Minecraft for Makers John Baichtal,2017-08-10 Minecraft has sold more than one hundred million copies worldwide (about 25 million of those units for the PC and Mac). According to Mojang, since the beginning of 2016 Minecraft continues to average 53,000 copies sold per day. Microsoft bought Minecraft (and Mojang) in 2014 for \$2.5 billion. In 2016, Microsoft released a version of Minecraft specifically for educators called MinecraftEdu that is used by thousands of teachers around the world. Minecraft for Makers explores the intersection of this creative and beloved electronic game with the real world. It gives readers the opportunity to take familiar objects from the game - such as blocks, jack o'lanterns, and mobs - and make real-world versions of them. Begin with simple crafting projects using wood, paint, and LEGOs. Then move up to projects that involve basic electronics with LEDs. And, finally, advance to Arduino microcontroller projects that teach programming skills and basic robotics. The skills build progressively on one another, from chapter to chapter, and the emphasis is on fun all the way! Chapters include: Basic Projects (Item Frame with Diamond Sword, LEGO Minecraft Block, Minecraft Chess Pieces) LED Projects (Glowing Minecraft Block, Glowstone Chandelier, Minecraft Chess Board) Arduino Projects (Minecraft Jack O'Lantern, Night and Day Clock, Robot Creeper)

The Book of Perfectly Perilous Math Sean Connolly,2017-03-28 Math rocks! At least it does in the gifted hands of Sean Connolly, who blends middle school math with fantasy to create an exciting adventure in problem-solving. These word problems are perilous, do-or-die scenarios of blood-sucking vampires (How many months would it take a single vampire to completely take over a town of 500,000 people?), or a rowboat of 5 shipwrecked sailors with a single barrel of freshwater (How much can they drink, and for how long, before they go mad from thirst???). Each problem requires readers to dig deep into the tools they're learning in school to figure out how to survive. Kids will love solving these problems. Sean Connolly knows how to make tough subjects exciting and he brings that same intuitive understanding of what inspires and challenges kids' curiosity to the 24 problems in *The Book of Perfectly Perilous Math*. These problems are as fun to read as they are challenging to solve. They test readers on fractions, algebra, geometry, probability, expressions and equations, and more. Use geometry to fill in for the ship's navigator and make it safely to the New World. Escape an evil Duke's executioner by picking the right door—probability will save your neck.
