Selling Digital Music, Formatting Culture Jeremy Wade Morris, 2015-09-01 Selling Digital Music, Formatting Culture documents the transition of recorded music on CDs to music as digital files on computers. More than two decades after the first digital music files began circulating in online archives and playing through new software media players, we have yet to fully internalize the cultural and aesthetic consequences of these shifts. Tracing the emergence of what Jeremy Wade Morris calls the "digital music commodity," Selling Digital Music, Formatting Culture considers how a conflicted assemblage of technologies, users, and industries helped reformat popular music's meanings and uses. Through case studies of five key technologies—Winamp, metadata, Napster, iTunes, and cloud computing—this book explores how music listeners gradually came to understand computers and digital files as suitable replacements for their stereos and CD. Morris connects industrial production, popular culture, technology, and commerce in a narrative involving the aesthetics of music and computers, and the labor of producers and everyday users, as well as the value that listeners make and take from digital objects and cultural goods. Above all, Selling Digital Music, Formatting Culture is a sounding out of music's encounters with the interfaces, metadata, and algorithms of digital culture and of why the shifting form of the music commodity matters for the music and other media we love.

Postcolonial Piracy Lars Eckstein, Anja Schwarz, 2014-10-23 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. Across the global South, new media technologies have brought about new forms of cultural production, distribution and reception. The spread of cassette recorders in the 1970s; the introduction of analogue and digital video formats in the 80s and 90s; the pervasive availability of recycled computer hardware; the global dissemination of the internet and mobile phones in the new millennium: all these have revolutionised the access of previously marginalised populations to the cultural flows of global modernity. Yet this access also engenders a pirate occupation of the modern: it ducks and deranges the globalised designs of property, capitalism and personhood set by the North. Positioning itself against Eurocentric critiques by corporate lobbies, libertarian readings or classical Marxist interventions, this volume offers a profound postcolonial revaluation of the social, epistemic and aesthetic workings of piracy. It projects how postcolonial piracy persistently negotiates different trajectories of property and self at the crossroads of the global and the local.

Saudi Clerics and Shi'a Islam Raihan Ismail,2016 This book examines the attitudes of the Saudi

'ulama' toward the Shi'a. It is an in-depth study of the theological convictions of the 'ulama' and their political motivation when examining Shi'a sects, communities, and political actors. The Saudi 'ulama' are known for their strong opposition to Shi'a theology, Shi'a communities in Saudi Arabia, and external Shi'a influences such as Iran and Hezbollah.

The New Middle East Fawaz A. Gerges, 2013-12-30 The New Middle East is one of the first comprehensive books to critically examine the Arab popular uprisings of 2011-12. While these uprisings prompted a number of cursory publications, this volume contains meticulous and thoughtful reflections on the causes, drivers and effects of these seminal events on the internal, regional and international politics of the Middle East and North Africa. Although specific conditions in individual countries that have experienced large-scale popular mobilizations are investigated, they are neither treated in isolation nor separated from broader developments in the region. Instead, the authors highlight connections between individual case studies and systemic conditions throughout the Arab arena. These include the crisis of political authority, the failure of economic development and new genres of mobilization and activism, especially communication technology and youth movements. The careful analysis and reflection on the prospects for democratic change in the region ensures the book will have both an immediate and enduring appeal.

Literacy, Play and Globalization Carmen L. Medina, Karen E. Wohlwend, 2014-06-05 This book takes on current perspectives on children's relationships to literacy, media, childhood, markets and transnationalism in converging global worlds. It introduces the idea of multi-sited imaginaries to explain how children's media and literacy performances shape and are shaped by shared visions of communities that we collectively imagine, including play, media, gender, family, school, or cultural worlds. It draws upon elements of ethnographies of globalization, nexus analysis and performance theories to examine the convergences of such imaginaries across multiple sites: early childhood and elementary classrooms and communities in Puerto Rico and the Midwest United States. In this work we attempt to understand that the local moment of engagement within play, dramatic experiences, and literacies is not a given but is always emerging from and within the multiple localities children navigate and the histories, possibilities and challenges they bring to the creative moment.

Human Development and Interaction in the Age of Ubiquitous Technology Rahman, Hakikur, 2016-06-27 The human condition is affected by numerous factors in modern society. In modern times, technology is so integrated into culture that it has become necessary to perform even daily functions. Human Development and Interaction in the Age of Ubiquitous Technology is an authoritative reference source for the latest scholarly research on the widespread integration of technological innovations around the globe and examines how human-computer interaction affects various aspects of people's lives. Featuring emergent research from theoretical perspectives and case studies, this book is ideally designed for professionals, students, practitioners, and academicians.
