Beginning with an overview of constitutionalism in Africa and the different influences on modern African constitutional developments, it looks at the relationship between the legislature and the executive as well as the relationship between the judiciary and the political branches. Despite differences in approaches between the different constitutional cultures that have influenced developments in Africa, there remain common problems. One of these problems is the constant friction in the relationship between the three branches and the resurgent threats of authoritarianism which clearly suggest that there remain serious problems in both constitutional design and implementation. The book also studies the increasing role being played by independent constitutional institutions and how they complement the checks and balances associated with the traditional three branches of government.

The Genetic Basis of Plant Physiological Processes John King,1991-10-03 Plant molecular biology is rapidly becoming an important and successful component of the worldwide research challenge to apply basic biochemical, physiological and genetic techniques for the improvement of agricultural crops. This book shows how the study of fundamental plant physiological processes is being advanced through the science of genetics. The author has adopted a case study approach to illustrate how defined genetic materials in mutants and plant variants are being productively used to explore photosynthesis, stress tolerance, seed physiology, and flowering and reproductive morphology. This approach also helps avoid overwhelming readers who might be unfamiliar with the enormous detail now available in this burgeoning field. The case studies cover all major fields of plant physiology and are grouped in a format familiar to students of the discipline. Most take the form of a brief introduction followed by a discussion of the isolation and characterization of the mutants in question, and then by examples of how these mutants have been used to provide physiological insights. The aim is to make the information accessible to students with an elementary knowledge of plant physiology, genetics, and molecular biology, as well as other scientists and students who wish to know more about the application of the powerful tools provided by genetics.

Traveling in French Cinema Sylvie Blum-Reid,2016-02-25 Travel narratives abound in French cinema since the 1980s. This study delineates

recurrent travel tropes in films such as departures and returns, the chase, the escape, nomadic wandering, interior voyages, the unlikely travel, rituals, pilgrimages, migrants' narratives and emergencies, women's travel, and healing narratives.

Women Who Kill David Roche, Cristelle Maury, 2020-02-20 *Women Who Kill* explores several lines of inquiry: the female murderer as a figure that destabilizes order; the tension between criminal and victim; the relationship between crime and expression (or the lack thereof); and the paradox whereby a crime can be both an act of destruction and a creative assertion of agency. In doing so, the contributors assess the influence of feminist, queer and gender studies on mainstream television and cinema, notably in the genres (film noir, horror, melodrama) that have received the most critical attention from this perspective. They also analyse the politics of representation by considering these works of fiction in their contexts and addressing some of the ambiguities raised by postfeminism. The book is structured in three parts: Neo-femmes Fatales; Action Babes and Monstrous Women. Films and series examined include *White Men Are Cracking Up* (1994); *Hit & Miss* (2012); *Gone Girl* (2014); *Terminator* (1984); *The Walking Dead* (2010); *Mad Max: Fury Road* (2015); *Contagion* (2011) and *Ex Machina* (2015) among others.

Ukraine Between War and Peace Jacques Baud, 2023-07-04 Has the US strategy in Ukraine reached an impasse? What is the Russian conduct of military operations? When will the Ukrainian counter-offensive take place? Does Western weaponry really make a difference in Ukraine? Who are the winners of this war? What changes in the world are we witnessing since February 24, 2022? What is the reality of the losses on the Ukrainian and Russian sides? Can Western industry compete with Russian industry in Ukraine? Why is a negotiated solution not being sought? How is our perception of the conflict serving Ukraine? To answer these questions and many others, Jacques Baud relies on information from Western intelligence services and American documents that were leaked in April 2023. After the best-sellers *Putin, Game Master?* and *Operation Z*, both works praised world-wide, Baud returns to the war in Ukraine by analyzing the facts and nothing but the facts. Whether one is for or against the position of Ukraine, one must nevertheless deal with the field of operations and to analyze what is happening there. This is the only way to find a path to peace—because peace will not come by relying on illusions. Jacques Baud was a member of the Swiss strategic intelligence, a specialist in Eastern European countries and a former head of the United Nations peace operations doctrine. In NATO, he was involved in programs in Ukraine, including

after the Mayan revolution in 2014 and 2017. In addition to his major works on the conflict in Ukraine, he is the author of several books on intelligence, war, and terrorism, including *Governing by Fake News*, *Defeating Jihadist Terrorism*, and *The Navalny Affair*, all published by Max Milo.

French Blockbusters Charlie Michael, 2019-07-17 The digitised spectacles conjured by a word like 'blockbuster' may create a certain cognitive dissonance with received ideas about French cinema - long celebrated as a model for philosophical, economic and aesthetic resistance to globalised popular culture. While the Gallic 'cultural exception' remains a forceful current to this day, this book shows how the onslaught of Hollywood mega-franchises and new media platforms since the 1980s has also provoked an overtly commercialised response from French producers eager to redefine the stakes and scope of their own traditions. Cutting across a swath of recent French-produced cinema, *French Blockbusters* offers the first book-length consideration of the theoretical implications, historical impact and cultural consequences of recent popular films that are rapidly changing what it means to make - or to see - a 'French' film today. From English-language action vehicles like *Valerian and the City of a Thousand Planets* (Besson, 2017) to revisionist historical films like *Of Gods and Men* (Beauvois, 2011) and crowd-pleasing comedies like *Intouchables* (Toledano & Nakache, 2011), the variously filiated 'local blockbusters' from contemporary France brim with the seeds of cultural contradiction, but also with the energy of a forceful counter-history

The History and Use of Our Earth's Chemical Elements Robert E. Krebs, 2006-07-30 Understanding the Periodic Table of Chemical Elements is critical for success in the chemistry classroom and laboratory. In today's classroom, students not only need to understand the properties of the chemical elements, but how these elements play such an integral role in industry, the earth and the environment, and in modern life. No resource provides a better introduction than Robert Krebs's *The History and Use of Our Earth's Chemical Elements*. In this thoroughly revised edition, with extensive new examples on the importance of the chemical elements, the elements are examined within their groups, enabling students to make connections between elements of similar structure. In addition, the discovery and history of each element - from those known from ancient times to those created in the modern laboratory - is explained clearly and concisely.
