**Sustainability and Social Responsibility of Accountability Reporting Systems** Kıymet Tunca Çalıyurt, Roshima Said, 2018-03-01 This book explores sustainability and social responsibility from the point of view of accountability reporting systems. The contributions to this volume open up discussions about the theory and application of sustainability and social responsibility across various corporate sectors and assists the reader in applying sustainable corporate social responsibility reporting across those sectors. As a central theme, the book addresses how the theory and application in sustainability and social responsibility has different dimensions and aspects which are impossible to apply across different sectors. This point of view is supported by chapter contributions from countries around the world including Turkey, Serbia, Malaysia, United States, South Africa, Italy, China, Brasil, Romania, Serbia, Puerto Rico, Algeria. Academics worldwide will discover in Sustainability and Social Responsibility of Accountability Reporting Systems: A Global Approach the latest developments about corporate social responsibility and sustainability of accountability reporting systems.

*Drought phenotyping in crops: From theory to practice* Philippe Monneveux, Jean-Marcel Ribaut, Antonia Okono, 2014-02-12 This topic is a unique attempt to simultaneously tackle theoretical and practical aspects in drought phenotyping, through both crop-specific and cross-cutting approaches. It is designed for – and will be of use to – practitioners and postgraduate students in plant science, who are grappling with the challenging task of evaluating germplasm performance under different water regimes. In Part I, different methodologies are presented for accurately characterising environmental conditions, implementing trials, and capturing and analysing the information this generates, regardless of the crop. Part II presents the state-of-art in research on adaptation to drought, and recommends specific protocols to measure different traits in major food crops (focusing on particular cereals, legumes and clonal crops). The topic is part of the CGIAR Generation Challenge Programme's efforts to disseminate crop research information, tools and protocols, for improving characterisation of environments and phenotyping conditions. The goal is to enhance expertise in testing locations, and to stimulate the development and use of traits related to drought tolerance, as well as innovative protocols for crop characterisation and breeding.

**Dictionary of the c Inscriptions (2 vols)** Hoftijzer, Karel Jongeling, 2015-11-02 The North-West Semitic epigraphic contributes considerably to our understanding of the Old Testament and of the Ugaritic texts and to our knowledge of the North-West Semitic languages as such. This dictionary is concerned with the North-West Semitic material found in inscriptions, papyri and ostraca in Phoenician, Punic, Hebrew, various forms of Aramaic, Ammonite, Edomite, the language of Deir Alla et cetera. The material covers the period from ca. 1000 B.C. to ca. 300 A.D. Besides translations, the entries include discussions and full references to

scholarly literature. The book is a translated, updated and considerably augmented edition of Jean & Hoftijzer, *Dictionnaire des inscriptions sémitiques de l'ouest*. The additions concern newly found texts as well as references to new scholarly literature. The book is an indispensable tool for research in North-West Semitic epigraphy, on the Old Testament and on Ugaritic texts, and for Semitic linguistics. Please note that this version is an unrevised reprint of the original version published in 1995.

Each root is illustrated with lexical words from the language where it is represented, cognate words being brought together under a single entry and cross-referenced to each other as they occur at different points in the alphabetical order. The root list is preceded by concise phonologies of each language and an exposition of the techniques used to isolate roots in North Wakashan.

*Mixed-Phase Clouds* Constantin Andronache, 2017-09-28 *Mixed-Phase Clouds: Observations and Modeling* presents advanced research topics on mixed-phase clouds. As the societal impacts of extreme weather and its forecasting grow, there is a continuous need to refine atmospheric observations, techniques and numerical models. Understanding the role of clouds in the atmosphere is increasingly vital for current applications, such as prediction and prevention of aircraft icing, weather modification, and the assessment of the effects of cloud phase partition in climate models. This book provides the essential information needed to address these problems with a focus on current observations, simulations and applications. Provides in-depth knowledge and simulation of mixed-phase clouds over many regions of Earth, explaining their role in weather and climate Features current research examples and case studies, including those on advanced research methods from authors with experience in both academia and the industry Discusses the latest advances in this subject area, providing the reader with access to best practices for remote sensing and numerical modeling

**NEW HORIZONS: 1 STUDENT'S BOOK PACK** Paul Radley, Daniela Simons, 2011-04-14 *New Horizons* is a four-level upper secondary course that sets achievable goals and builds confidence. *New Horizons* includes 100% new content and updated exam training to prepare students for the B1 school-leaving exam. **Habermas** Stefan Müller-Doohm, 2016-08-29 'Jürgen Habermas', wrote the American philosopher Ronald Dworkin on the occasion of the great European thinker's eightieth birthday, 'is not only the world's most famous living philosopher. Even his fame is famous.' Now, after many years of intensive

research and in-depth conversations with contemporaries, colleagues and Habermas himself, Stefan Müller-Dooch presents the first comprehensive biography of one of the most important public intellectuals of our time. From his political and philosophical awakening in West Germany to the formative relationships with Adorno and Horkheimer, Müller-Dooch masterfully traces the major forces that shaped Habermas's intellectual development. He shows how Habermas's life and work were conditioned by the possibilities offered to his generation in the unique circumstances of regained freedom that characterized postwar Germany. And yet Habermas's career is fascinating precisely because it amounts to more than a corpus of scholarly work, however original and influential that may be. For here is someone who continually left the protective space of the university in order to assume the role of a participant in controversial public debates Ð from the significance of the Holocaust to the future of Europe Ð and in this way sought to influence the development of social and political life in an arena much broader than the academy. The significance and virtuosity of Habermas's many writings over the years are also fully and expertly documented, ranging from his early work on the public sphere to his more recent writings on communicative action, cosmopolitanism and the postnational condition. What emerges from this biography is a vivid portrait of one of the great public intellectuals of our time Ð a unique thinker who has made an immense and lasting philosophical contribution but who, when he perceives that society is not living up to its potential for creating free and just conditions for all, becomes one of its most rigorous and persistent critics.

