And I also gave special importance to look for the best tools that can change the voice tune as a lot of people don't like to make videos with their voice for special reasons. The Social and Behavioural Aspects of Climate Change Pim Martens,Chiung Ting Chang,2017-09-08 Over the past few years, and certainly since the publication of the Stern Report, there has been increasing recognition that climate change is not only an environmental crisis, but one with important social and economic dimensions. There is now a growing need for multi-disciplinary research and for the science of climate change to be usefully translated for policy-makers.Until very recently, scientific and policy emphasis on climate change has focused almost exclusively on mitigation efforts: mechanisms and regulations to reduce greenhouse gas emissions. The success of such efforts to date is debatable. In fact, the impact of ever

more stringent emission control programmes could potentially have enormous social consequences. Little effort has been expended on the exploration of a systematic evaluation of climate stabilization benefits or the costs of adapting to a changed climate, let alone attempting to integrate different approaches. There is an increasing recognition that the key actors in the climate crisis also need to be preparing for change that is unavoidable. This has resulted in a greater consideration of vulnerability and adaptation. The book, based on the research programme Vulnerability, Adaptation and Mitigation (VAM) which ran from 2004 to 2010, funded by the Netherlands Organisation for Scientific Research (NWO), presents a cluster of case studies of industries, communities and institutions which each show how vulnerability, adaptation and mitigation analyses can be integrated using social behavioural sciences. Each chapter makes specific recommendations for the studied industry sector, community or institution, analyses the latest research developments of the field and identifies priorities for future research. The book argues that the inherent complexity of climate change will ultimately require a much more integrated response both scientifically – to better understand multiple causes and impacts – as well as at the scientific/policy interface, where new forms of engagement between scientists, policy-makers and wider stakeholder groups can make a valuable contribution to more informed climate policy and practice. The book is particularly timely as the scientific research and policy debate is shifting from one of problem-framing to new agendas that are much more concerned with implementation, the improvement of assessment methodologies from a multi-disciplinary perspective, and the reframing of current scientific understanding towards mitigation, adaptation and vulnerability. A critical element in responding to the climate change challenge will be to ensure the translation of these new scientific insights into innovative policy and practice on the ground. This book provides some fundamental elements to answer this need. The Social and Behavioural Aspects of Climate Change: Linking Vulnerability, Adaptation and Mitigation will be essential reading for social science researchers and policy managers in the area of climate change, as well as for those who want to know what the social and behavioural sciences can contribute toward coping with climate hazards. NGOs, law firms and businesses in the energy sector or other climate related fields will also find the book of great value.

Media Consumption and Everyday Life in Asia Youna Kim, 2008-06-30 This book explores people's everyday experience of the media in Asian countries in confrontation with huge social change and transition and the need to understand this phenomenon as it intersects with the media. It argues for the centrality of the media to Asian transformations in the era of globalization.

The profusion of the media today, with new imaginations, new choices and contradictions, generates a critical condition for reflexivity engaging everyday people to have a resource for the learning of self, culture and society in a new light. Media culture is creating new connections, new desires and threats, and the identities of people are being reworked at individual, national, regional and global levels. Within historically specific social conditions and contexts of the everyday, the chapters seek to provide a diversity of experiences and understandings of the place of the media in different Asian locations. This book considers the emerging consequences of media consumption in people's everyday life at a time when the political, socio-economic and cultural forces by which the media operate are rapidly globalizing in Asia.

Narrating Postcolonial Arab Nations Lindsey Moore,2017-10-30 Narrating Postcolonial Arab Nations significantly enhances the interface between postcolonial literary studies and the hitherto under-studied Arab world. Lindsey Moore brings together canonical and less familiar Arab novels and memoirs from the last half century to consider colonial continuities and consequences. Literary narratives are shown to oppose repressive versions of nationalism and to track desire lines toward more hospitable nations. The literatures discussed in this book enable a deeper historical understanding of twenty-first century Arab uprisings and their aftermaths. The book analyzes four rich sites of literary production: Egypt, Algeria, Lebanon, and Palestine. Moore explores ways in which authors critique particular nation-state formations and decolonizing histories, engage the general problematic of 'the nation', and redefine, repurpose, and transcend national literary canons. Chapter One contrasts Egyptian literary representations of popular revolt with official revolutionary discourse. Chapter Two addresses the enduring legacy of anti-colonial violence in Algeria and the place of Albert Camus in its literature. Chapter Three uses narratives of gender violence on the Beirut front line to reveal the divisibility and intersectional identity politics of postcolonial nation-states. Chapter Four emphasizes ways in which Palestinian memoirs insist upon remembering towards a postcolonial future. The book provides detailed analysis of literary narratives by Etel Adnan, Rabi al-Haddad, Alaa al-Aswany, Rachid Boudjedra, Albert Camus, Rashid al-Daif, Assia Djebar, Ghada Karmi, Naguib Mahfouz, Jean Said Makdisi, Edward Said, Boualem Sansal, Raja Shehadeh, Miral al-Tahawy, and Latifa al-Zayyat. It is an indispensable volume for students and scholars of Postcolonial, Arab, and World literatures.

