Lawyers on Trial Richard L. Abel,2011 People need lawyers for many things, including tax and immigration advice, drafting contracts, preparing wills, buying and selling houses, forming and dissolving companies, and representation and advice during divorce, probate, personal injury and criminal charges. But many people do not trust lawyers. With good reason, they fear that lawyers will neglect or overcharge them, betray them out of self-interest or on behalf of others, or obstruct the pursuit of justice out of overzealousness. Although the legal profession drafts ethical rules, law schools teach those rules, the bar exam tests lawyers' knowledge, and disciplinary bodies enforce them, we know that violations by lawyers are all too common. *Lawyers on Trial: Understanding Ethical Misconduct by California Attorneys*, by Richard L. Abel, presents six dramatic accounts of California lawyers who betrayed their clients and the legal system. Through the detailed records of the disciplinary proceedings, it examines some of the most common complaints about lawyers: chasing ambulances, charging excessive fees, violating conflict of interest rules, and displaying excessive zeal. These complex and compelling dramas serve to make the ethical rules, and the temptations they seek to curb, come vividly alive for law students, lawyers, those thinking of becoming lawyers, anyone who has been or might some day be a client, and the general public. The lessons to be drawn from these situations can help the legal profession and the public devise better strategies for ensuring that lawyers abide by the rules.

Worst-Case Scenarios Cass R. Sunstein,2009-05-15 Nuclear bombs in suitcases, anthrax bacilli in ventilators, tsunamis and meteors, avian flu, scorchingly hot temperatures: nightmares that were once the plot of Hollywood movies are now frighteningly real possibilities. How can we steer a path between willful inaction and reckless overreaction? Cass Sunstein explores these and other worst-case scenarios and how we might best prevent them in this vivid, illuminating, and highly original analysis. Singling out the problems of terrorism and climate change, Sunstein explores our susceptibility to two opposite and unhelpful reactions: panic and utter neglect. He shows how private individuals and public officials might best respond to low-probability risks of disaster—emphasizing the need to know what we will lose from precautions as well as from inaction. Finally, he offers an understanding of the uses and limits of cost-benefit analysis, especially when current generations are imposing risks on future generations. Throughout, Sunstein uses climate change as a defining case, because it dramatically illustrates the underlying principles. But he also discusses terrorism, depletion of the ozone layer, genetic modification of food, hurricanes, and worst-case scenarios faced in our ordinary lives. Sunstein concludes that if we can avoid the twin dangers of overreaction and apathy, we will be able to ameliorate if not avoid future catastrophes, retaining our sanity as well as scarce resources that can be devoted to more constructive ends.
