Mobile Augmented Reality for Human Scale Interaction with Geospatial Models Gerhard Schall,2012-10-14 Gerhard Schall overviews research activities related to mobile augmented reality in indoor as well as outdoor environments. These activities have emerged over several years, especially around the topics of positioning, sensor fusion, spatial modelling as well as in the fields of ubiquitous computing. The innovative and contemporary character of these topics has led to a great variety of interdisciplinary contributions. The author gives insights into the evolution of mobile augmented reality prototypes for industrial applications, such as X-Ray visualisation of 3D models of the underground infrastructures which is registered correctly in the users view.

**White Collar Crime** David Mills,Robert Weisberg,2020-02-02 This book serves as a comprehensive treatment of the main financial and public malfeasance crimes associated with the subject of white-collar crime. In student-friendly form, it teaches the operations of the major federal statutes in this area while unifying them according to the

dominant cross-cutting themes of the nature of corruption and the types of harms to society, government, the legal system, and the market that justify the severity of these laws. It draws on case material not just from the Supreme Court but also from the lower federal courts where the hard work of implementing confessional mandates occurs. In such areas as Securities Fraud, it also covers the agency regulations that play an implementing role. Thus, it offers students rich exercises in statutory interpretation as well as case analysis. Highlights of the First Edition: Materials on perjury, false statements and obstruction of justice that are extremely timely in light of political controversies that reach back to the Nixon and Clinton administrations and are still relevant today Careful elaboration of the different crimes of bribery, including bribery of federal officials under 18 U.S.C. section 201, bribery of state and local officials under the Mail and Wire Fraud laws and federal program bribery law, and the Foreign Corrupt Practices Act Concise treatment of criminal Securities Fraud and Insider trading for students who have not otherwise studied Securities Regulation Extended treatment of the major mens rea issues in white-collar crime, as an advanced version of the subject of mens rea in the standard first-year Criminal Law course, with emphasis on such important doctrines as "deliberate ignorance" and the mental state of "corruptly." Professors and students will benefit from: Concisely edited case excerpts in very readable form. Handy Appendix with texts of all major statutes covered in the book. Short provocative notes raising questions of jurisprudence and social philosophy around problems of overcriminalization and the meaning of the concept of "corruption." Concise non-technical material on cybercrime to show how modern technology raises themes of corruption similar to those of more conditional crimes.