Digital Renaissance Joel Waldfogel, 2018-11-13 How digital technology is upending the traditional creative industries—and why that might be a good thing The digital revolution poses a mortal threat to the major creative industries—music, publishing, television, and the movies. The ease with which digital files can be copied and distributed has unleashed a wave of piracy with disastrous effects on revenue. Cheap, easy self-publishing is eroding the position of these gatekeepers and guardians of culture. Does this revolution herald the collapse of culture, as some commentators claim? Far from it. In *Digital Renaissance*, Joel Waldfogel argues that digital technology is enabling a new golden age of popular culture, a veritable digital renaissance. By reducing the costs of production, distribution, and promotion, digital technology is democratizing access to the cultural marketplace. More books, songs, television shows, and movies are being produced than ever before. Nor does this mean a tidal wave of derivative, poorly produced kitsch; analyzing decades of production and sales data, as well as bestseller and best-of lists, Waldfogel finds that the new digital model is just as successful at producing high-quality, successful work as the old industry model, and in many cases more so. The vaunted gatekeeper role of the creative industries proves to have been largely mythical. The high costs of production have stifled creativity in industries that require ever-bigger blockbusters to cover the losses on ever-more-expensive failures. Are we drowning in a tide of cultural silt, or living in a golden age for culture? The answers in *Digital Renaissance* may surprise you.

Shadow Libraries Joe Karaganis, 2018-05-04 How students get the materials they need as opportunities for higher education expand but funding shrinks. From the top down, *Shadow Libraries* explores the institutions that shape the provision of educational materials, from the formal sector of universities and publishers to the broadly informal ones organized by faculty, copy shops, student unions, and students themselves. It looks at the history of policy battles over access to education in the post-World War II era and at the narrower versions that have played out in relation to research and textbooks, from library policies to book subsidies to, more recently, the several “open” publication models that have emerged in the higher education sector. From the bottom up, *Shadow Libraries* explores how, simply, students get the materials they need. It maps the ubiquitous practice of photocopying and what are—in many cases—the more marginal ones of buying books, visiting libraries, and downloading from unauthorized sources. It looks at the informal networks that emerge in many contexts to share materials, from face-to-face student networks to Facebook groups, and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online—the shadow libraries of the title. If Alexandra Elbakyan's Sci-Hub is the largest of these efforts to date, the more characteristic part of her story is the prologue: the personal struggle to participate in global scientific and educational communities, and the

recourse to a wide array of ad hoc strategies and networks when formal, authorized means are lacking. If Elbakyan's story has struck a chord, it is in part because it brings this contradiction in the academic project into sharp relief—universalist in principle and unequal in practice. *Shadow Libraries* is a study of that tension in the digital era. Historiography in Saudi Arabia Jörg Matthias Determann, 2013-10-25 Saudi Arabia is generally and justifiably viewed as a country with some of the fewest democratic institutions and the weakest traditions of pluralism. It is therefore surprising to learn that at least in one corner of the Saudi world, there can be found a plurality of opinions and lively debate. Jorg Matthias Determann brings this element to light by analysing an important field of cultural activity in Saudi Arabia: historical writing. Since the 1920s local, tribal, Shi'i and dynastic histories have contributed to a growing plurality of narratives. Paradoxically, this happened because of the expansion of the Saudi state, including state provision of mass education. It was also due to globalizing processes, such as the spread of the internet. In challenging the widely-held perception of Saudi Arabia as an irredeemably closed and monolithic society, *Historiography in Saudi Arabia* provides a deeper understanding of modern Arab historiography, the Saudi state, and education and scholarship in the Middle East.
