**Take the Rich Off Welfare** Mark Zepezauer, 2004 When the first version of this book came out in 1996, on the heels of Welfare Reform, it was received with great popular acclaim. As Jim Hightower put it, At last, the real welfare scandal [is] revealed in one handy little -volume. But the scandal was still in the making. The total amount of taxpayers' money going to subsidize corporations and rich individuals has grown from about \$448 billion to over \$800 billion--and the amount of that tax money that comes from those flush companies and individuals continues to shrink. In this greatly expanded and updated version of Take the Rich off Welfare, Mark Zepezauer still details who's on the government dole and how much they're getting. This time around, though, he has slowed down his rapid firing of the latest names and numbers in order to reveal how it all works. Using accessible language and revealing graphics, he takes the time to explain how programs once intended to profit the public have been warped to benefit only the corporate bottom line; how administrations manipulate the tax code to slide their extortion from the bottom half past congressional oversight; and how the politicians from both parties employ budget doubletalk and paper trickery to make it look as if the economy isn't being sucked further into a sinkhole in order to line the pockets of the few. A prolific writer of humorous but cutting analyses of government policy and its fallout, Zepezauer provides us with the tools we need to expose the political chicanery of current and past administrations, and make it much more difficult for politicians to play Three Card Monte with our money and our future. To the rallying cry of fiscal conservatives who claim that government must shrink, Zepezauer offers an easy answer. Shrink you. Mark Zepezauer has worked as a journalist, editor and publisher since 1985. His articles, columns and reviews have appeared in the Village Voice, In These Times and the Arizona Daily Star. Zepezauer also wrote two Real Story books (now published by South End Press): The CIA's Greatest Hits (1994) and the first version of Take the Rich Off Welfare (1996), which have sold over 25,000 and 22,000 copies respec

**The Effortless Experience** Matthew Dixon, Nick Toman, Rick DeLisi, 2013-09-12 Everyone knows that the best way to create customer loyalty is with service so good, so over the top, that it surprises and delights. But what if everyone is wrong? In their acclaimed bestseller The Challenger Sale, Matthew Dixon and his colleagues at CEB busted many longstanding myths about sales. Now they've turned their research and analysis to a new vital business subject—customer loyalty—with a new book that turns the conventional wisdom on its head. The idea that companies must delight customers by exceeding service expectations is so entrenched that managers rarely even question it. They devote untold time, energy, and resources to trying to dazzle people and inspire their undying loyalty. Yet CEB's careful research over five years and tens of thousands of respondents proves that the “dazzle factor” is wildly overrated—it simply doesn't predict repeat sales, share of wallet, or positive word-of-mouth. The reality: Loyalty is driven by how well a company delivers on its basic promises and solves day-to-day problems, not on how spectacular its service experience might be. Most customers don't want to be “wowed”; they want an effortless experience. And they are far more likely to punish you for bad service than to reward you for good service. If you put on your customer hat rather than your manager or marketer hat, this makes a lot of sense. What do you really want from your cable company, a free month of HBO when it screws up or a fast, painless restoration of your connection? What about your bank—do you want free cookies and a cheerful smile, even a personal relationship with your teller? Or just a quick in-and-out transaction and an easy way to get a refund when it accidentally overcharges on fees? The Effortless Experience takes readers on a fascinating journey deep inside the customer experience to reveal what really makes customers loyal—and disloyal. The authors lay out the four key pillars of a low-effort customer experience, along the way delivering robust data, shocking insights and profiles of companies that are

already using the principles revealed by CEB's research, with great results. And they include many tools and templates you can start applying right away to improve service, reduce costs, decrease customer churn, and ultimately generate the elusive loyalty that the "dazzle factor" fails to deliver. The rewards are there for the taking, and the pathway to achieving them is now clearly marked.

**Information Inequality** Herbert Schiller,2013-05-13 Herbert Schiller, long one of America's leading critics of the communications industry, here offers a salvo in the battle over information. In Information Inequality he explains how privatization and the corporate economy directly affect our most highly prized democratic institutions: schools and libraries, media, and political culture. A master media-watcher, Schiller presents a crisp and far-reaching indictment of the data deprivation corporate interests are inflicting on the social fabric.

**Brand Name Bullies** David Bollier,2008-04-21 An impassioned, darkly amusing look at how corporations misuse copyright law to stifle creativity and free speech If you want to make fun of Mickey or Barbie on your Web site, you may be hearing from some corporate lawyers. You should also think twice about calling something fair and balanced or publicly using Martin Luther King Jr.'s I Have a Dream speech. It may be illegal. Or it may be entirely legal, but the distinction doesn't matter if you can't afford a lawyer. More and more, corporations are grabbing and asserting rights over every idea and creation in our world, regardless of the law's intent or the public interest. But beyond the humorous absurdity of all this, there lies a darker problem, as David Bollier shows in this important new book. Lawsuits and legal bullying clearly prevent the creation of legitimate new software, new art and music, new literature, new businesses, and worst of all, new scientific and medical research. David Bollier (Amherst, MA) is cofounder of Public Knowledge and Senior Fellow at the Norman Lear Center, USC Annenberg School for Communication. His books include Silent Theft.
