Jellyfish Lisa-ann Gershwin,2016-06-07 An introduction to these bizarre and beautiful creatures of the sea, filled with color photos and illustrations: “Fascinating.”—Boing Boing Jellyfish are the oldest multi-organelled life form on the planet, having inhabited the ocean for more than five hundred million years. With their undulating umbrella-shaped bells and sprawling tentacles, they are compelling and gorgeous, strange and dangerous. In many places they're also vastly increasing in number, and these population blooms may be an ominous indicator of the rising temperatures and toxicity of the oceans. Jellyfish presents these aquarium favorites in all their glory. Fifty unique species, from the purple people eater to black sea nettles, are presented in stunning photos along with the most current scientific information on their anatomy, history, distribution, position in the water, and environmental status. Foremost jellyfish expert Lisa-ann Gershwin provides an insightful look at the natural history and biology of each of these spellbinding creatures, plus a timely take on their place in the rapidly changing and deteriorating condition of the oceans. Learn about immortal jellyfish who live and die and live again—as well as those who camouflage themselves amid sea grasses and shells, hiding in plain sight. Discover the jellyfish that's the world's most venomous animal, and the jellyfish that helped scientists win the Nobel Prize. They're all here and more in this delightful volume. “A thorough coverage of jellyfish history, biology and ecology. Gershwin, a marine biologist who has discovered over 200 new species of jellyfish, does an excellent job of combining a compelling narrative of 50 different jellyfish with luscious, I-can't-believe-they're-real photos.”—Boing Boing

You might almost forget to just sit down and write down your thoughts, your list of things, draw or doodle whatever is on your mind. Many people talk about mindfulness, conscious living, but getting this notebook and taking time to write or draw helps to get some rest, to get grounded, to pace yourself. Creativity and Inspiration Writing by hand will increase your creativity. It helps you focus your energy and support your flow. Whether you are structuring strategic plans,

organising your day, writing your next book, or jotting down your thoughts as a reminder, writing it down makes your creative juices flow. More and better ideas. Quicker and easier. Organising and Memorising Writing down your goals, actions and achievements helps to accomplish more, and to feel proud and successful of what you have achieved. Feeling better. Besides, it has been scientifically proved that writing things down will increase your memory. Last but not least, writing down your experiences and reflections will help to process and manage emotions, and support self-improvement. Or just for yourself, as a daily journal, travel journal, doodle diary, school workbook, grocery lists, to collect poems or recipes, writing stories. And so much more...

In addition to the main entries and reviews, a full-color gallery provides a visual timeline of gaming through the decades, and several appendices help to place nearly 3,000 games in context. Appendices include: a chronology of gaming software and hardware, a list of game designers showing their main titles, results of annual video game awards, notes on sourcing video games, and a glossary of gaming terms.

Fun with Stuff Bruce A. Smith,2009-12-17 Fun with Stuff is a collection of humor columns, many of which first appeared in a Southern California Mensa publication. But don't be frightened; they're not all that intellectual. Hardly. Instead, these are true life stories and exaggerated fabrications that everyone can relate to. Laugh along as Bruce Smith relates tales detailing: A comedy of errors as Bruce and his wife make an attempt to travel in an RV. The origins of the saying, your hair looks like a cat sucked on it. How you simply can't trust the drink sizes at fast food restaurants. How the phone company wrongly accused the author of calling porn numbers in Africa. A workshop where anyone (well, almost anyone) can learn to write a joke. Enjoy these and other classic columns, regaled by people who wish to remain anonymous as hilarious, mind-bogglingly funny, as well as disorienting and bizarre. What are laughing at? people will ask you. Fun with Stuff, you'll answer. Bruce Smith is a comedy genius. You should buy it. Really. I'm not kidding. Like right now.

Games, Rhymes, and Wordplay of London Children N. G. N. Kelsey,2019-02-26 This book presents a unique annotated collection of some 2000 playground games, rhymes, and wordplay of London children. It charts continuity and development in childlore at a time of major social and cultural change and offers a detailed snapshot of changes in the traditions and language of young people. Topics include: starting a game; counting-out rhymes; games (without songs); singing and chanting games; clapping, skipping, and ball bouncing games; school rhymes and parodies; teasing and taunting; traditional belief and practice; traditional wordplay; and a concluding miscellany. Recorded mainly in the 1980s by primary schoolteacher Nigel Kelsey, transcribed verbatim from the children's own words, and accompanied by extensive commentaries and annotation, the book sets a wealth of new information in the wider historical and contemporary context of existing studies in Britain, Ireland, and other parts of the English-speaking world. This valuable new resource will open new avenues for research and be of particular interest to folklorists and linguists, as well as to those working across the full spectrum of social, cultural, and educational studies.

Pangu's Shadow Karen Bao,2024-02-06 There are no second chances in the Pangu Star System. Ver and Aryl, apprentices at the most prestigious biology lab among the system's moons, know this better than anyone. They've left behind difficult pasts and pinned their hopes for the future on Cal, their brilliant but demanding boss. But one night while working late in the lab, they find Cal sprawled on the floor, dead. Murdered. And they immediately become the prime suspects. Their motives seem obvious. Ver, who left her home moon to study the life-threatening disease wracking her body, had a hopeless attachment to Cal that could've become twisted by jealousy. Aryl, on the other hand, clashed with workaholic Cal because she valued more in her life than research. To clear their names, Ver and Aryl put aside their mutual suspicion and team up to investigate Cal's death. As they search for the real murderer, they uncover secrets that have shaped all of Pangu's moons... and must decide what kind of future they really want.
