The Old Dragon's Head Justin Newland,2018-10-02 Constructed of stone and packed earth, the Great Wall of 10,000 li protects China's northern borders from the threat of Mongol incursion. The wall is also home to a supernatural beast: the Old Dragon. The Old Dragon's Head is the most easterly point of the wall, where it finally meets the sea. In every era, a Dragon Master is born. Endowed with the powers of Heaven, only he can summon the Old Dragon so long as he possess the dragon pearl. It's the year 1400, and neither the Old Dragon, the dragon pearl, nor the Dragon Master, has been seen for twenty years. Bolin, a young man working on the Old Dragon's Head, suffers visions of ghosts. Folk believe he has yin-yang eyes and other paranormal gifts. When Bolin's fief lord, the Prince of Yan, rebels against his nephew, the Jianwen Emperor, a bitter war of succession ensues in which the Mongols hold the balance of power. While the victor might win the battle on earth, China's Dragon Throne can only be earned with a Mandate from Heaven – and the support of the Old Dragon. Bolin embarks on a journey of self-discovery, mirroring Old China's endeavour to come of age. When Bolin accepts his destiny as the Dragon Master, Heaven sends a third coming of age – for humanity itself. But are any of them ready for what is rising in the east?

Armed only with your trusty pencil and ink pen, you will begin your artistic quest by conquering a super-easy dragon that even the densest of wyvern could draw. With pace quickened by this cool achievement, you shall forge bravely onward to discover simple secrets and spiffy tricks for making your creature friendly or fierce, sorrowful or cynical—drawing them from all different perspectives, in flight or at rest (so vain, those dragons—they love to strike a pose!) and incorporating various styles of heads, limbs, wings, horns, frills, scales, tails and other details to make your particular beast original, believable and so darn groovy. Because dragons enjoy having others around to terrorize, disembowel and occasionally hang out with, this book will also teach you how you to populate your alternate universe with a whole cast of fantastic creatures, including mythical griffins, guardian gargoyles and deadly basilisks. All this within the curiously compelling, beautifully beastly, and brightly colored pages you hold in your hands, which by now are no doubt trembling with keen anticipation. So quit dragon your feet! Case Studies in Forensic Anthropology Heather M. Garvin,Natalie R. Langley,2019-10-16 Through a set of unique case studies written by an international group of practicing forensic anthropologists, Case Studies in Forensic Anthropology: Bonified Skeletons prepares students and professionals for the diverse range of cases and challenges they will encounter in the field. Every forensic anthropology case is unique. Practitioners routinely face new challenges and unexpected outcomes. Courses and introductory texts generally address standard or ideal cases. In practice, however, forensic anthropologists must improvise frequently during forensic archaeological recoveries and laboratory analyses based on case circumstances. Most forensic anthropologists have encountered unconventional cases with surprising results. While these cases act as continuing education for practitioners—better preparing them for future encounters— such learning opportunities may be limited by the extent of personal experiences. This text exposes practitioners and students to a diverse array of case examples they may not otherwise encounter, sharing experiential knowledge and contributing to the advancement the field. Case Studies in Forensic Anthropology aims to both prepare aspiring forensic anthropologists and inform current practitioners. The cases are interesting and unique, detailing how specific challenges contribute to the body of forensic anthropological knowledge and practice. Key Features Full-color photographs illustrate the scenes and skeletal features Lessons Learned sections for each case study emphasize take-away points Thought-provoking Discussion Questions encourage readers to think critically and facilitate group discussions Actual case experiences by diverse array of forensic anthropologists who discuss innovative methods and unique challenges

**Furry Logic** Matin Durrani,Liz Kalaugher,2016-10-06 The animal world is full of mysteries. Why do dogs slurp from their drinking bowls while cats lap up water with a delicate flick of the tongue? How does a tiny turtle hatchling from Florida circle the entire northern Atlantic before returning to the very beach where it hatched? And how can a Komodo dragon kill a water buffalo with a bite only as strong as a domestic cat's? These puzzles – and many more besides – are all explained by physics. From heat and light to electricity and magnetism, Furry Logic unveils the ways that more than 30 animals exploit physics to eat, drink, mate and dodge death in their daily battle for survival. Along the way, science journalists Matin Durrani and Liz Kalaugher introduce the great physicists whose discoveries helped us understand the animal world, as well as the animal experts of today who are scouring the planet to find and study the animals that seem to push the laws of physics to the limit. Presenting mind-bending physics principles in a simple and engaging way, Furry Logic will appeal both to animal lovers and to those curious to see how physics crops up in the natural world. It's more of a 'howdunit' than a whodunit, though you're unlikely to guess some of the answers.
