**Amazingly Amusing A-Z Animal Facts for Kids (and Their Adults!)** a Reluctant Mom, 2022-11-14  
There are 1.371 million animal species on Earth, each with their own quirky characteristics... keep reading to learn some bonkers and hysterical facts about a few of them! Like the time my friend's hearing aid was stolen by a kookaburra Or the time I saw a dolphin beach itself to eat a school of fish Or the bizarre courting rituals of echidnas Or that cockroaches can survive without their heads Or that platypuses glow in the dark! People won't protect things they don't love. People won't love things they don't know. Here's your kid's chance (and your chance, too) to get to

know some awesome, amazing, and amusing animals! In the book, you'll also discover: Which animals have technicolor bodies Which insects have been known to engage in mutiny Which animals are the most dedicated parents Which population of insects weigh more than humans! I'm Mary Beth (aka. aReluctantMom.com), a wildlife biologist who has spent years working on wildlife conservation issues both as a field biologist and as a lobbyist in Washington, DC. In the field, I implemented conservation projects for birds and marine animals; in DC, I fought to pass natural resource conservation legislation and distributed millions in funding for fish and wildlife conservation programs. In short, I LOVE ANIMALS and was reluctant to leave my work behind for maternity leave. But now that I'm a mom, I'm trying to instill that same love of animals in my kiddo. It fills my heart to see him try to move turtles out of the road, rescue jellyfish on the beach, and save moths that get into the house. The world around us is fascinating, as is the wildlife in it. My goal is to inspire a love and respect for this planet that'll make the next generation socially and environmentally conscious and motivate them to protect the earth, its inhabitants, and its resources. If you and your kiddos want to discover amazingly amusing wildlife facts that will blow people's minds when you share them, scroll and purchase this book now! Look deep, deep into nature, and then you will understand everything better. Albert Einstein, Einstein in Berlin

*Animals in the Ancient World from A to Z* Kenneth F. Kitchell Jr., 2014-06-23 The ancient Greeks and Romans lived in a world teeming with animals. Animals were integral to ancient commerce, war, love, literature and art. Inside the city they were found as pets, pests, and parasites. They could be sacred, sacrificed, liminal, workers, or intruders from the wild. Beyond the city domesticated animals were herded and bred for profit and wild animals were hunted for pleasure and gain alike. Specialists like Aristotle, Aelian, Pliny and Seneca studied their anatomy and behavior. Geographers and travelers described new lands in terms of their animals. Animals are to be seen on every possible artistic medium, woven into cloth and inlaid into furniture. They are the subject of proverbs, oaths and dreams. Magicians, physicians and lovers turned to animals and their parts for their crafts. They paraded before kings, inhabited palaces, and entertained the poor in the arena. Quite literally, animals pervaded the ancient world from A-Z. In entries ranging from short to long, Kenneth Kitchell offers insight into this commonly overlooked world, covering representative and intriguing examples of mammals, reptiles, amphibians and invertebrates. Familiar animals such as the cow, dog, fox and donkey are treated along with more exotic animals such as the babirusa, pangolin, and dugong. The evidence adduced ranges from Minoan times to the Late Roman Empire and is taken from archaeology, ancient authors, inscriptions, papyri, coins, mosaics and all other artistic media. Whenever possible reasoned identifications are given for ancient animal names and the realities behind animal lore are brought forth. Why did the ancients think

hippopotamuses practiced blood letting on themselves? How do you catch a monkey? Why were hyenas thought to be hermaphroditic? Was there really a vampire moth? Entries are accompanied by full citations to ancient authors and an extensive bibliography. Of use to Classics students and scholars, but written in a style designed to engage anyone interested in Greco-Roman antiquity, *Animals in the Ancient World from A to Z* reveals the extent and importance of the animal world to the ancient Greeks and Romans. It answers many questions, asks several more, and seeks to stimulate further research in this important field.

As twins Alex and Zoe are pondering the names of the animals at the zoo, the Little Angels appear and begin to tell the story of the job that God gave to Adam in the Garden of Eden -- to name each animal. Charming illustrations join the text, which names an animal for each letter of the alphabet. This book is great fun -- a biblical story, an alphabet primer, and a romp through the zoo all rolled into one. Ages 2-5.
