The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled *The Last Lecture*. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—*Really Achieving Your Childhood Dreams*—wasn't about dying. It was about the importance of

overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Riding the Tiger John Seidensticker, Peter Jackson, Sarah Christie, 1999-02-08 Beauty, grace and power make the tiger one of the world's most loved animals, yet it is precisely these qualities that have been its downfall. Poaching for skins and body parts, loss of habitat and prey and conflicts between people and wild tigers have caused catastrophic declines in tiger numbers

throughout their range. If wild tigers are to survive through the next century, we must act now. *Riding the Tiger* is a comprehensive, scientific and eminently readable account of the problems and possible solutions of securing a future for wild tigers. Lavishly illustrated in full colour, it is written by leading conservationists working throughout Asia. It is a vital information resource for tiger conservationists in the field, necessary reading for serious students of carnivore conservation and conservation biologists in general, and an accessible overview of tiger conservation for general readers.

Interlocking and 3D Paper Airplanes Teong Hin Tan,2005-02-09 This book contains instructions and diagrams for you to fold sixteen interlocking and 3D paper airplanes. Eight of these airplanes have enclosed three-dimensional fuselage, with a hollow cavity, similar to real airplanes. These paper airplane designs and their folding concepts are all originals. They are probably amongst the most elegant and sophisticated paper airplanes you have ever seen. Each of these Interlocking and 3D paper airplanes is made from an ordinary sheet of 8.5 x 11 paper, without any cutting or gluing. Using the breakthrough interlocking fold, wing fold and fuselage fold, you will be amazed at how an

ordinary sheet of paper can be transformed into a tightly bound paper airplane with beautiful, and seemingly impossible, three-dimensional fuselage. These airplanes are also great gliders because of their streamlined shapes. It is very likely that you will find great joy in folding and flying these very special and unique interlocking and 3D paper airplanes.
