Assistive and Rehabilitation Engineering Yves Rybarczyk,2019-12-04 Rehabilitation enables people with sensorimotor and cognitive disabilities to regain functions and autonomy. However, over the past few years, there has been a reduction in healthcare providers to assist patients. Fortunately, this decline has been accompanied by an increase in technological applications to support health systems. This new paradigm brings promising perspectives but raises questions regarding the therapy assisted by computers. To address these issues, this book intends to clarify the multidisciplinary aspects of medical engineering. The volume covers studies on the technical challenges in and barriers to the development of efficient rehabilitation and assistive technologies. It also provides a comprehensive approach to the recent advances in tele-health as a complementary medium to support the recovery process and to enhance patients' empowerment.

Seismic Engineering Jacques Betbeder-Matibet,2010-01-05 This title offers a comprehensive coverage of the many facets of seismic engineering. The first half of the book is devoted to seismic phenomena and hazards, detailing the causes of earthquakes, the parameters used to characterize earthquakes, strong ground motions, seismic hazards and their evaluation, and seismic action. The second half discusses the effects of earthquakes and tools used to assess and reduce risk, including the effects of vibratory motions and induced phenomena, seismic calculations and technical aspects of prevention. The importance of keeping orders of magnitude in mind (i.e. through reasoning or very simple equations) when discussing seismic phenomena and their effects is emphasized, a task which most people overlook because of their rarity and the brevity of their manifestations.

Evaluation of Novel Approaches to Software Engineering Joaquim Filipe,Leszek A. Maciaszek,2013-12-20 This book constitutes the thoroughly refereed proceedings of the 8th International Conference on Evaluation of Novel Approaches to Software Engineering, ENASE 2013, held in Angers, France, in July 2013. The 18 full papers presented were carefully reviewed and selected from 46 submissions. The papers reflect a growing effort to increase the dissemination of new results among researchers and professionals related to evaluation of novel approaches to software engineering. By comparing novel approaches with established traditional practices and by evaluating them against software quality criteria, the ENASE conferences advance knowledge and research in software engineering, identify most hopeful trends, and propose new directions for consideration by researchers and practitioners involved in large-scale software development and integration.

Avatar Creation and Customization for Health Games Cheng Chen,2014 Creating 3D avatars that realistically depict a user is very difficult and time consuming. Most 3D avatars are created manually by artists, and personalization options are few. Because 3D scan is an emerging technology, most 3D scanners are very expensive. This thesis presents a three-tiered system that 1) easily generates a 3D Scan model of a person with a multiple-Kinect system which is much cheaper than most scanners, 2) processes the scanned model using a Maya® Plug-in called Scanned Model Customization (SMC), and 3) controls the avatar with physical motion in 3D games. The multiple-Kinect system scans a real person, generates a basic 3D model, and exports the model to Maya®. Meshes and texture are generated form data captured by Kinect. Alignment and finalization methods are used to create the model. This system also includes the SMC Maya Plug-in. With the aid of SMC, a user can customize his/her scanned 3D model. The SMC provides multiple customization options to improve the scanned model and connect with game engines. The avatar is finally controlled with a Kinect-driven character controller in active 3D games. The game is youth-oriented and immersive, with the player live body actions controlling the fate of an avatar in a virtual world.

Innovative Trends in Personalized Software Engineering and Information Systems C. Troussas,C.
