Management Secrets of the New England Patriots: Achievements, personnel, teamwork, motivation, and competition

James Lavin,2005 The definitive account of the 2001-2004 New England Patriots. Analyzes the many success factors underlying the team's two Super Bowl victories in three seasons. Entertains with humorous, insightful quotations from players, coaches, executives, and owners while helping fans vicariously experience life as a New England Patriot.

Management Secrets is essential reading for any serious fan of Bill Belichick's Patriots and anyone seeking to build a great organization. (Vol. 1 covers the team's achievements, personnel, teamwork, motivation, and competition. Vol. 2 to be published February 2005.) James Lavin earned his economics Ph.D. at Stanford, where he analyzed high performance work organizations (like the Patriots). He also holds degrees in: political science (Harvard, magna cum laude), economics (London School of Economics), and East Asian studies (Stanford). James grew up in Wayland, MA cheering for many lousy Patriots teams.

Achievement Gwen Bradford,2015-01-08 From the magisterial to the mundane, achievements play a role in the best kind of human life, and many people think that they are of such importance that they are worth pursuing at the expense of serious sacrifices. Yet for all that, no philosophers have devoted more than a few short passages to discerning what makes achievements valuable, or even what makes something an achievement to begin with. Gwen Bradford presents the first systematic account of what achievements are, and what it is about them that makes them worth doing. It turns out that more things count as achievements than we might have thought, and that what makes them valuable isn't something we usually think of as good. It turns out that difficulty, perhaps surprisingly, plays a central part in characterizing achievements and their value:

achievements are worth the effort. But just what does it mean for something to be difficult, and why is it valuable? A thorough analysis of the nature of difficulty is given, and ultimately, the best account of the value of achievements taps into perfectionist axiology. But not just any perfectionist theory of value will do, and in this book we see a new perfectionist theory developed that succeeds in capturing the value of achievement better than its predecessors.

It doesn't matter how long you've been working, what your organizational rank is, or whether or not you have direct reports. You can start practicing the skills introduced in this concise book after the first three lessons. THE PRO-ACHIEVEMENT PRINCIPLE gives you the most important self-adopted skills to create positive outcomes and inspire winning teams. You will learn how to: Put into practice the two key attributes for building team cooperation Create momentum for success among team members Turn team

members into team leaders who will motivate others by example

Research Directions, Challenges and Achievements of Modern Geography Jerzy Bański,Michael Meadows,2023-12-01
This book identifies and discusses research directions, challenges and achievements in contemporary geography. It also documents the most current theoretical and methodological considerations undertaken by scientists representing various sub-disciplines of geography with particular reference to human geography. It was assumed that the thematic structure of the currently active International Geographical Union (IGU) problem commissions corresponds to the most relevant and current research directions in geography. Reflecting this assumption, the book consists of 14 chapters contributed by geographers representing 14 problem commissions of the IGU, which allows us to examine geography from different perspectives and to provide the reader with a complete overview of contemporary research issues in human geography. The first part discusses contemporary research problems and issues related to scientific methodology and achievements of selected geographical sub-disciplines, including

urban geography, agricultural geography, transport geography, and political geography, among others. The second part focuses on the interdisciplinarity of geography and the topics of global dimension undertaken by geographers such as global change, GIS and geospatial technology, marginalization, and environmental change. This part also discusses the internal relations between geographical specializations and their links with other related sciences, including geology, sociology, and economics. The third part discusses the holistic approaches of geography applied to particular regions, territories, or conditions (Africa, costal systems, geomorphology and local development).

The Art of Rhetoric in the Roman World George Alexander Kennedy, 2008-05-01 Recipient of the Charles J. Goodwin Award of Merit from the American Philological Association in 1975. The Goodwin Award is the only honor for scholarly achievement given by the Association. It is presented at the Annual Meeting for an outstanding contribution to classical scholarship published by a member of the association within a period of three years before the ending of the preceding calendar year. A remarkable and valuable achievement, balanced in judgment and attractively presented. *Journal of Roman Studies*, This book is a reissue of the important 1972 work on the development of Greek and Latin oratory and rhetorical theory... Many students of the classics, and people interested in later European literatures as well, will find themselves turning to it again and again. *The Times Literary Supplement* George A. Kennedy is Paddison Professor of Classics, Emeritus, at the University of North Carolina at Chapel Hill, a Fellow of the American Academy of Arts and Sciences, an elected Member of the American Philosophical Society, and Fellow of the Rhetoric Society of America. Under Presidents Carter and Reagan Dr. Kennedy served as member of the National Humanities Council.

He was earlier President of the American Philological Association and of the International Society for the History of Rhetoric. He is author of 15 books, including *Classical Rhetoric and its Christian and Secular Tradition from Ancient to Modern Times*, *New Testament Interpretation through Rhetorical Criticism*, *Comparative Rhetoric: An Historical and Cross-Cultural Introduction*, *Aristotle On Rhetoric: A Theory of Civic Discourse*, and *Progymnasmata: Greek Textbooks of Prose Composition*, as well as numerous articles and translations into English from Greek, Latin, and French.
