3DIY Ray Zone,2013-05-02 A must-have read for anyone looking to take their independently-produced film or video into the 3rd dimension. The text features technical, practical, and inspirational insight from the visionaries who've been producing 3D film and video for decades, not just in the recent past. They offer low-cost techniques and tricks they've been implementing themselves for years. A variety of styles are discussed, from full CG to time lapse - even a film made during a freefall skydive jump! The filmmakers discuss \* Options for on-set playback \* Preparing for final playback in various formats \* Adapting existing technology to your needs \* Post production software choices \* Working with computer graphics in 3D This book includes 3D glasses and a companion YouTube channel featuring the work of the filmmakers featured in the book (which you can view in 3D with the glasses), as well as the opportunity for you to upload your own videos for critique and feedback from the author and others. 3D glasses are not included in the purchase of the e-book of 3-DIY. If you have purchased the e-book, and would like a pair of 3D glasses, please contact the publisher at Dennis.McGonagle@taylorandfrancis.com

Biomarkers for Traumatic Brain Injury Alan H.B. Wu,W. Frank Peacock,2020-07-10 Biomarkers for Traumatic Brain Injury provides a comprehensive overview on the selection and implementation of serum-based and saliva-based biomarkers for traumatic brain injury. The book presents an economic analysis for implementing TBI biomarkers into clinical practice. In addition, it discusses the analytical tools needed to implement TBI biomarkers, including specifications for testing instruments and interpretative software. Neurologists, emergency department physicians, intensivists, and clinical laboratorians will find this book a great resource from which to familiarize themselves with the issues and processes regarding TBI biomarkers. Approximately 2 million people in the U.S. sustain a traumatic brain injury (TBI) each year with over 250,000 hospitalizations and 50,000 deaths. There has been a significant rise in interest in diagnosing mild concussions, particularly in the sports world. While imaging has been the gold standard, these procedures are costly and not always available. There is great potential in using serum-based biomarkers, hence the book seeks to enlighten readers on new possibilities. Offers strategies for the selection and implementation of traumatic brain injury biomarkers Discusses the importance of autoantibodies and post translational modifications for TBI Covers the analytical tools needed to implement TBI biomarkers, including the specifications for testing instruments and interpretative software
