**Take Control of Apple Home Automation** Josh Centers, 2023-02-22 Manage your smart home

with Apple's HomeKit platform Version 1.5, updated February 22, 2023 Thanks to Apple's HomeKit platform, you can easily configure smart home devices (such as light bulbs, outlets, thermostats, sensors, cameras, and door locks) from a variety of manufacturers to behave exactly as you need them to; integrate them with a hub such as a HomePod or Apple TV; and control them with an iOS/iPadOS device, a Mac, an Apple Watch, Siri commands, or automated programming. This book gives you all the information you need to get started. Smart home devices are everywhere these days—you can buy internet-connected light bulbs, thermostats, door locks, sensors, and dozens of other products. But these devices aren't very smart on their own. Apple's HomeKit platform offers a way to integrate, monitor, control, and automate smart home devices from a wide variety of manufacturers. Using the built-in Home app on a Mac or iOS/iPadOS device (perhaps along with third-party apps), you can connect to your various smart devices, see what they're up to, control them, and even get them to operate on a schedule or respond to changing conditions in your home automatically. Even with HomeKit, however, home automation can be a daunting prospect. That's why Josh Centers wrote *Take Control of Apple Home Automation*. The book walks you carefully through every step of the process, showing you how you can start with a basic system that costs less than \$50 and work your way up to as much complexity as you want or need. And you don't have to be a computer geek to simplify and improve your life with HomeKit-compatible products. Even if you don't know a wire nut from a macadamia or which end of a screwdriver to stick in a socket (spoiler: neither!), Josh's thorough advice will enable you to work wonders in your home. In this book, you'll learn:

- The most common home automation myths (and why you shouldn't worry about them)
- How to choose HomeKit-compatible devices that meet your needs, and which products you might want to avoid
- Exactly what HomeKit is, what it does, how it works, and what its limitations are
- Why you

need a hub (in the form of an Apple TV, HomePod, or iPad) and how to set it up • Important safety rules for working with electrical products, especially those that require wiring • How to install advanced accessories such as a smart switch, thermostat, or door/window sensor—including illustrated, step-by-step instructions • What Apple's Home app for Mac and iOS/iPadOS does—and how to configure homes, zones, rooms, accessories, services, and scenes • Tips for controlling your smart home using a Mac, iOS/iPadOS device, Apple Watch, HomePod, or Siri • Ways to automate your smart home using schedules, sensors, geofencing, and other tools (without making your house seem haunted) • The best ways to troubleshoot home automation problems This book was sponsored by Elgato (the original makers of the Eve line of HomeKit devices, which spun off into a separate company in 2018), so many of the examples feature Eve products, although nearly all the advice in the book is applicable to HomeKit products from any manufacturer. (You'll also read about working with Philips Hue bulbs, ecobee thermostats, and numerous other devices.) If you're an Apple user who's interested in joining the smart home revolution—or adding even more smarts to your existing setup—this book is the ideal guide.

**Smart Home (in Living Color)** Cathy Young, Michael Young, 2018-05-25 #1 New Release in Do-It-Yourself Home Improvement\*This is the same book as Smart Home, but text and photos are in color for a better reading experience. The idea of a smart home includes a wide variety of emerging technologies. Examples include voice controlled digital assistants, robots, smart thermostats and blinds, and unifying platforms like SmartThings and IFTTT (if this, then that). In my home, I incorporated a combination of these things. Some overlap. The technology is futuristic and, frankly, cool; but it required me to change the way I interacted with the world around me. Once my smart home was set up the way I wanted, I had to be mindful that it was there to help me - albeit not necessarily on my terms. I had to learn how to interact with my digital assistants. That journey is

still unfolding, and I expect my smart home to keep expanding and improving as more things are added. This book started simply as the notes that my wife kept during our recent personal experiences with selecting and setting up smart home devices after we built a new house. While whole-home solutions like HomeSeer or SmartThings are available in the market, we selected what we felt was the best product for each task, and made sure they would all integrate with our existing home. (In the interest of full disclosure, references to me or our attribute more credit to me than is due. She was the driving force and brains behind the whole endeavor!) While researching our project, we read a plethora of reviews from folks like us (real people, that is). Some admittedly were more insightful than others, but we gained valuable insights into what to avoid, what questions to ask, etc. and we found some great ideas. If you are a DIY type or just want a general idea of what is going on with smart homes, this book will show you a bit of what is possible. By the end of this book, indeed, I hope that you will be comfortable in the Internet of Things (or IoT) world of connected devices, digital assistants, skills or IFTTT applets. When you look at the table of contents, it answers the question of what a smart home can do for you. I also tried to organize it in such a way that you can quickly find what you're looking for. \* Learn smart home terminology and what really matters when buying equipment. \* Select good equipment and plan for future growth. \* Set up and connect everything. \* Maintain your smart home.tags: alexa, smart home, smart house, smart sensors, amazon echo, home automation, connected things, echo, echo dot, echo show, home security, insteon, smart home technology, siri, google assistant, digital assistant, personal assistant, bixby, cortana, ifttt, smartapps, smart things, smarthings, smart devices, smart speakers, smart cities, internet of things, iot, smart locks, samsung artik, artik, alexa skills, home security, qubino, yunomi
