Handbook of Child and Adolescent Group Therapy Craig Haen, Seth

Aronson,2016-10-14 This handbook describes in detail different contemporary approaches to group work with children and adolescents. Further, this volume illustrates the application of these models to work with the youth of today, whether victims of trauma, adolescents struggling with LGBT issues, or youth with varying common diagnoses such as autism spectrum disorders, depression, and anxiety. It offers chapters presenting a variety of clinical approaches written by experts in these approaches, from classic (play therapy and dialectical behavior therapy) to cutting-edge (attachment-based intervention, mindfulness, and sensorimotor psychotherapy). Because of its broad scope, the book is suitable for a wide audience, from students to first-time group leaders to seasoned practitioners.

Encyclopedia Latina Ilan Stavans, Harold Augenbraum,2005 In its four volumes, 650 entries, 2000 pages and 1.2 million words, Encyclopedia Latina explores every aspect of Latino life in America from a myriad of perspectives, spanning the arts, media, cuisine, government and politics, science and technology, business, health, and sports, among others. While the collection represents an important cultural point of reference and source of pride for Latino youth, it will also serve the interests of an increasingly diverse American population who can all relate to the themes and stories included in this resource.

Archaeology of East Asia Gina L. Barnes,2015-10-31 Archaeology of East Asia constitutes an introduction to social and political development from the Palaeolithic to 8th-century early historic times. It takes a regional view across China, Korea, Japan and their peripheries that is unbounded by modern state lines. This viewpoint emphasizes how the region drew on indigenous developments and exterior stimuli to produce agricultural technologies, craft production, political systems, religious outlooks and philosophies that characterize the civilization of historic and even modern East Asia. This book is a complete rewrite and update of *The Rise of Civilization in East Asia*, first published in 1993. It incorporates the many theoretical, technical and factual advances of the last two decades, including DNA, gender, and isotope studies, AMS radiocarbon dating and extensive excavation results. Readers of that first edition will find the same structure and topic progression. While many line drawings have been retained, new color illustrations abound. Boxes and Appendices clarify and add to the understanding of unfamiliar technologies. For those seeking more detail, the Appendices also provide case studies that take intimate looks at particular data and current research. The book is suitable for general readers, East Asian historians and students, archaeology students and professionals. Praise for *The Rise of Civilization in East Asia*: "... the best English introduction to the archaeology of East Asia ... brilliantly integrates the three areas into a broad regional context." Management of Accessibility for Handicapped Students in Higher Education

United States. Department of Education, National Association of College and University Business Officers,1981 This compendium of four mini-projects carried out by a special task force of the National Association of College and University Business Officers (NACUBO) addresses policy and management issues related to providing accessibility to handicapped students in higher

education. Topics range from executive policy decisions on compliance with federal accessibility mandates to operational procedures for responding to specific accommodation requests. The compendium is comprised of four sections: Section 1 was developed from a series of site-visit interviews with senior-level decision makers, faculty, staff and handicapped students at six colleges and universities. It contains an overview of accessibility issues and problems that require attention, a discussion of how accessibility considerations can be incorporated into a planning and budgeting process, and a set of guidelines for assessing specific accommodation requests; Section 2 reviews 16 national data bases that describe the handicapped population in the United States and contains summary charts of the characteristics revealed. Section 3 describes the results of a survey that NACUBO mailed to a stratified sample of 944 of its member institutions concerning trends in accessibility expenditures and number and types of handicapped students served; and Section 4 lists adaptive education equipment by impairment (such as hearing or mobility) and then by function (such as writing or speaking). The document contains an index, equipment source list, and lists of information resources and services available to handicapped students. (GLR)

Storytelling in the Modern Board Game Marco Arnaudo,2018-08-28 Over the years, board games have evolved to include relatable characters, vivid settings and compelling, intricate plotlines. In turn, players have become more emotionally involved--taking on, in essence, the role of coauthors in an interactive narrative. Through the lens of game studies and narratology--traditional storytelling concepts applied to the gaming world--this book explores the synergy of board games, designers and players in story-oriented

designs. The author provides development guidance for game designers and recommends games to explore for hobby players.
