Making the Managerial Presidency Peri E. Arnold,1998 Examines the political history of administrative reform undertaken by 20th-century presidents. Attempting to explain the growth of modern bureaucracy within an 18th-century framework and the expansion of presidential control over administrative powers, the author explores the relationship between administrative theory and the dilemmas posed for a developing administrative state by the separation of powers. He also looks at and compares successive cases of presidentially initiated comprehensive reform planning, in order to understand the implications for the president's institutional role. The PerformanceStat Potential Robert D. Behn,2014-06-24 It started two decades ago with CompStat in the New York City Police Department, and quickly jumped to police agencies across the U.S. and other nations. It was adapted by Baltimore, which created CitiStat—the first application of this leadership strategy to an entire jurisdiction. Today, governments at all levels employ PerformanceStat: a focused effort by public executives to exploit the power of purpose and motivation, responsibility and discretion, data and meetings, analysis and learning, feedback and follow-up—all to improve government's performance. Here, Harvard leadership and management guru Robert Behn analyzes the leadership behaviors at the core of PerformanceStat to identify how they work to produce results. He examines how the leaders of a variety of public organizations employ the strategy—the way the Los Angeles County Department of Public Social Services uses its DPSSTATS to promote economic independence, how the City of New Orleans uses its BlightStat to eradicate blight in city neighborhoods, and what the Federal Emergency Management Agency does with its FEMASat to ensure that the lessons from each crisis response, recovery, and mitigation are applied in the future. How best to harness the strategy's full capacity? The PerformanceStat Potential explains all.
