Atherosclerosis VI F. G. Schettler,Antonio Gotto,G. Middelhoff,A. J. R. Habenicht,K. R.
Jurutka,2012-12-06 In 1982 Berlin was host for the second time to the International Symposium on
Atherosclerosis. In 1973 the third symposium was held there, following the first in Athens -opened by
the unforgettable Paul D. White -and the second in Chicago, where the great gentlemen of
atherosclerosis research - Louis Katz and Irving Page - left their special imprint on the meeting. Since
the third symposium in Berlin impressive advances have been made in the field of atherosclerosis.
The symposia in Tokyo in 1976 and in Houston in 1979 introduced important new knowledge from
current research, stimulating worldwide interest; Berlin highlighted the latest developments. The
International Atherosclerosis Society (IAS) provides an international forum for the entire field of
atherosclerosis research. Its main purpose is to apply the results of basic research to clinical
medicine, and thereby to benefit the practitioner. Prevention and rehabilitation are of special
importance. Intensified international cooperation is urgently needed at all levels. A declared goal of
the IAS is contact between young investigators and between international research and work groups.
Participating in the Berlin meeting were 1400 researchers from 42 nations. This illustrates the growing
interest in atherosclerosis as the leading cause of death in developed societies. However, the

incidence of atherosclerosis is increasing worldwide, although there are national differences in the pattern and appearance of the disease; this was documented at the Berlin Symposium.
