**What regulations are needed to ensure air security?**

United States. Congress. House. Committee on Government Reform. Subcommittee on Energy Policy, Natural Resources, and Regulatory Affairs,2002

*Aviation Security* Stephen M. Lord,2009-05 By deploying armed air marshals onboard selected flights, the Fed. Air Marshal Service (FAMS), plays a key role in helping to protect 29,000 domestic and international flights operated daily by U.S. air carriers. This report examines: (1) FAMS's operational approach or concept of operations for covering flights; (2) to what extent this operational approach has been independently evaluated; and (3) the processes and initiatives FAMS established to address workforce-related issues. This report analyzed documented policies and procedures regarding FAMS's operational approach and a July 2006 classified report based on an independent evaluation of that approach. This report is the public version of a restricted report issued in Dec. 2008. Illus.

Taiwan's Security and Air Power Martin Edmonds,Michael Tsai,2003-10-23 Recent concern about mainland China's intentions towards Taiwan, and more general concern about the risk of instability in the region, has led to growing interest in Taiwan's military strategy. This book brings together a range of experts from the West and from Taiwan itself who examine the key issues connected with Taiwan's air power, which is a key aspect of the China-Taiwan military balance. During the 1990s, Taiwan invested considerable resources in thoroughly re-equipping its air force with modern air defence and strike aircraft equipped with modern missiles, thereby denying China command of the air in any conflict in the short- to medium-term. In the longer-term, air power will remain a crucial influence on the overall balance, as China's efforts to upgrade its own air force's capabilities begin to undermine

Taiwan's current advantages.

*Air Transport Security* Joseph S. Szyliowicz, Luca Zamparini, 2018-08-31 The growing number of terrorist attacks throughout the world continues to turn the interest of scholars and governments towards security issues. As part of the Comparative Perspectives on Transportation Security series, this book provides a multidisciplinary analysis of the security challenges confronting air transportation. The first part encompasses the industry's characteristics and the policy, economic and regulatory issues shaping the security environment. The second provides a comparative analysis of security policies and practices in several key countries.

*Aviation Security* Cathleen A. Berrick, 2009-02 Air carriers remain a front-line defense against acts of terrorism that target the nation's civil aviation system. A key responsibility of air carriers is to check passengers' names against terrorist watch-list records to identify persons who should be prevented from boarding (the No Fly List) or who should undergo additional security scrutiny (the Selectee List). Eventually, the Transport. Security Admin. (TSA) is to assume this responsibility through its Secure Flight program. However, due to program delays, air carriers retain this role. This report examined: (1) the watch-list-matching requirements air carriers must follow that have been established by TSA; and (2) the extent to which TSA has assessed air carriers' compliance with these requirements. Illus.

**Aviation Security** Gerald L. Dillingham, Carol Anderson-Guthrie, 2004-02 To help strengthen aviation security after the 9/11 terrorist attacks, the Congress expanded the size and mission of the Fed. Air Marshal Service and located the Service within the newly created Transport. Sec. Admin. (TSA). Between 11/2001 and 7/2002, the Service grew from fewer than 50 air marshals to thousands, and its mission expanded to include the protection of domestic as well as international flights. In 3/2003, the Service, with TSA, merged into the new Dept. of Homeland Security (DHS).

This report looked at operational and mgmt. control issues that emerged during the rapid expansion of the Service, specifically addressing its: background check procedures and training; mgmt. and info., policies, and proced.; and challenges from its merger. Illus.

**Closing the Gaps in Air Cargo Security** United States. Congress. Senate. Committee on Homeland Security and Governmental Affairs,2011

Aviation Security Cathleen A. Berrick,2006-03 In 2004, an estimated 23 billion pounds of air cargo (AC) was transported within the U.S., about a quarter of which was transported on passenger aircraft. Within the Dept. of Homeland Security, the Transportation Security Admin. (TSA) is responsible for ensuring the security of commercial aviation, incl. AC. To evaluate the status of TSA's efforts to secure domestic AC, this report examined: (1) the extent to which TSA used a risk management approach to guide decisions on securing AC; (2) the actions TSA has taken to ensure the security of AC & the factors that may limit their effectiveness; & (3) TSA's plans for enhancing AC security & the challenges that TSA & industry stakeholders face in implementing these plans. Illustrations.

