The Many Faces of Shame Donald L. Nathanson,1987-06-01 For almost a century the concept of guilt, as embedded in drive theory, has dominated psychoanalytic thought. Increasingly, however, investigators are focusing on shame as a key aspect of human behavior. This volume captures a range of compelling viewpoints on the role of shame in psychological development, psychopathology, and the therapeutic process. Donald Nathanson has assembled internationally prominent authorities, engaging them in extensive dialogue about their areas of expertise. Concise introductions to each chapter place the authors both historically and theoretically, and outline their emphases and contributions to our understanding of shame. Including many illustrative clinical examples, the book covers such topics as the relationship between shame and narcissism, shame's central place in affect theory, psychosis and shame, and shame in the literature of French psychoanalysis and philosophy.

The proposed Poverty Reduction and Growth Facility-supported program builds on this record of policy implementation. Fiscal reform should be centered on a sustained revenue effort and investments in infrastructure and human capital. The government has been commended for the flexible management of the exchange rate. The Principles That Facilitate Successful and Timely Degree Completion Elizabeth Paradiso Urassa,2021-02-03 Scholarly evidence indicates that almost fifty percent of people who commence higher education delay completing their studies, and other dropouts. Most governments have introduced a policy that requires students to complete their studies within a limited time, especially the research students (master's and doctoral degree students). The implementation of the policy has also caused tension in higher education students' learning and supervision. Academics have debated and written about the problem widely, and it is no longer a

discreet encounter for higher education stakeholders. Despite the scholarly effort of disclosing the challenges' depth, no literature has adequately supported students to implement the policy effectively and successfully. This book attempts to fill the gap by guiding higher education students on observing ten major principles for timely and successful completion. If students perceive, learn, and practice the guidance in this book, they will attain their degree anywhere (in a physical setting, online, home, and abroad) worldwide. The principles might be useful in the orientation programs for first-year students in universities and colleges. First, students ought to comprehend factors that might contribute to the delay completion and dropout. Second, they must analyze and communicate their needs and requirements from the beginning of their enrolment while re-examining their association, networking, self-management, and self-leadership. The book also reminds higher education students to build healthy habits to support developing cognitive, affective, and psychomotor domains and remain active and creative. Four categories of students' personalities are discussed to urge students to evaluate who they are and whether they are problem solvers, informers, implementers, or workforce to society. The understanding can support them chose the projects that align with what they are to society. Self-awareness and leadership may make the learning task more manageable, enjoyable, and meaningful, and filling the knowledge gap can be realized timely.
