Stereograms: Autostereogram - Hidden 3D Pictures, the Wallpaper Effect - 3D Images - 3D Relief Images - Magic Eye Pictures MichelloZ Publishing, 2021-05-28 To see the hidden 3D picture in each stereogram, basically you need to un-focus your eyes and look through the stereogram. The picture becomes blurry and doubled and that's exactly what we want. This will make pattern tiles overlap each other and each eye will be seeing slightly different images. Discrepancy in views will make your brain see the hidden 3D image. Hold the stereogram about 15cm to 20cm from your face. Then stare through the picture, which will make your eyesight go blurry. Always hold stereogram horizontally or vertically, do not turn and do not bend it. Don't tilt your head and try not to blink. Eventually, a blurry hidden 3D picture will start to come into focus. Maintain your gaze and the 3D picture will soon become clearer, sharper and you will be able to look around the 3D picture without it disappearing. It may take some people a few seconds to see the 3D hidden picture, while for others it may take a few minutes or not at all. If you cannot see any hidden 3D pictures in the stereograms, try altering the

distance by slowly moving your head back and forth. What's in the book: 20 Stereograms. 30 Pages Size: 8x10 inches Solutions are included Explanation of a Stereogram How to see a Stereogram Glossy Cover Solutions at the end of the book
