Radio 2.0 Matthew Lasar,2016-03-14 Welcome to the uncertain world of Radio 2.0—where podcasts, mobile streaming, and huge music databases are the new reality, as are tweeting deejays and Apple's Siri serving as music announcer—and understand the exciting status this medium has, and will continue to have, in our digitally inclined society. How did popular radio in past decades—from President Franklin D. Roosevelt's Fireside Chats in the 1930s through Top 40 music and Rush Limbaugh's talk radio empire—shape American society? How did devices and systems like the iPhone, Pandora, and YouTube turn the radio industry upside-down? Does radio still have a future, and if so, what will we want it to look like? Radio 2.0: Uploading the First Broadcast Medium covers the history and evolution of Internet radio, explaining what came before, where Internet radio came from, and where it is likely headed. It also gives readers a frame of reference by describing radio from its introduction to American audiences in the 1920s—a medium that brought people together through a common experience of the same broadcast—and shows how technologies like digital music and streaming music services put into question the very definition of radio. By examining new radio and media technologies, the book explores an important societal trend: the shift of media toward individualized or personalized forms of consumption.

How to Start Internet Radio Muzec Adem,2020-10-30 Internet radio services are usually accessible from anywhere in the world with a suitable internet connection available; one could, for example, listen to an Australian station from Europe and America. This has made internet radio particularly suited to and popular among expatriate listeners. Nevertheless, some major networks like TuneIn Radio, Entercom, Pandora Radio, iHeartRadio and Citadel Broadcasting (except for news/talk and sports stations) in the United States, and Chrysalis in the United Kingdom, restrict listening to in-country due to music licensing and advertising issues. Internet radio is also suited to listeners with special interests, allowing users to pick from a multitude of different stations and genres less commonly represented on traditional radio.Internet radio (also web radio, net radio, streaming radio, e-radio, IP radio, online radio) is a digital audio service transmitted via the Internet. Broadcasting on the Internet is usually referred to as webcasting since it is not transmitted broadly through wireless means. It can either be used as a stand-alone device running through the internet, or as software running through a single computer. Internet radio is generally used to communicate and easily spread messages through the form of talk. It is distributed through a wireless communication network connected to a switch packet network (the internet) via a disclosed source. Internet radio involves streaming media, presenting listeners with a continuous stream of audio that typically cannot be paused or replayed, much like traditional broadcast media; in this respect, it is distinct from on-demand file serving. Internet radio is also distinct from podcasting, which involves downloading rather than streaming.Internet radio services offer news, sports, talk, and various genres of music-every format that is available on traditional broadcast radio stations. Many Internet radio services are associated with a corresponding traditional (terrestrial) radio station or radio network, although low start-up and ongoing costs have allowed a substantial proliferation of independent Internet-only radio stations. The first Internet radio service was launched in 1993. As of 2017, the most popular internet radio platforms and applications in the world include (but are not limited to) TuneIn Radio, iHeartRadio, and Sirius XM.

Sound Streams Andrew J Bottomley,2020-06-01 In talking about contemporary media, we often use a language of newness, applying words like "revolution" and "disruption." Yet, the emergence of new sound media technologies and content—from the earliest internet radio broadcasts to the development of algorithmic music services and the origins of podcasting—are not a disruption, but a continuation of the century-long history of radio. Today's most innovative media makers are reintroducing forms of audio storytelling from radio's past. Sound Streams is the first book to historicize radio-internet convergence from the early '90s through the present, demonstrating how so-called new media represent an evolutionary shift that is nevertheless historically consistent with earlier modes of broadcasting. Various iterations of internet radio, from streaming audio to podcasting, are all new radio practices rather than each being a separate new medium: radio is any sound media that is purposefully crafted to be heard by an audience. Rather than a particular set of technologies or textual conventions, web-based broadcasting combines unique practices and features and ideas from radio history. In addition, there exists a distinctive conversationality and reflexivity to radio talk, including a propensity for personal stories and emotional disclosure, that suits networked digital media culture. What media convergence has done is extend and intensify radio's logics of connectivity and sharing; sonically mediated personal expression intended for public consideration abounds in online media networks. Sound Streams marks a significant contribution to digital media and internet studies. Its mix of cultural history, industry research, and genre and formal analysis, especially of contemporary audio storytelling, will appeal to media scholars, radio and podcast practitioners, audio journalism students, and dedicated podcast fans.

