If Animals Said I Love You Ann Whitford Paul,2017-10-17 This companion to the successful *If Animals Kissed Good Night* (over 200,000 copies sold) imagines how animals would say I love you. If animals said I love you like we do...how would they say it? Whale would make bubbles shoot from her spout. Boa would give her hatchlings a hug. Gorilla would snuggle his child to sleep. And across the animal kingdom, every creature would show love in a special way. Ann Whitford Paul and David Walker are back with *If Animals Said I Love You*, a sweet imagining of love in the animal world.

Feeling & Knowing Antonio Damasio,2021-10-26 From one of the world's leading neuroscientists: a succinct, illuminating, wholly engaging investigation of how biology, neuroscience, psychology, and artificial intelligence have given us the tools to unlock the mysteries of human consciousness "One thrilling insight after another ... Damasio has succeeded brilliantly in narrowing the gap between body and mind." —The New York Times Book Review In recent decades, many philosophers and cognitive scientists have declared the problem of consciousness unsolvable, but Antonio Damasio is convinced that recent findings across multiple scientific disciplines have given us a way to understand consciousness and its significance for human life. In the forty-eight brief chapters of *Feeling & Knowing*, and in writing that remains faithful to our intuitive sense of what feeling and experiencing are about, Damasio helps us understand why being conscious is not the same as sensing, why nervous systems are essential for the development of feelings, and why feeling opens the way to consciousness writ large. He combines the latest discoveries in various sciences with philosophy and discusses his original research, which has transformed our understanding of the brain and human behavior. Here is an indispensable guide to understanding how we experience the world within and around us and find our place in the universe.

LEO the Maker Prince Carla Diana, 2013-12-02 LEO the Maker Prince teaches children (both young and old) about 3D printing by following Carla and LEO's journey through Brooklyn. LEO is a walking, talking robot who has the magical ability to print (in plastic) any object that Carla draws. The other robots have their own special capabilities: H1-H0 prints in metal, Sinclair-10 can find and print objects from a huge catalog of designs, and the others (including AL1C3-D, IRIS-7, and NiXie) have unique talents, too. Readers can come along for the journey, too: all of the objects in the book are printable one way or another.
