Ontologies of Rock Art Oscar Moro Abadía,Martin Porr,2021-03-03 Ontologies of Rock Art is the first publication to explore a wide range of ontological approaches to rock art interpretation, constituting the basis for groundbreaking studies on Indigenous knowledges, relational metaphysics, and rock imageries. The book contributes to the growing body of research on the ontology of images by focusing on five main topics: ontology as a theoretical framework; the development of new concepts and methods for an ontological approach to rock art; the examination of the relationships between ontology, images, and Indigenous knowledges; the development of relational models for the analysis of rock images; and the impact of ontological approaches on different rock art traditions across the world. In the context of an increasing interest in Indigenous ontologies, the volume will also be of interest to scholars in Indigenous studies. Voices in Aerosol Caitlin Frances Bruce,2024-01-09 How a city government in central Mexico evolved from waging war on graffiti in the early 2000s to sanctioning its creation a decade later, and how youth navigated these changing conditions for producing art. The local government, residents, and media outlets in León, Mexico, treated graffiti as a disease until the state began sponsoring artistic graffiti through a program of its own. In Voices in Aerosol, the first book-length study of state-sponsored graffiti, Caitlin Frances Bruce considers the changing perceptions and recognition of graffiti artists, their right to the city, and the use of public space over the span of eighteen years (2000–2018). Focusing on the midsized city of León, Bruce offers readers a look at the way negotiations with the neoliberal state unfolded at different levels and across decades. Issues brought to light in this case study, such as graffiti as a threat and graffiti as a sign of gentrification, resonate powerfully with those germane to other urban landscapes throughout the Western Hemisphere and beyond. Combining archival work, interviews, considerations of urban planning, local politics in Mexico, and insights gained by observing graffiti events and other informal artistic encounters, Bruce offers a new lens through which to understand the interplay between sanctioned and unsanctioned forms of cultural expression. Ultimately, Voices in Aerosol builds a strong case for graffiti as a contested tool for voicing public demands.

Moving Images, Mobile Bodies Horea Avram,2018-07-27 The book comprises a series of contributions by international scholars and practitioners

from different backgrounds researching in the fields of contemporary visual culture and performance studies. This collection addresses the issue of corporeality as a discursive field (which asks for a "poetics"), and the possible ways in which technology affects and is affected by the body in the context of recent artistic and theoretical developments. The common denominator of the contributions here is their focus on the relationship between body and image expressed as the connection between reality and fiction, presence and absence, private and public, physical and virtual. The essays cover a wide range of topics within a framework that integrates and emphasises recent artistic practices and current academic debates in the fields of performance studies, visual arts, new aesthetics, perception theories, phenomenology, and media theory. The book addresses these recent trends by articulating issues including the relationship between immediate experience and mediated image; performing the image; the body as fictional territory; performative idioms and technological expression; corporeality, presence and memory; interactivity as a catalyst for multimediality and remediation; visuality, performativity and expanded spectatorship; and the tensions between public space and intimacy in (social) media environments. The main strength of this volume is the fact that it provides the reader with a fresh, insightful and transdiciplinary perspective on the body–image relationship, an issue widely debated today, especially in the context of global artistic and technological transformations.

consider when planning, implementing, working within, and managing these promising virtual technologies for secure processes and initiatives. 3D and the Art of Massive Attack Robert Del Naja,Sean Bidder,2015-07-06 The Vinyl Factory presents 3D and the art of Massive Attack by Robert del Naja (aka 3D) a 300-page 12x12 hardback reversible book format with two different covers starting at the past or the present (with screen printed front covers) on the visual history of the artist and his band who have sold over 11 million records worldwide. Compiled and designed by 3D using images from a personal archive and original artifacts scanned by the artist for the record. Robert's artwork has come to define the iconic style of his band and the book explores their visual history, presenting both familiar and previously unseen work, from his influential graffiti and stencil art in the Wild Bunch-era of the 80s to Massive Attack cover designs and paste-ups and paintings. Also included is his work made in collaboration with Nick Knight, Tom Hingston, Judy Blame and Michael Nash Associates, as well as unseen photographs documenting Del Naja's ongoing LED work with United Visual ArtistsUnited Visual Artists, and his recent work with filmmaker Adam Curtis. The 300-page book also features an in-depth interview with the artist, where he describes the development of the band's artwork and record sleeve designs, as well as offering insight into his process and inspirations. Del Naja's background as a graffiti artist has shaped his evolving aesthetic, as well as a strong ethos of do it yourself creativity. His instincts as an artist were forged in an atmosphere of spontaneity and innovation - from making flyers to throwing warehouse parties - and this way of working informed the first record sleeves he created. Inspired by magazine culture and comics, 3D drew on wide-ranging influences, from New Yorks hip-hop scene and Japanese graphics, Jean-Michel Basquiats cultural juxtapositions to Warhols pop imagery, politics and punk.

Diffracting Digital Images Ian Dawson,Andrew Meirion Jones,Louisa Minkin,Paul Reilly,2021-12-27 Digital imaging techniques have been rapidly adopted within archaeology and cultural heritage practice for the accurate documentation of cultural artefacts. But what is a digital image, and how does it relate to digital photography? The authors of this book take a critical look at the practice and techniques of digital imaging from the stance of digital archaeologists, cultural heritage practitioners and digital artists. Borrowing from the feminist scholar Karen Barad, the authors ask what happens when we diffract the formal techniques of archaeological digital imaging through a different set of disciplinary concerns and practices. Diffracting exposes the differences between archaeologists, heritage practitioners and artists, and foregrounds how their differing practices and approaches enrich and inform each other. How might the digital imaging techniques used by archaeologists be adopted by digital artists, and what

are the potentials associated with this adoption? Under the gaze of fine artists, what happens to the fidelity of the digital images made by archaeologists, and what new questions do we ask of the digital image? How can the critical approaches and practices of fine artists inform the future practice of digital imaging in archaeology and cultural heritage? Diffracting Digital Images will be of interest to students and scholars in archaeology, cultural heritage studies, anthropology, fine art, digital humanities, and media theory.

Emerging art practices challenge old ideas about where art belongs, what forms it can take and what political discourses it fosters. Selected from papers presented at the 2013 Artscapes conference in Canterbury, this collection of new essays explores the dynamic relationship between art and the city. Contributors discuss the everyday artistic use of public space around the world, from sculpture to graffiti to street photography.