**Athenaze: Book I** Maurice Balme, Gilbert Lawall, 2003-02-23 Combining the best features of traditional and modern methods, *Athenaze: An Introduction to Ancient Greek*, 2/e, provides a unique course of instruction that allows students to read connected Greek narrative right from the beginning and guides them to the point where they can begin reading complete classical texts. Carefully designed to hold students' interest, the course begins in Book I with a fictional narrative about an Attic farmer's family placed in a precise historical context (432-431 B.C.). This narrative, interwoven with tales from mythology and the Persian Wars, gradually gives way in Book II to adapted passages from Thucydides, Plato, and Herodotus and ultimately to excerpts of the original Greek of Bacchylides, Thucydides, and Aristophanes' *Acharnians*. Essays on relevant aspects of ancient Greek culture and history are also provided. New to the Second Edition: \* Short passages from Classical and New Testament Greek in virtually every chapter \* The opening lines of the *Iliad* and the *Odyssey* toward the end of Book II \* New vocabulary and more complete explanations of grammar, including material on accents \* Many new exercises and additional opportunities for students to practice completing charts of verb forms and paradigms of nouns and adjectives \* Updated Teacher's Handbooks for Books I and II containing translations of all stories, readings, and exercises; detailed suggestions for classroom presentation; abundant English derivatives; and additional linguistic information \* Offered for the first time, Student Workbooks for Books I and II that include self-correcting exercises, cumulative vocabulary lists, periodic grammatical reviews, and additional readings

Adaptation under Fire Lt. General David Barno, Nora Bensahel, 2020-08-03 Every military must prepare for future wars despite not really knowing the shape such wars will ultimately take. As former U.S. Secretary of Defense Robert Gates once noted: We have a perfect record in predicting the next war. We have never once gotten it right. In the face of such great uncertainty, militaries must be able to adapt rapidly in order to win. *Adaptation under Fire* identifies the characteristics that make militaries more adaptable,

illustrated through historical examples and the recent wars in Iraq and Afghanistan. Authors David Barno and Nora Bensahel argue that militaries facing unknown future conflicts must nevertheless make choices about the type of doctrine that their units will use, the weapons and equipment they will purchase, and the kind of leaders they will select and develop to guide the force to victory. Yet after a war begins, many of these choices will prove flawed in the unpredictable crucible of the battlefield. For a U.S. military facing diverse global threats, its ability to adapt quickly and effectively to those unforeseen circumstances may spell the difference between victory and defeat. Barno and Bensahel start by providing a framework for understanding adaptation and include historical cases of success and failure. Next, they examine U.S. military adaptation during the nation's recent wars, and explain why certain forms of adaptation have proven problematic. In the final section, Barno and Bensahel conclude that the U.S. military must become much more adaptable in order to address the fast-changing security challenges of the future, and they offer recommendations on how to do so before it is too late.

Responsible Consumption and Production Walter Leal Filho, Anabela Marisa Azul, Luciana Brandli, Pinar Gökcin Özuyar, Tony Wall, 2020-03-04 The problems related to the process of industrialisation such as biodiversity depletion, climate change and a worsening of health and living conditions, especially but not only in developing countries, intensify. Therefore, there is an increasing need to search for integrated solutions to make development more sustainable. The United Nations has acknowledged the problem and approved the "2030 Agenda for Sustainable Development". On 1st January 2016, the 17 Sustainable Development Goals (SDGs) of the Agenda officially came into force. These goals cover the three dimensions of sustainable development: economic growth, social inclusion and environmental protection. The Encyclopedia of the UN Sustainable Development Goals comprehensively addresses the SDGs in an integrated way. It encompasses 17 volumes, each one devoted to one of the 17 SDGs. This volume addresses SDG 12, namely Ensure sustainable consumption and production patterns and contains the description of a range of terms, which allows a better understanding and fosters knowledge. Concretely, the defined targets are: Implement the 10-Year Framework of Programmes on Sustainable Consumption and Production Patterns, all countries taking action, with developed countries taking the lead, taking into account the development and capabilities of developing countries Achieve the sustainable management and efficient use of natural resources Halve per capita global food waste at the retail and consumer levels and reduce food losses along production and supply chains, including post-harvest losses Achieve the environmentally sound management of chemicals and all wastes throughout their life cycle, in accordance with agreed international frameworks, and significantly reduce their release to air, water and soil in order to minimize their adverse impacts on human health and the environment Substantially reduce waste generation through prevention, reduction, recycling and reuse Encourage companies, especially large and transnational companies, to adopt sustainable practices and to integrate sustainability information into their reporting cycle Promote public procurement practices that are sustainable, in accordance with national policies and priorities Ensure that people everywhere have the relevant information and awareness for sustainable development and lifestyles in harmony with nature Support developing countries to strengthen their scientific and technological capacity to move towards more sustainable patterns of consumption and production Develop and implement tools to monitor sustainable development impacts for sustainable tourism that creates jobs and promotes local culture and products Rationalize inefficient fossil-fuel subsidies that encourage wasteful consumption by removing market distortions, in accordance with national circumstances, including by restructuring taxation and phasing out those harmful subsidies, where they exist, to reflect their environmental

impacts, taking fully into account the specific needs and conditions of developing countries and minimizing the possible adverse impacts on their development in a manner that protects the poor and the affected communities Editorial Board Medani P.
