Eliseo Subiela in Life and Cinema Nancy J. Membrez, 2022-02-25 Audiences never have a lukewarm opinion of a Subiela film. They either love it passionately or hate it profoundly. That Eliseo Subiela (Buenos Aires, 1944-2016), an original and sensitive thinker, survived, and indeed thrived in economically challenged Argentina while garnering more accolades abroad than in his own country, is a tribute to his grit, intelligence, imagination and persistence of vision. With an astounding list of prizes and honors, he was a world-class auteur. Even when he was making a TV commercial, his surreal style and poetic sensibility were unmistakable. This book represents the culmination of 20 years of research and personal correspondence with Eliseo Subiela. Through ten scholarly studies and five interviews, it sheds light on his life, esthetics, obsessions, struggles with madness, and, of course, his films. It addresses his earlier career in advertising, lifelong artistic influences, screenwriting techniques, critical reactions to his films, and what Subiela's example has to offer aspiring filmmakers, especially those in Latin America.

A History of Three-Dimensional Cinema David A. Cook, 2021-09-14 A History of Three-Dimensional Cinema chronicles 3-D cinema as a single, continuous and coherent medium, proceeding from 19th-century experiments in stereoscopic

photography and lantern projection (1839–1892) to stereoscopic cinema’s “long novelty period” (1893–1952). It proceeds to examine the first Hollywood boom in anaglyphic stereo (1953–1955), when the mainstream industry produced 69 features in 3-D, mostly action films that could exploit the depth illusion, but also a handful of big-budget films—for example, *Kiss Me Kate* (George Sidney, 1953) and *Dial M for Murder* (Alfred Hitchcock, 1954)—until audiences tired of the process; the anaglyphic revival of 1970–1985, when 3-D was sustained as a novelty feature in sensational genres like soft-core pornography and horror; the age of IMAX 3-D (1986–2008); the current era of digital 3-D cinema, which began in 2009 when James Cameron’s *Avatar* became the highest-grossing feature of all time and the studios once again stampeded into 3-D production; and finally the future promise of Virtual Reality.
