**Need for Speed** Brian Kelleher,2014-02-25 Buckle up . . . Tobey Marshall is a mechanic struggling to save his family-owned garage. While he and his team skillfully build and race muscle cars on the side, it's not enough to keep the doors open. He reluctantly partners with his longtime rival, a wealthy, arrogant ex-professional racer, Dino Brewster. But just as a major sale to car broker Julia Bonet looks as though it will save Tobey's business, a disastrous, unsanctioned race results in Dino framing Tobey for manslaughter. Two years later, Tobey is fresh out of prison and eager for revenge. To take Dino down, he plans to enter the high-stakes De Leon race—the biggest contest of underground racing in the world—to get the money to reclaim his family business and expose Dino's deception. But getting there won't be easy, as Tobey must run a high-octane, pedal-to-the-floor gauntlet, dodging cops coast to coast and dealing with fallout from a dangerous bounty on his car. Luckily, with his team—and the surprisingly resourceful Julia—on his side, he just might defy the odds . . .

*3D Cinematic Aesthetics and Storytelling* Yong Liu,2018-07-05 This book argues that 3D films are becoming more sophisticated in utilising stereoscopic effects for storytelling purposes. Since Avatar (2009), we have seen a 3D revival marked by its integration with new digital technologies. With this book, the author goes beyond exploring 3D's spectacular graphics and considers how 3D can be used to enhance visual storytelling. The chapters include visual comparisons between 2D and 3D to highlight their respective narrative features; an examination of the narrative tropes and techniques used by contemporary 3D filmmakers; and a discussion of the narrative implications brought by the coexistence of flatness and depth in 3D visuality. In demonstrating 3D cinematic aesthetics and storytelling, Yong Liu analyses popular films such as Hugo (2011), Life of Pi (2012), Gravity (2013), Star Trek Into Darkness (2013), and The Great Gatsby (2013). The book is an investigation into contemporary forms of stereoscopic storytelling derived from a unique, long-existing mode of cinematic illusions.

*The Science of Car Racing* Karen Latchana Kenney,2014 Describes the science concepts involved in several types of car racing--

The Physics of Nascar Diandra Leslie-Pelecky,2008-02-14 A physicist explores the science of speed racing and the #1 spectator sport in America in the perfect gift for both NASCAR and science fans. Every NASCAR fan—at one time or another—asks the same question: Why isn't my favorite driver winning? This is your chance to discover how much more there is to NASCAR than "Go fast, turn left and don't crash." If you've ever wondered why racecars don't have mufflers, how "bump drafting" works, or what in the world "Let's go up a pound on the right rear and add half a round of wedge" means, The Physics of NASCAR is for you. In this fast-paced investigation into the adrenaline-pumping world of NASCAR, a physicist with a passion uncovers what happens when the rubber hits the road and 800-horsepower vehicles compete at 190 miles per hour only inches from one another. Diandra Leslie-Pelecky tells her story in terms anyone who drives a car—and maybe occasionally looks under the hood--can understand. How do drivers walk away from serious crashes? How can two cars travel faster together than either car can on its own? How do you dress for a 1800°F gasoline fire? In simple yet detailed, high-octane prose, this is the ultimate thrill ride for armchair speed demons, auto science buffs, and NASCAR fans at every level of interest. Readers, start your engines.

**Ultimate Speed** Samuel Hawley,Craig Breedlove,2018-10-02 An L.A. hot rodder with a high school education, a family to support and almost no money, Craig Breedlove set out in the late 1950s to do something big: harness the thrust of a jet in a car. With a growing obsession that would cost him his marriage, he started building in his dad's garage. The car's name: Spirit of America. Through perseverance and endless hard work, Craig completed Spirit and broke the land speed record on the Bonneville Salt Flats, setting a new mark of 407 mph in 1963. In the early 1970s he turned to rockets and set an acceleration record at Bonneville that stands to this day. He built a jet car in the 1990s, Spirit of America-Sonic Arrow, to go head-to-head against Britain's ThrustSSC to be the first to Mach One. Craig's subsequent crash at 675 mph remains the fastest in history. Even today, at the age of 80, he is going strong with plans for yet another Spirit of America racer. The ultimate goal: 1,000 mph. Ultimate Speed is the authorized biography of Craig Breedlove, a candid revelation of one of motorsports' most interesting figures based primarily on countless hours of interviews with Craig and dozens of people connected to his life.
