Bradley Steffens

Addicted to Social Media Carla Mooney, 2019 As of 2018 approximately 3.1 billion people, roughly one-third of the world's population, use social media to communicate and connect with others. Yet for some users, what began as a fun habit has grown into a consuming addiction that can have significant negative effects on their lives. *Addicted to Social Media* presents a realistic picture of addiction, the effects of addiction on people's lives, and how addiction can be overcome.--Publisher's description.

An obsession with social media can damage personal, family, and professional relationships and lead to severe anxiety and depression. *Social Media Addiction* presents a realistic picture of what is happening on social media, who's most affected, and what is being done to address these troubling issues.

Cultural Criminology and the Carnival of Crime Mike Presdee, 2003-09-02 Cultural Criminology and the Carnival of Crime attempts to make sense of the current increase in violence, cruelty, hate and humiliation, which has come to permeate daily life. The text argues that an overly organised economic world has provoked a widespread desire for extreme, oppositional forms of popular and personal pleasure. This desire has resulted in a cathartic 'second life' of illicit pleasures often deemed criminal by those in power. Amongst the exciting issues Mike Presdee addresses are: * joyriding * street crime * antisocial behaviour in private via the internet * hate, hurt and humiliation in popular culture * the popularisation and criminalisation of sadomasochism and dance music cultures.

Renaissance Characters Eugenio Garin, 1997-05-09

Compared to the Middle Ages, the Renaissance is brief—little more than two centuries, extending roughly from the mid-fourteenth century to the end of the sixteenth century—and largely confined to a few Italian city states. Nevertheless, the epoch marked a great cultural shift in sensibilities, the dawn of a new age in which classical Greek and Roman values were reborn and human values in all fields, from the arts to civic life, were reaffirmed. With this volume, Eugenio Garin, a leading Renaissance scholar, has gathered the work of an international team of scholars into an accessible account of the people who animated this decisive moment in the genesis of the modern mind. We are offered a broad spectrum of figures, major and minor, as they lived their lives: the prince and the military commander, the cardinal and the courtier, the artist and the philosopher, the merchant and the banker, the voyager, and women of all classes. With its concentration on the concrete, the specific, even the anecdotal, the volume offers a wealth of new perspectives and ideas for study.

This book is designed for all students, teachers, practitioners and researchers in architecture and design. To enable all readers to explore the book in a flexible way, the authors' words are always found on the left hand page. On the right are diagrams, illustrations and the voices of designers, teachers and students and occasionally others

too. 'Design Expertise' provides a provocative new reading on the nature of design and creative thought.

The Embodied Image Juhani Pallasmaa, 2011-05-16 The Embodied Image The Embodied Image: Imagination and Imagery in Architecture Juhani Pallasmaa All artistic and architectural effects are evoked, mediated and experienced through poeticised images. These images are embodied and lived experiences that take place in 'the flesh of the world', becoming part of us, at the same time that we unconsciously project aspects of ourselves on to a conceived space, object or event. Artistic images have a life and reality of their own and they develop through unexpected associations rather than rational and causal logic. Images are usually thought of as retinal pictures but profound poetic images are multi-sensory and they address us in an embodied and emotive manner. Architecture is usually analysed and taught as a discipline that articulates space and geometry, but the mental impact of architecture arises significantly from its image quality that integrates the various aspects and dimensions of experience into a singular, internalised and remembered entity. The material reality is fused with our mental and imaginative realm. The book is organised into five main parts that look at in turn: the image in contemporary culture; language, thought and the image; the many faces of the image; the poetic image; and finally the architectural image. The Embodied Image is illustrated with over sixty images in pairs, which are diverse in subject. They range from scientific images to historic artistic and architectural masterpieces. Artworks span Michelangelo and Vermeer to Gordon Matta- Clark and architecture takes in Modern Masters such as Mies van der Rohe, Le Corbusier and Alvar Aalto, as well as significant contemporary works by Steven Holl and Daniel Libeskind.
