Bauxite Mining in Africa Johannes Knierzinger,2017-09-07 This book deals with the consequences of the inclusion of African states and communities in the global aluminium chain. The so-called “New Scramble for Africa” of the 2000s illustrated how seriously African living conditions are affected by continuous cycles of boom and bust, and how strongly the quality of life currently depends on the investment decisions and corporate social responsibility policies of transnational corporations. Taking the example of the global production network of bauxite and aluminium, the author focuses on the socio-political aspects of this dependency, which he achieves through the conducting of a series of interviews with various involved parties.

An Evaluation of the Aluminum Oxide Humidity Element Frederick J. Brousaides,1968 The electrical response of a number of aluminum oxide humidity elements to various conditions of humidity and temperature was examined. The limitations of these elements in meteorological application in the light of hysteresis effects and RH insensitivity are discussed. (Author).

Disorders of Mineral Metabolism Felix Bronner,Jack W. Coburn,2014-05-10 Disorders of Mineral Metabolism, Volume I: Trace Minerals covers the pathophysiology of clinically relevant minerals and elements. This volume focuses on minerals whose average daily intake is under 50 mg. This text is composed of 12 chapters that tackle the clinical relevance and essentiality of various trace minerals in the human body, with particular emphasis on the disorders due to their abnormal metabolism. The trace mineral and elements considered in this volume include iron, coppers, zinc, lead, nickel, manganese, chromium, molybdenum, cadmium, aluminum, tin, lithium, and fluoride. Each chapter discusses the properties, body requirements, analysis, nutritional interactions, and toxicity of the mineral. This book will prove useful to biochemists, pathophysiologists, and workers in the medical field.

Catalysis and Zeolites Jens Weitkamp,Lothar Puppe,2013-04-17 Zeolites occur in nature and have been known for almost 250 years as alumino silicate minerals. Examples are clinoptilolite, mordenite, offretite, ferrierite, erionite and chabazite. Today, most of these and many other zeolites are of great interest in heterogeneous catalysis, yet their naturally occurring forms are of limited value as catalysts because nature has not optimized their properties for catalytic applications and the naturally occurring zeolites almost always contain undesired impurity phases. It was only with the advent of synthetic zeolites in the period from about 1948 to 1959 (thanks to the pioneering work of R. M. Barrer and R. M. Milton) that this class of porous materials began to play a role in catalysis. A landmark event was the introduction of synthetic faujasites (zeolite X at first, zeolite Y slightly later) as catalysts in fluid catalytic cracking (FCC) of heavy petroleum distillates in 1962, one of the most important chemical processes with a worldwide capacity of the order of 500 million t/a. Compared to the previously used amorphous silica-alumina catalysts, the zeolites were not only orders of magnitude more active, which enabled drastic process engineering improvements to be made, but they also brought about a significant increase in the yield of the target product, viz. motor gasoline. With the huge FCC capacity worldwide, the added value of this yield enhancement is of the order of 10 billion US \$ per year.

Geomorphology of the Tropics Alfred Wirthmann,2013-04-17 Geomorphological research in the humid to seasonal tropics has primarily concentrated on the most characteristic landform assemblage of this zone, namely that of stepped, largely undissected etchplains, often dotted with inselbergs and cutting across ancient basement rocks. Although the author discusses extensively this subject, he puts particular emphasis on the differences of chemical weathering and land-forming processes on rocks of various lithology and structure. This contrast becomes most evident, when comparing the highly resistant quartzitic sediments often covering the basement rocks with the easily weathered volcanics, e.g. the Deccan traps of India. The book was first published in German in 1987. However, the present version is much more than a translation, encompassing a range of new ideas and findings in the field of tropical geomorphology. The number of maps and illustrations has also been increased.

Integrated Optics Robert G. Hunsperger,2009-04-29 Integrated Optics explains the subject of optoelectronic devices and their use in integrated optics and fiber optic systems. The approach taken is to emphasize the physics of how devices work and how they can be (and have been) used in various applications as the field of optoelectronics has progressed from microphotronics to nanophotonics. Illustrations and references from technical journals have been used to demonstrate the relevance of the theory to currently important topics in industry. By reading this book, scientists, engineers, students and engineering managers can obtain an overall view of the theory and the most recent technology in Integrated Optics.
