*Folk on the Delaware General Corporation Law* Edward P. Welch, Robert S. Saunders, Jennifer C. Voss, 2013-12-23 Because Delaware corporate law has virtually become national corporate law, its statutes and cutting-edge case law regarding corporations and alternative business entities have attracted practitioners nationwide to look to Delaware as the place of formation for corporations and other business entities. The definitive section-by-section guide to the country's most important corporate law, the Sixth Edition of *Folk on the Delaware General Corporation Law* is the place to turn for accurate, up-to-date, authoritative coverage of the Delaware statute. Its uniquely logical code section organization with penetrating and extensively annotated commentary brings you the best in: Effective strategies and options for specific business decisions and activities under the statute Detailed analysis of each key statutory provision and judicial decision Coverage of all the major cases, many of them unreported and unavailable in any other source Analysis organized by code section, with incisive and extensively annotated commentary Because it is a widely accepted authority in the field, *Folk on the Delaware General Corporation Law* is regularly cited by courts in states other than Delaware. Its section-by-section coverage makes it easy to quickly find the complete law text and analysis, including astute commentary on recent legislation and the most significant cases (including unreported opinions) with special attention to the more complex areas of practical concern.

*Rodanum* Guus Besuijen,2008 Beneath the surface of Aardenburg, a small town in the south-western part of the Netherlands, lie the remains of a Roman settlement that is presumed to have been named Rodanum. Extensive archaeological excavations from the late 1950s to the late 1980s revealed that the settlement was similar in size or even larger than the modern town. Its centre was formed by a large castellum-type fortification wall that enclosed several large stone buildings. The settlement was connected to the sea by a natural watercourse that defined its economic and logistical importance in the region. Rodanum's military function was to secure the regional coast against attacks by Germanic tribes via the North Sea, which occurred around AD 175. It continued to be inhabited until the late third century or the beginning of the fourth century, after which the settlement was deserted until the early Middle Ages. The first part of this study provides an overview of Aardenburg during the Roman period, in which its economic and military functions within the region are explored. In particular, the military and civilian character of the town is discussed. The second part contains a study of the metal objects and aims to present significant additional information. This part concludes with a critical review of the current state of research at this site.

**Proteinase Inhibitors** H. Fritz,H. Tschesche,L.J. Greene,E. Truscheit,2012-12-06 These proceedings contain the papers presented at the Bayer-Symposium V which was held in Grosse Ledder on October 16-21, 1973 and which was simultaneously the Second International Research Conference on Proteinase Inhibitors. The cordial atmosphere, the frank discussions and the profitable exchange of ideas during the First International Research Conference on Proteinase Inhibitors which was held on November 4--6, 1970 in Munich were a stimulant for us to consider holding a Second Conference especially as the steadily increasing research activities in this and related fields called for a new assessment of recent efforts in proteinase inhibitor research. In the three years since the First Conference was held, this field has developed particularly in the areas of molecular aspects of protein-protein interactions and in the extension to inhibitors of nonserine proteinases and peptidases. In planning this meeting the Organizing Committee was faced with the problem of selecting a limited number of participants and we decided that it was appropriate and necessary to focus in detail on the chemistry of proteinase inhibitors, their interactions with a variety of enzymes and also to invite more general papers to survey the physiological and clinical aspects of the subject which we felt would be of importance in the future.
