**Ballerina Theater** Anna Brett,2017-02 Kids can build scenes from favorite ballets, including Romeo and Juliet, Swan Lake, and The Nutcracker. They can create a scene from each ballet with these stackable, die-cut cards. Twenty-four double-sided, press-out card sheets allow kids to mix and match many different card combinations to create their very own scenes.

### **Dance Data, Cognition, and Multimodal**

**Communication** Carla Fernandes,Vito Evola,Cláudia Ribeiro,2022-09-08 Dance Data, Cognition, and Multimodal Communication is the result of a collaborative and transdisciplinary effort towards a first definition of dance data, with its complexities and contradictions, in a time where cognitive science is growing in parallel to the need of a renewed awareness of the body's agency in our manifold interactions with the world. It is a reflection on the observation of bodily movements in artistic settings, and one that views human social interactions, multimodal communication, and cognitive processes through a different lens—that of the close collaboration between performing artists, designers, and scholars. This collection focuses simultaneously on methods and technologies for creating, documenting, or representing dance data. The editors highlight works focusing on the dancers' embodied minds,

including research using neural, cognitive, behavioural, and linguistic data in the context of dance composition processes. Each chapter deals with dance data from an interdisciplinary perspective, presenting theoretical and methodological discussions emerging from empirical studies, as well as more experimental ones. The book, which includes digital Support Material on the volume's Routledge website, will be of great interest to students and scholars in contemporary dance, neuro-cognitive science, intangible cultural heritage, performing arts, cognitive linguistics, embodiment, design, new media, and creativity studies.

Auer, Thrasyvoulos Tsiatsos, 2019-02-28 This book offers the latest research and new perspectives on Interactive Collaborative Learning and Engineering Pedagogy. We are currently witnessing a significant transformation in education, and in order to face today's real-world challenges, higher education has to find innovative ways to quickly respond to these new needs. Since being founded in 1998, the conference has been devoted to new approaches in learning, with a special focus on collaborative learning. Today the ICL conferences offer a forum for exchanging information on relevant trends and research results, as well as sharing practical experiences in learning and engineering

pedagogy. This book includes papers in the fields of: \* New Learning Models and Applications \* Pilot Projects: Applications \* Project-based Learning \* Real-world Experiences \* Remote and Virtual Laboratories \* Research in Engineering Pedagogy \* Technical Teacher Training It will benefit a broad readership, including policymakers, educators, researchers in pedagogy and learning theory, school teachers, the learning industry, further education lecturers, etc.

**Exploring 3D** Adrian Pennington, Carolyn

Giardina, 2013-03-12 The vanguard of the 3D film and TV industry explains why 3D stereo techniques should become a staple visual storytelling tool, on par with lighting, set design, or sound. Words of wisdom from Jeffrey Katzenberg, Martin Scorsese, Dean DeBlois, Baz Luhrmann, Jon Landau, Barrie M. Osborne, Wim Wenders, and more, provide you with unparalleled insight into the leading minds in 3D. Not only is effective use of 3D in movies thoroughly covered, but also included is a chapter on live events, with insight from the people bringing us the FIFA World Cup in 3D, and those pushing the boundaries of 3D TV documentaries. Including full-color imagery from many of your favorite 3D films released thus far, *Exploring 3D* provides a window into how those dazzling movies were created, and insight into what the future may hold.

**Dance's Duet with the Camera** Telory D.

Arendell, Ruth Barnes, 2016-06-24 *Dance's Duet with the Camera: Motion Pictures* is a collection of essays written by various authors on the relationship between live dance and film. Chapters cover a range of topics that explore dance film, contemporary dance with film on stage, dance as an ideal medium to be captured by 3D images and videodance as kin to site-specific choreography. This book explores the ways in which early practitioners such as Loïe Fuller and

Maya Deren began a conversation between media that has continued to evolve and yet still retains certain unanswered questions. Methodology for this conversation includes dance historical approaches as well as mechanical considerations. The camera is a partner, a disembodied portion of self that looks in order to reflect on, to mirror, or to presage movement. This conversation includes issues of sexuality, race, and mixed ability. Bodies and lenses share equal billing.
