Successful Elite Sport Policies Veerle De Bosscher,Simon Shibil,Hans Westerbeek,Maarten van Bottenburg,2015-08-14 How can nations improve their chances of winning medals in international sport? This book deals with the strategic policy planning process that underpins the development of successful national elite sport development systems. Drawing on various international competitiveness studies, it examines how nations develop and implement policies that are based on the critical success factors that may lead to competitive advantage in world sport. An international group of researchers joined forces to develop theories, methods and a model on the Sports Policy factors Leading to International Sporting Success (SPLISS). The book presents the results of the large-scale international SPLISS-project. In this project the research team identified, compared and contrasted elite sport policies and strategies in place for the Olympic Games and other events in 15 distinct nations. With input from 58 researchers and 33 policy makers worldwide and the views of over 3,000 elite athletes, 1,300 high performance coaches and 240 performance directors, this work is the largest benchmarking study of national elite sport policies ever conducted. The nations taking part in SPLISS are: • Americas: Brazil and Canada • Asia: Japan and South Korea • Europe: Belgium (Flanders & Wallonia), Denmark, Estonia, Finland, France, the Netherlands, Northern Ireland, Portugal, Spain, Switzerland • Oceania: Australia

London 2012 Games Great Britain. Parliament. House of Commons. Culture, Media, and Sport Committee,2008 London 2012 Games : The next lap, sixth report of session 2007-08, Vol. 2: Oral and written Evidence
Success and Failure of Countries at the Olympic Games Danyel Reiche,2016-07-01 The Olympic Games is undoubtedly the greatest sporting event in the world, with over 200 countries competing for success. This important new study of the Olympics investigates why some countries are more successful than others. Which factors determine their failure or success? What is the relationship between these factors? And how can these factors be manipulated to influence a country's performance in sport? This book addresses these questions and discusses the theoretical concepts that explain why national sporting success has become a policy priority around the globe. Danyel Reiche reassesses our understanding of success in sport and challenges the conventional explanations that population size and economic strength are the main determinants for a country's Olympic achievements. He presents a theory of countries' success and failure, based on detailed investigations of the relationships between a wide variety of factors that influence a country's position in the Olympic medals table, including geography, ideology, policies such as focusing on medal promising sports, home advantage and the promotion of women. This book fills a long-standing gap in literature on the Olympics and will provide valuable insights for all students, scholars, policy makers and journalists interested in the Olympic Games and the wider relationship between sport, politics, and nationalism.

Mega-event Cities: Urban Legacies of Global Sports Events Valerie Viehoff,Gavin Poynter,2016-03-02 Mega-events represent an important moment in the life of a city, providing a useful lens through which we may analyse their cultural, social, political and economic development. In the wake of the International Olympic Committee's (IOC's) concerns about 'gigantism' and wider public concerns about rising costs, it was imperative in the C21st to demonstrate the long term benefits that arose for the city and nations from hosting premier sporting events. 'London 2012' was the first to integrate the concept of legacy from the moment a bid to host the Olympic and Paralympic Games was being considered. London proposed an ambitious programme of urban renewal for East London. Subsequent host city bids have adopted the 'legacy narrative' and, as this book demonstrates, aligned this to major schemes of urban development and renewal. Bringing together scholars, practitioners and policy makers, this book focuses upon the legacies sought by cities that host major sports events. It analyses how governments, the IOC and others define and measure 'legacy'. It also focuses upon the challenges and opportunities facing future host cities of mega-events, looking at their aspirations and the intended impact upon their domestic and international development. It questions what the global shift in geographical location of mega-events means for sports development and the business of sport, what the attractions are for cities seeking to harness the hosting of a mega-event, and whether there may be longer term consequences for the bidding and hosting major sporting events in the wake of the widespread social unrest that accompanied the preparations in Brazil for hosting the FIFA World Cup (2014) and the summer Olympics (2016) and in Turkey, where there was significant opposition to bid for the 2020 summer Olympiad.

