**Taxation Trends in the European Union**, 2014 The 2014 edition of Taxation Trends in the European Union is the eighth issue of the report in its current form. The objective of the report remains unchanged: to present a complete view of the structure, level and trends of taxation in the Union over a medium- to long-term period. Taxation is at the heart of citizens' relationship with the State. It is not only government experts and academics, but also many citizens that ask the European Commission questions about tax levels in the EU and on how Member States compare with each other; this report, published annually, is one way of answering them. Much work has gone into making sure that the data it contains are accurate and comparable across countries.

The methodology to ensure this was developed jointly by statisticians from Eurostat and economists from the Directorate-General for Taxation and the Customs Union, who have drafted the report. In addition, experts from national Statistical Offices and from the Ministries of Finance of all countries covered have actively contributed by supplying data and comments; we would like to express our thanks for their valuable suggestions and help. The report provides data and analysis for the European Semester, as the proper functioning of tax systems is a key prerequisite for economic growth. The data on the tax burden in the various Member States can thus be used as an input for the formulation of the Country-Specific Recommendations on tax reforms that are announced at the end of the European Semester. In addition to the analysis of Europe-wide trends in Part I, the report also includes a Part II with Country Chapters, covering each EU Member State plus Iceland and Norway. The Country Chapters contain a discussion of tax revenue trends, as well as a description of the main characteristics of each country's tax system. -- EU Bookshop.

**Klaus Vogel on Double Taxation Conventions** Ekkehart Reimert, Alexander Rust, 2022-01-18  
Klaus Vogel on Double Taxation Conventions is regarded as the international gold standard on the law of tax treaties. This article-by-article commentary has been completely revised and updated to give you a full and current account of double tax conventions (DTCs). DTCs form the backbone of international taxation, but they raise many interpretational questions. This market leading work will provide you with the answers. Based on the OECD/G20 Multilateral Instrument, the OECD MC and Commentary published in 2017 and the most recent amendments to the UN MC, the book also includes relevant case law and scholarly literature up to and including 2020. Previous editions of the Vogel have been routinely relied on by courts around the world including Australia, Canada, Germany, India, South Africa, the Netherlands and United Kingdom. What's new in this edition? There have been many important developments in this area since the last edition in 2015. The authors discuss these developments and the effect they will have upon practitioners working in this area. They also provide a wealth of new and revised case law, along with the DTCs of emerging countries. You'll find: Reports about major

features in the DTC practice of many leading jurisdictions, such as: the DTC practice of Austria, Canada, France, Germany, India, the Netherlands, Switzerland, the UK and the US Sections on divergent country practice covering their national models and networks of bilateral DTCs Thorough analysis of the OECD and UN model, as well as the implementation of these models in practice Amendments of bilateral DTCs, textual or in substance, on the basis of the 2017 Anti-BEPS Multilateral Instrument Coverage of a full range of the latest tax treaties around the world, including important treaties between OECD and BRICS countries This new Fifth Edition of Klaus Vogel on Double Taxation Conventions continues to reflect the unchallenged role of the OECD. The OECD MC, accompanied by the official Commentary, guidelines, reports and other recommendations, has sustained its position as the most important legal instrument in the area of DTCs. On occasion, the UN MC and Commentary diverge from the OECD texts. When this happens, the authors deal with the specifics of the UN MC in separate annotations and analyses, explaining and making sure you understand the differences. The Barcelona School of Ecological Economics and Political Ecology Sergio Villamayor-Tomas,Roldan Muradian,2023-02-28 In this open access book, ecological economics and political ecology traditions converge into a single academic school. The book constitutes a common ground where multiple and critical voices are expressed, covering a broad scope of urgent matters at the crossroad between society, economy and the natural environment. The manuscripts composing this compendium offer appealing material for both experienced and younger researchers interested in interdisciplinary exchanges in the field of the social environmental sciences. It combines historical accounts with recent theoretical and empirical developments revolving around the interaction between three foundational notions of the Barcelona School: social metabolism, environmental justice and self-reflective science.

Spain International Monetary Fund. European Dept.,2018-11-21 Spain's economy has continued to grow strongly, reflecting its improved fundamentals. However, especially the young generation still faces daunting economic challenges. In the meantime, several downside risks are clouding

the medium-term outlook. Externally, they comprise sudden changes in investors' global risk appetite, escalating global protectionism, and weakening conditions in emerging economies. Domestically, they include pressure to reverse reforms, continued procyclical fiscal policy, and prolonged uncertainty related to Catalonia. These could hurt the economy particularly in an environment of high public debt and structural unemployment as well as sluggish productivity growth, which is set to slow Spain's income convergence.

