*Significant Findings from Full-scale Accelerated Pavement Testing* Wynand JvdM. Steyn, 2012 TRB's National Cooperative Highway Research Program (NCHRP) Synthesis 433: Significant Findings from Full-Scale Accelerated Pavement Testing documents and summarizes significant findings from the various experimental activities associated with full-scale accelerated pavement testing (f-sAPT) programs that have taken place between 2000 and 2011. The report also identifies gaps in knowledge related to f-sAPT and where future research may be needed. NCHRP Synthesis 433 is designed to expand the f-sAPT base of knowledge documented in NCHRP Syntheses 325 and 235, both with the same title of Significant Findings from Full-Scale Accelerated Pavement Testing. f-sAPT is the controlled application of a wheel loading, at or above the appropriate legal load limit, to a pavement system to determine pavement response in a compressed time period. The acceleration of damage is achieved by one or more of the following factors: increased repetitions, modified loading conditions, imposed climatic conditions, and thinner pavements with a decreased structural capacity which have shorter design lives--

*Geotechnical Synergy in Buenos Aires 2015* A.O. Sfriso, D. Manzanal, R.J. Rocca, 2015-12-10 In November 2015, Buenos Aires, Argentina became the location of several important events for geo-professionals, with the simultaneous holding of the 15th Pan-American Conference on Soil Mechanics and Geotechnical Engineering (XV PCSMGE), the 8th South American Congress on Rock Mechanics (SCRM) and the 6th International Symposium on Deformation Characteristics of Geomaterials, as well as the 22nd Argentinean Congress of Geotechnical Engineering (CAMSIGXXII). This synergy brought together international experts, researchers, academics, professionals and geo-engineering companies in a unique opportunity to exchange ideas and discuss current and future practices in the areas of soil mechanics and rock mechanics, and their applications in civil, energy, environmental, and mining engineering. This book presents the invited lectures of the 15th Pan-American Conference on Soil Mechanics and Geotechnical Engineering (XV PCSMGE) and the 8th South American Congress on Rock Mechanics (SCRM). Master the Art of Presentations (Collection) Jerry Weissman, 2013-08-19 World-renowned presentation coach Jerry Weissman has spent 20 years helping top executives succeed in the most important business presentations of their lives. Here's what he's learned: the best way to get his message across is to show his techniques in action. In *Presentation in Action*, Weissman does just that: he teaches how to make spectacularly successful presentations by showing exactly how great presenters have done it. Weissman dives into his library of outstanding presentations, sharing examples from current events, politics, science, art, music, literature, cinema, media, sports, and even the military. His compelling examples don't just demonstrate what's universal about effective human communication: they also reveal powerful ways to solve the specific challenges presenters encounter most often. This book's five sections focus on each element of the outstanding contemporary presentation: Content: Mastering the art of telling your story; Graphics: Designing PowerPoint slides that work brilliantly; Delivery skills: How to make actions speak louder than words; Q+A: How to handle tough questions; Integration: How to put it all together. Now, in *Winning Strategies for Power Presentations*, Weissman identifies the elements of a great presentation, distilling 75 best practices from the world's best persuaders into bite-sized chapters designed to be easy-to-read -- and equally easy to apply. Following on the heels of Weissman's best-selling *Presentations in Action*, this book presents powerful new insights into the four key areas of delivering winning presentations: contents, graphics, delivery, and Q-and-A sessions. Throughout, Weissman's compelling case studies range from Jon Stewart to venture capitalist John Doerr, Stephen King to Mark Twain, Franklin Delano Roosevelt to Netflix CEO Reed Hastings. Weissman also includes brand-new advice on a wide spectrum of special presentation issues, ranging from developing a richer public speaking voice to delivering scripted speeches, interviewing like a TV anchorperson to demonstrating products more successfully.

*Natural Resource Extraction and Indigenous Livelihoods* Emma Gilberthorpe, Gavin Hilson, 2016-04-22 This book provides an extended analysis of how resource extraction projects stimulate social, cultural and economic change in indigenous communities. Through a range of case studies, including open cast mining, artisanal mining, logging, deforestation, oil extraction and industrial fishing, the contributors explore the challenges highlighted in global debates on sustainability, Corporate Social Responsibility (CSR), and climate change. The case studies are used to assess whether and how

development processes might compete and conflict with the market objectives of multinational corporations and the organizational and moral principles of indigenous communities. Emphasizing the perspectives of directly-affected parties, the authors identify common patterns in the way in which extraction projects are conceptualized, implemented and perceived. The book provides a deeper understanding of the dynamics of the human environments where resource extraction takes place and its consequent impacts on local livelihoods. Its in-depth case studies underscore the need for increased social accountability in the planning and development of natural resource extraction projects.

**Dust in the Atmosphere of Mars and its Impact on Human Exploration** Joel S. Levine, Russell L. Kerschmann, Daniel Winterhalter, 2018-10-12 A major surprise of the Apollo Moon missions was the deleterious impact of lunar dust on the astronauts, their spacesuits and other equipment, and even inside the Command/Service Module during their return to Earth. Lunar dust permeated everything and impacted mechanical systems. The dust on the Moon's surface was disturbed and became airborne by the routine actions of the astronauts as they walked and performed their exploration of the lunar surface. Over the last decade, as NASA's plans for the human exploration of Mars have developed and matured, a major concern has been the possible negative impacts of Mars surface and atmospheric dust on human health and on the human surface systems and surface operations on the Red Planet. In this book, 41 Mars scientists, mission engineers and planners and medical researchers have reviewed our current understanding and identified the knowledge gaps in a wide range of areas, including the chemical, physical and electrical properties of Mars atmospheric dust; the evolution and occurrence of localized, regional and planetary-scale dust storms; the human health effects of Mars atmospheric dust, including inhalation of and potential toxicity of dust particles; and the impact of Mars atmospheric dust on surface systems and on surface operations, among others.

Optical Fiber Telecommunications VIA Stephen Frisken, Ian Clarke, Simon Poole, 2013-05-03 Liquid crystal is now the dominant technology for flat-screen displays and has been used in telecom systems since the late 1990s. More recently, the adoption of liquid crystals in Wavelength Selective Switches—with the control of light on a pixel-by-pixel basis—has been enabled by developments in Liquid Crystal on Silicon (LCoS) backplane

technologies derived from projection displays. This chapter outlines the operating principles of LCoS in existing wavelength-switching applications and describes the broad scope of new opportunities that are arising from the intrinsic performance and flexibility of LCoS as a switching medium.

**Alternative Energy Sources for Green Chemistry** Georgios Stefanidis, Andrzej Stankiewicz, 2016 Discussing the broad impact of alternative energy transfer technologies on reactions, separations and materials synthesis, for industrialists, academics and postgraduates in alternative-energy based processing.

**Our Energy Future** Don E. Albrecht, 2014-07-25 Rapid changes in energy production and consumption are having major socioeconomic implications for the communities of rural America. Technological developments in horizontal drilling, hydraulic fracturing (fracking) nuclear energy, biofuels, wind and solar energy have significantly increased domestic energy production and the production of energy from renewable sources has encouraged energy efficiency. Yet, severe concerns persist and policy decisions on energy issues will have profound implications for all Americans and rural communities where consequences are experienced most directly. Thus, the time is appropriate for a careful exploration of the socioeconomic implications of our energy future. The purpose of this book is to present timely and scientifically sound information on energy policy, socioeconomic aspects of energy production and consumption with a focus on rural areas. The book presents the latest research by top scholars with the goal of clarifying options and providing the basis for informed policy decisions.