House of Commons - Culture, Media and Sport Committee: Supporting The Creative Economy - Volume I: HC 674 Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee,2013-09-26 This report warns that the extraordinary success of the UK's creative industries may be jeopardised by any dilution of intellectual property rights and the failure to tackle online piracy. The

Committee also strongly condemns the failure of Google in particular to tackle access of copyright infringing websites through its search engine. Such illegal piracy, combined with proposals arising from the Hargreaves review to introduce copyright exceptions, and a failure to strengthen copyright enforcement as envisaged by the Digital Economy Act 2010, together threaten the livelihoods of the individuals and industries that contribute over £36 billion annually to the UK economy. Also, the Olympics No Marketing Rights scheme is excessively restrictive and is preventing British creative companies from realising the benefits they deserve from the Olympic legacy. The Committee calls for: a central champion of Intellectual Property in Government to promote and protect the interests of UK intellectual property; the maximum penalty for serious online IP theft to be increased to 10 years imprisonment, in line with the punishment for such offences in the physical world; more evidence and scrutiny before any exceptions to copyright such as those suggested by Hargreaves are applied; redoubled efforts to ensure that the video games tax credit is approved by the European Commission and introduced as soon as possible; reforms to the income tax and tax reliefs systems to recognise adequately the freelance nature of much creative work; greater recognition of the importance of arts subjects in the curriculum.

Innovation in Developmental Psychology, Education, Sports, and Arts: Advances in Research on Individuals and Groups Georgeta Panisoara, Alexandra Predoiu, Radu Predoiu, Andrzej Piotrowski, 2023-10-27 Due to the expansion of knowledge around us we are “besieged” by a multitude of data that attracts our attention and pressures us to interact with it, motivating us to receive information, memorize, and form new skills. Children, adolescents, and adults’ social, emotional, intellectual, and psychomotor development need to be taken into account when determining their ability to meet the demands in education or in a given sport or arts. Growth and technological advances in the areas of educational psychology, sport, and art have changed considerably over time, such as in relation to students’ and athletes’ preparation and performance. In this context, psychology often what makes the difference between good and great students (or athletes), between first and last place.

How Canadians Communicate V David Taras, Christopher Waddell, 2016-03-15 Fewer Canadians than ever are lacing up skates, swimming lengths at the pool, practicing their curve ball, and experiencing the thrill of competition. However, despite a decline in active participation, Canadians spend enormous amounts of time and money on sports, as fans and followers of sporting events and sports culture. Never has media coverage of sports been more exhaustive, and never has it been more driven by commercial interests and the need to fuel consumerism, on which corporate profits depend. But the power plays now occurring in the arena of sports are by no means solely a matter of money. At issue as well in the media capture of sports are the values that inform our daily lives, the physical and emotional health of the population, and the symbols so long central to a sense of Canadian identity. Writing from a variety of perspectives, the contributors to this collection set out to explore the impact of the media on our reception of, and attitudes toward, sports—to unpack the meanings that sports have for us as citizens and consumers. Some contributors probe the function of sports as spectacle—the escalation of violence, controversies over drug use, and the media’s coverage of tragic deaths—while others shed light on the way in which the media serve to transform sports into a vehicle for the expression of identity and nationalism. The goal is not to score points but to prompt critical discussion of why sports matter in Canadian life and culture and how they contribute to the construction of identity.

Olympic Cities John R. Gold, Margaret M. Gold, 2016-07-11 The first edition of *Olympic Cities*, published in 2007, provided a pioneering overview of the changing relationship between cities and the modern Olympic Games. This substantially revised and enlarged third edition builds on the success of its predecessors. The first of its three parts provides overviews of the urban legacy of the four component Olympic festivals: the Summer Games; Winter Games; Cultural Olympiads; and the Paralympics. The second part comprises systematic surveys of seven key aspects of activity involved in staging the Olympics: finance; place promotion; the creation of Olympic Villages; security; urban regeneration; tourism; and transport. The final part consists of nine chronologically arranged portraits of host cities, from 1936 to 2020, with particular emphasis on the six Summer Olympic and Paralympic Games of the twenty-first century. As controversy over the growing size and expense of the Olympics, with associated issues of accountability and legacy, continues unabated, this book’s incisive and timely assessment of the Games’ development and the complex agendas that host cities attach to the event will be essential reading for a wide audience. This will include not just urban and sports historians, urban geographers, event managers and planners, but also anyone with an interest in the staging of mega-events and concerned with building a better understanding of the relationship between cities, sport and culture.