Taxation and Migration Reuven S. Avi-Yonah, Joel Slemrod, 2015-08-21 Migration has become an increasingly important phenomenon for societies, especially given its highly controversial political dimension. The complexity of the migrant integration process and its many varieties present challenges to policymakers who need high-quality information on which to base decisions. Nowhere is this necessity more pressing than in the development of relevant tax rules that meet the basic requirements of efficiency and equity. Moreover, the ascent of the so-called emerging economies coupled with the stagnation of the richest economies of the world implies reform of the current competition-based international tax regime and the adoption of a more cooperative paradigm. This important and timely book, for the first time in such depth, explores such aspects of the problem as the following: - migration for tax reasons, especially corporate inversions (change in corporate residence for tax purposes); - tax consequences related to individuals who receive free or subsidized education in one country and profit from it in another; - taxing cross-border retirement income; and - migration-related aspects of tax preferential treatment of the elderly. With particular emphasis on the effects and opportunities created by the changing international tax regime - and with attention to the role of tax treaties and recent court cases - chapters by well known tax experts present evidence on the consequences of migration in all its facets and simulate the effects of several

recently enacted and proposed changes in tax law in European countries, the United States, and other jurisdictions. The grounded propositions and recommendations offered in this deeply informed book will allow policymakers to draft tax-residence rules that minimize distortion and promote fairness. The book will also be of interest to tax law practitioners and other tax specialists, migration experts, and academics investigating one of the crucial political issues of our time.

**Public Policy to Reduce Inequalities Across Europe** Paul Cairney, Michael Keating, Sean Kippin, Emily St Denny, 2022-08-25  
This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. There is a broad consensus across European states and the EU that social and economic inequality is a problem that needs to be addressed. Yet inequality policy is notoriously complex and contested. This book approaches the issue from two linked perspectives. First, a focus on functional requirements highlights what policymakers think they need to deliver policy successfully, and the gap between their requirements and reality. We identify this gap in relation to the theory and practice of policy learning, and to multiple sectors, to show how it manifests in health, education, and gender equity policies. Second, a focus on territorial politics highlights how the problem is interpreted at different scales, subject to competing demands to take responsibility. This contestation and spread of responsibilities contributes to different policy approaches across spatial scales. We conclude that governments promote many separate equity initiatives, across territories and sectors, without knowing if they are complementary or contradictory. This outcome could reflect the fact that ambiguous policy problems and complex policymaking processes are beyond the full knowledge or control of governments. It could also be part of a strategy to make a rhetorically radical case while knowing

that they will translate into safer policies. It allows them to replace debates on values, regarding whose definition of equity matters and which inequalities to tolerate, with more technical discussions of policy processes. Governments may be offering new perspectives on spatial justice or new ways to reduce political attention to inequalities.

**Taxation in Crisis** Dimitrios D. Thomakos, Konstantinos I. Nikolopoulos, 2017-10-28 This book offers a comprehensive guide to modern day taxation issues. It presents a thorough overview of many of the crucial aspects of applied taxation and current tax systems, and presents evidence that supports taxation as an important policy issue requiring immediate address globally. Contributions seek to address the core question of how to design a tax policy mix that can serve primarily efficiency, growth and possibly equity goals at a time where fiscal spending, for many economies, is not a viable option. Chapters provide a historical perspective on taxation, then go on to cover aspects of the modern theory of optimal taxation and tax design and provide valuable international perspectives on current tax practices and much required tax reforms. Empirical analysis on taxation and related economic data help the readers to understand how data-based observations and results are linked to the theory of taxation, and more importantly economic growth, before offering appropriate policy prescriptions. This book will be of interest to scholars and practitioners interested in learning more about taxation and why it matters today in the global economy.

*CJEU - Recent Developments in Direct Taxation 2021* Georg Kofler, Michael Lang, Pasquale Pistone, Alexander Rust, Josef Schuch, Karoline Spies, Claus Staringer, Alfred Storck, 2022-08-30  
CJEU - The most important cases in the field of direct taxation A great number of cases pending before the European Court of Justice (CJEU) concern the fundamental freedoms and state aid in respect of direct taxation. In particular, the number of infringement procedures brought before the CJEU by the European Commission has been increasing year on year. The CJEU is a driving force in the field of direct tax harmonization. All judgments and pending cases, therefore, have to be carefully analysed by academics as well as practitioners. This book discusses the most important cases in the field of direct taxation pending before or recently decided by the CJEU. Moreover, the national background of these cases is discussed and possible infringements of the fundamental freedoms and state aid rules are analysed. The analyses are presented by esteemed national and European tax law experts. The authors focus on the preliminary questions submitted to the CJEU by the national courts and the CJEU case law which could be of relevance for driving future judgments. This book goes to the heart of the national tax systems, exposing hidden obstacles to the fundamental freedoms.