**Efficient Aviation Security** Brian A. Jackson,Tom LaTourrette,Edward W. Chan,Russell Lundberg,Andrew R. Morral,Dave Frelinger,2012-08-21 Making aviation security more cost-effective is hampered by considerable uncertainty about the terrorist threat, security system performance, and the costs of security measures. This volume focuses on exploring ways to inform decisionmaking despite such uncertainties, providing a set of analyses that help fill some of the current gaps in the assessment of the costs, benefits, and efficiency of aviation security measures and strategies.

Aviation Security Cathleen A. Berrick,2006-03 The U.S. Federal

Air Marshal Service (FAMS) has undergone a number of changes in recent years, including a 2003 transfer from the Transportation Security Admin. (TSA) to the U.S. Immigration & Customs Enforcement Bureau (ICE), & a 2005 transfer from ICE back to TSA. A key aspect of federal air marshals' operating procedures is the discreet movement through airports as they check in for their flight, transit screening checkpoints, & board the aircraft. This report discusses FAMS's: (1) transfer to ICE & key practices that could facilitate its return to TSA; & (2) management of mission-related incidents that affect air marshals' ability to operate discreetly. Includes recommendations.

**Defensor Fortis** Kali Pinckney, 2003-11-01 On the birthday of the United States Air Force, all Army Air Corps resources to include airbases and personnel would be transferred to the new aerospace service. Army Military Police would become Air Police. The nuclear era and cold war would transform Air Police into Security Police, the new emphasis being Security. 1997 brings new re-organization to reflect the emphasis on Force Protection and Anti-Terrorism. Currently, the missions of Law Enforcement, Aircraft Security, and Air Base Defense are incorporated into the versatile and modern USAF Security Forces.

*Aviation Security, Certain Foreign Air Carrier Operators* United States. Federal Aviation Administration, 1979

*The Swiss Air Power* Fiona Lombardi, 2007 Through this comprehensive inquiry, the dissertation has highlighted a series of doctrinal inadequacies since the very beginning of air power in Switzerland and some deficiencies regarding current operational capabilities, which must be rectified so as not to jeopardise homeland security in the long run. **Aviation Security** Peter Chapman, 2019-03-15 The Transportation Security Administration (TSA) has spent billions of dollars on aviation security programs. However, recent attacks involving aircraft and airports in other countries underscore the continued threat to aviation and the need for an effective aviation security program. Chapter 1 examines the extent to which TSA has (1) information on the effectiveness of selected passenger aviation security countermeasures and (2) systematically analyzed the cost and effectiveness tradeoffs among countermeasures. Incidents of aviation workers using access privileges to smuggle weapons and drugs into security-restricted areas and onto planes has heightened awareness about security at commercial airports. TSA, along with airport operators, has responsibility for securing the nations approximately 440 commercial airports. Chapter 2 reports on (1) the extent to which TSA has assessed the components of risk and (2) the extent to which TSA has taken actions to oversee and facilitate security, among other objectives. U.S. policies and strategies for protecting air cargo have focused on two main perceived threats: the in-flight detonation of explosives concealed in an air cargo shipment and the hijacking of a large all-cargo aircraft for use as a weapon to attack a ground target such as a major population center, critical infrastructure, or a critical national security asset. Additionally, there is concern that chemical, biological, or radiological agents or devices that could be used in a mass-casualty attack in the United States might be smuggled as international air cargo as discussed in chapter 3. On 31 August 2016, as part of a shift in U.S. policy toward Cuba, air carriers resumed scheduled commercial flights between the United States and Cuba, a route previously only open to public and private charter carrier operations. Chapter 4 examines (1) the extent to which TSA followed its standard operating procedures

when assessing aviation security at Cuban airports in fiscal years 2012 through 2017; (2) the results of TSAs Cuban airport assessments in fiscal years 2012 through 2017; and (3) the results of TSAs air carrier inspections for Cuba in fiscal years 2016 -- when commercial scheduled air service between the United States and Cuba resumed -- and 2017.