A Guide to Creating Your Own Internet Radio Station Kym Kostos,2014-12-20 So, you think you have what it takes to be a DJ and broadcaster? Awesome news for you! And guess what? This is very lucky news for you because in today's technology, it allows anyone who wants to do what was once a limited to a very small percentage of people. But, now you can become an online / internet DJ and / or broadcaster! You can actually be the DJ, the station manager and even the program director who decides what to play on the station, because it's all on the internet! There are several ways and approaches you can take in creating a streaming Internet radio station. Which one you decide to choose depends on what your goals are and what type of ways you wish to go about doing them in. If you are really motivated and inspired to start an Internet-based radio station that operates for the sole purpose of profit and revenue generation, your direction and approach will be different than from the individual who just wants to set up an Internet radio station for the only purpose of simply sharing his or her favorite opinions, information or music with friends or people with the same interests as their own. There are many excellent options for the beginner that of which require very little technical knowledge. If you know how to create or put together MP3 format files, upload them onto a server and then choose some options, you can reach a world-wide audience! If this really interests you, keep on reading because you're about to enter the world of online radio.

How Internet Radio Can Change the World Eric Lee,2005 How Internet Radio Can Change the World: An Activist's Handbook is essential reading for trade unionists, environmental campaigners, human rights activists-anyone who is working to change the world. Author Eric Lee has pioneered the use of the Internet by unions around the globe, and the website he established in 1998, LabourStart, now appears in 19 languages and is used by thousands of activists every day. In early 2004, the author launched the first online labor radio station and this book reveals exactly what was involved in setting it up. It also delves into the short history of Internet radio, revealing how what began as a radical project to reinvigorate the liberal wing of the Democratic Party was turned into a commercial success-and yet remains a vital tool for activists. The book clearly explains both how to listen to Internet radio-and how to set up your own station.

HOW TO START YOUR OWN INTERNET RADIO STATION...A Step by Step Guide D. W. Lindsey,2023-10-16 Welcome to starting a local radio station. Every year more and more people enjoy the benefits of independent radio stations in their communities. Since 2001, the creation and growth of local and independent media around the world has been remarkable; this achievement is part of the growth of the entire media sector, including commercial media, government media and community media. Internet radio station, online radio station, network radio or Iweb radio is an audio stream that can be broadcast over the Internet. This is called a stream, radio stream or listening link. Therefore, you cannot listen to it with normal radio equipment. As with classic radios that we mostly listen to in the car, there are general internet and thematic internet radios. Today we know that there are thousands of internet radio stations around the world, but it is impossible to give an exact number because technically anyone can start their own internet radio station overnight.

Emerging Trends of Internet Radio with Special Reference to Education Priyadarshini Kiran,2024-02-14 Radio is the technology of using radio waves to carry information, such as sound, by systematically modulating the properties of electromagnetic energy waves transmitted through space, such as amplitude, frequency, phase, or pulse width. Radio communication touches the sky day by day. Today the concept of communication has totally changed because of the advancement of internet technology. Internet radio is a baby of this millennium holding the hands of an older technology. Internet radio touches all the possible perspectives of media convergence. Internet radio is also called web radio, net radio, streaming radio, and online radio. It is a digital audio service transmitted via the internet. Broadcasting on the Internet is usually referred to as webcasting since it is not transmitted broadly through wireless. It can either be used as a standalone device running through the internet, or as software running through a single computer system. A podcast is an episodic series of digital audio or video files which a user can download and listen to. It is often available for subscription, so that new episodes are automatically downloaded via web syndication to the user's own computer or mobile phone. On the other hand live streaming refers to online streaming media simultaneously recorded and broadcast real time. The context of the present thesis is about how the idea of internet radio/audio has taken root in the field of education, entertainment and information. The internet radio, was in its infancy at the beginning of this millennium, when it was adopted only by people in the developed nations. Of late, it has become affordable in the developing nations like India and other Countries as well. The latter half of the twentieth century witnessed the power of radio broadcasting in the field of development of communication India's Green Revolution in the 60's and 70's, owe a lot to Radio.
