Stars in Your Hand Kimberly Arcand,Megan Watzke,2022-09-20 An illustrated guide to exploring the Universe in three dimensions. Astronomers have made remarkable discoveries about our Universe, despite their reliance on the flat projection, or 2D view, the sky has offered them. But now, drawing on the vast stores of data available from telescopes and observatories on the ground and in space, astronomers are using 3D technology to go beyond a flattened view of the cosmos. In Stars in Your Hand, Kimberly Arcand and Megan Watzke offer an illustrated guide to exploring the Universe in three dimensions, with easy-to-follow instructions for creating models of stars and constellations using a 3D printer and 3D computer imaging. Stars in Your Hand and 3D technology make learning about space an adventure. Intrigued by the stunning images from high-powered telescopes? Using this book, you can fly virtually through a 3D spacecape and hold models of cosmic objects in your hand. Arcand and Watzke outline advances in 3D technology, describe some amazing recent discoveries in astronomy, reacquaint us with the night sky, and provide brief biographies of the telescopes, probes, and rovers that are bringing us so much data. They then offer images and instructions for printing and visualizing stars, nebulae, supernovae, galaxies, and even black holes in 3D. The 3D Universe is a marvel, and Stars in Your Hand serves as a unique and thrilling portal to discovery.

Superstars Paul Jackson,2020-09-19 From bestselling author and expert in paper and art crafts, Paul Jackson, comes this eagerly awaited new project, Superstars. Create a galaxy of amazing 3D stars and other geometric shapes with these pre-cut and scored sheets. Superstars are simple and quick to fold; based on geometrical solids, the forms are surprisingly sturdy. You can make large and impressive decorations (bring on Christmas!) as well as using the kit as a craft activity in itself - they can be taken apart and used again as many times as you like! Featuring simple instructional videos instead of complex written instructions, these superstars will absorb both experienced paper folders and enthusiastic amateurs. Superstars comes with an accompanying booklet that contains easy to follow steps, QR codes, illustrations and photos. The booklet explains the structure of 17 superstars, though there are countless others you can design for yourself as you become familiar with the techniques. The series of online videos that accompany the pack show in detail how to fold the units, how to assemble the basic pyramids and how to make superstars from 6, 12 and 30 units. Paul Jackson is the author of more than 30 books on paper arts and crafts. He has taught the techniques of folding on more than 150 university-level design courses in the UK, Germany, Belgium, the US, Canada and Israel. These include courses of Architecture, Graphic Design, Fashion Design, Textile Design, Jewellery, Product Design, Packaging, Ceramics, Industrial Design, Fine Art, Basic

Design and Interior Design. Other bestselling books of his include: Complete Pleats, Cut and Fold Paper Textures, Cut and Fold Techniques for Pop-Up Designs, Cut and Fold Techniques for Promotional Materials, Folding Techniques for Designers, How to Make Repeat Patterns and Structural Packaging, all Laurence King.
