Rationing Is Not a Four-Letter Word Philip M. Rosoff, 2014-07-18 A provocative argument that the best way to deliver high-quality healthcare to Americans is to institute a comprehensive and fair system of rationing. Most people would agree that the healthcare system in the United States is a mess. Healthcare accounts for a larger percentage of gross domestic product in the United States than in any other industrialized nation, but health outcomes do not reflect this enormous investment. In this book, Philip Rosoff offers a provocative proposal for providing quality healthcare to all Americans and controlling the out-of-control costs that threaten the economy. He argues that rationing—often associated in the public's mind with such negatives as unplugging ventilators, death panels, and socialized medicine—is not a dirty word. A comprehensive, centralized, and fair system of rationing is the best way to distribute the benefits of modern medicine equitably while achieving significant cost savings. Rosoff points out that certain forms of rationing already exist when resources are scarce and demand high: the organ transplant system, for example, and the distribution of drugs during a shortage. He argues that if we incorporate certain key features from these systems, healthcare rationing would be fair—and acceptable politically. Rosoff considers such topics as fairness, decisions about which benefits should be subject to rationing, and whether to compensate those who are denied scarce resources. Finally, he offers a detailed discussion of what an effective and equitable healthcare rationing system would look like.

Discrete Mathematics For Teachers Ed Wheeler, Jim Brawner, 2010-06-01 (Originally Published by Houghton Mifflin Company, 2004) There is a national consensus that teachers who teach middle-grades and elementary mathematics need deeper and broader exposure to mathematics in both their undergraduate and in their graduate studies. The Mathematics Education of Teachers, published by The Conference Board on the Mathematical Sciences, recommends 21 semester hours of mathematics for prospective teachers of middle-grades mathematics. In several states pre-service teachers preparing to teach middle-grades mathematics and pre-service teachers preparing to teach elementary school must complete 6- 9 semester hours of mathematics content at

the junior-senior level. Graduate schools across the nation have developed special programs for educators who specialize in teaching mathematics to elementary school children and to middle grades students. However, there is a paucity of text materials to support those efforts at junior-senior level and graduate level courses. Faculty members must choose to teach yet another course out of one of the "Mathematics for Teachers" texts that have formed the basis of the curriculum for the last two decades. These texts tend to treat a very limited set of topics on a somewhat superficial level. Alternatively, faculty members can use mathematics textbooks written primarily for students majoring in mathematics or the sciences. Neither the topic choice nor the pedagogical style of these texts is optimal for pre-service and in-service teachers of middle grades and elementary mathematics. Discrete Mathematics for Teachers is a text designed to fill this void. The topic is right. Discrete mathematics provides a rich and varied source of problems for exploration and communication, expands knowledge of mathematics in directions related to elementary and middle school curricula, and is easily presented using our best understanding of the ways that mathematics is learned and taught. The presentation is right. In the spirit of NCTM's Principles and Standards for School Mathematics, topics are presented with careful attention to the best traditions of problem solving, reasoning and proof, communication, connections with other disciplines and other areas of mathematics, and varied modes of representation.

Short Ribs David J. Hardwicke, 2020-01-07 This volume is the first of an intended series of comedic fiction, based on observations and reflections on the world as we create and perceive it in an everyday sense. These reflections are contained within the various puns, riddles, micro-stories and cartoons herein, flavoured by the liberal dusting of a dry sense of humour. Elements of life common to all of us are found here, expressed in a minimalist manner so that you, the reader, form the true image in your head, as pertinent to your life. The words simply plant the seed. Just be warned that the seed may provide unexpected fruit, but this is fully intended. If life were to be fully predictable, it would have no life in it. To laugh at our own foibles is to be content with ourselves, even if only for a moment or two. We trust you will embark with us on a voyage of introspection, celebration and pure imagination as we set out to explore the frontiers of the human experience and the nether-reaches of pure silliness. This combination sets us free of the weight of world for a time, opens our hearts and minds to recall the many roads and milestones of our lives, while wrapped in the warm hug of humour. Come with us. We have cookies!

I Ain't Marching Anymore Chris Lombardi, 2020-11-10 A sweeping history of the passionate men and women in uniform who have bravely and courageously exercised the power of dissent Before the U.S. Constitution had even been signed, soldiers and new veterans protested. Dissent, the hallowed expression of disagreement and refusal to comply with the government's wishes, has a long history in the United States. Soldier dissenters, outraged by the country's wars or egregious violations in conduct, speak out and change U.S. politics, social welfare systems, and histories. *I Ain't Marching Anymore* carefully traces soldier dissent from the early days of the republic through the wars that followed, including the genocidal "Indian Wars," the Civil War, long battles against slavery and racism that continue today, both World Wars, Korea, Vietnam, the Cold War, and contemporary military imbroglios. Acclaimed journalist Chris Lombardi presents a soaring history valorizing the brave men and women who spoke up, spoke out, and talked back to national power. Inviting readers to understand the texture of dissent and its evolving and ongoing meaning, *I Ain't Marching Anymore* profiles conscientious objectors including Frederick Douglass's son Lewis, Evan Thomas, Howard Zinn, William Kunstler, and Chelsea Manning, adding human dimensions to debates about war and peace. Meticulously researched, rich in characters, and vivid in storytelling, *I Ain't Marching Anymore* celebrates the sweeping spirit of dissent in the American tradition and invigorates its meaning for new risk-taking dissenters.
