Action Movies Harvey O'Brien,2012-11-20 Action Movies: The Cinema of Striking Back is a study of action cinema, exploring the ethics and aesthetics of the genre with reference to its relatively short history. It moves from seminal classics like Bullitt (1968) and Dirty Harry (1971) through epoch-defining films like Rambo: First Blood Part II (1985) and Die Hard (1988) to revisions, reboots, and renewals in films like Kill Bill Vol. 1 (2003), Taken (2008), and The Expendables (2010). The action genre is a fusion of form and content: a cinema of action about action. It is a cinema of the will, configured as a decisive reaction to untenable circumstances. Action heroes take up arms against the sea of troubles that beset them, safe in the knowledge that if they don't do it, nobody will. Though this makes the action movie profoundly disturbing as an embodiment of moral ideology, its enduring appeal proves the appetite for assurance remains undiminished, even in the wake of 9/11.

Slicing Spaces: Performance of Architecture in Cinema Gul Kacmaz Erk,Rebecca-Jane McConnell,2023-05-26 As suggested in the title, Slicing Spaces: Performance of Architecture in Cinema, this project slices through the multifaceted layers of film space. The text investigates how architecture performs as an altruist, proving that envired space is not merely a backdrop in film scenes, but an active performing character. The performance of architecture varies depending on what the filmmakers wish the viewer to feel, whether it is fear, compassion or joy. Considerations take an interdisciplinary approach, not solely observing film and architecture but also studying the likes of urbanism, politics, philosophy, history, psychology, art and design. The substantial spectrum of opinions from contributing authors allows the reader to absorb the diverse relationships of architecture in cinema, inviting the reader to form their own opinions on the topic and inspiring a new way of thinking. Slicing Spaces explores the interconnected relationship between architecture and film via distinct approaches to spaces of the city, confinement, actuality, the psyche and the imagination. Diverse views on cinematic architecture are probed, such as the psychological ramifications of film architecture, the portrayals of the city as a character and the potentials of exploring fantastic places in film. Overall, the book focuses on the authoritative contribution of architecture to the realm of filmmaking. It uncovers a path to look at lived spaces of architectural design from an alternative perspective, be it interiors, buildings or cities. Utilising the architectural ingenuity of drawings and graphics, the collection takes the reader on a visual journey as well as one through narratives.

Minding Movies David Bordwell,Kristin Thompson,2011-04-15 David Bordwell and Kristin Thompson are two of America’s preeminent film scholars. You would be hard pressed to find a serious student of the cinema who hasn’t spent at least a few hours huddled with their seminal introduction to the field—*Film Art*, now in its ninth edition—or a cable television junkie unaware that the Independent Film Channel sagely christened them the “Critics of the Naughts.” Since launching their blog *Observations on Film Art* in 2006, the two have added web virtuosos to their growing list of accolades, pitching unconventional long-form pieces engaged with film artistry that have helped to redefine cinematic storytelling for a new age and audience. *Minding Movies* presents a selection from over three hundred essays on genre movies, art films, animation, and the business of Hollywood that have graced Bordwell and Thompson’s blog. Informal pieces, conversational in tone but grounded in three decades of authoritative research, the essays gathered here range from in-depth analyses of individual films such as *Slumdog Millionaire* and *Inglourious Basterds* to adjustments of Hollywood media claims and forays into cinematic humor. For Bordwell and Thompson, the most fruitful place to begin is how movies are made, how they work, and how they work on us. Written for film lovers, these essays—on topics ranging from *Borat* to blockbusters and back again—will delight current fans and gain new enthusiasts. Serious but not solemn, vibrantly informative without condescension, and above all illuminating reading, *Minding Movies* offers ideas sure to set film lovers thinking—and keep them returning to the silver screen.

Full-Throttle Franchise Joshua Gulam, Fraser Elliott, Sarah Feinstein, 2023-01-12 When the first Fast & Furious film was released in June 2001, few predicted that it would be a box office hit, let alone the launchpad for a multi-billion-dollar franchise. A mid-budget crime movie set around L.A.'s underground car-racing scene, featuring a cast of relative unknowns, the film became one of the surprise hits of that summer, earning more than 5 times its budget in worldwide ticket sales. 2 decades and 9 films later, Fast & Furious today ranks among the 10 highest-grossing movie franchises of all time, with a box office total of \$6.6 billion and has also given rise to an animated TV show and theme park ride. Full-Throttle Franchise is the first book to offer an in-depth analysis of the Fast & Furious, bringing together a range of scholars to explore not only the style and themes of the franchise, but also its broader cultural impact and legacy. The collected essays establish the franchise's importance in cinematic and ideological terms, linking their discussions to wider issues of genre, representation, adaptation, and industry. Topics range from stardom and performance, focusing on key actors Vin Diesel and Dwayne Johnson, to the way in which Fast & Furious intersects with dominant ideas of racial, gender, and sexual identity. Aimed at both scholars and fans, Full-Throttle Franchise seeks to uncover just what has made Fast & Furious so enduringly popular, mapping its outrageous set pieces, ever-expanding universe, and growing cast of global megastars in terms of wider cultural and industrial forces.

Media in the Digital Age John V. Pavlik, 2008-05-12 Digital technologies have fundamentally altered the nature and function of media in our society, reinventing age-old practices of public communication and at times circumventing traditional media and challenging its privileged role as gatekeepers of news and entertainment. Some critics believe these technologies keep the public involved in an informed discourse on matters of public importance, but it isn't clear this is happening on a large scale. Propaganda disguised as news is flourishing, and though interaction with the digital domain teaches children valuable skills, it can also expose them to grave risks. John V. Pavlik critically examines our current digital innovations blogs, podcasting, peer-to-peer file sharing, on-demand entertainment, and the digitization of television, radio, and satellites and their positive and negative implications. He focuses on present developments, but he also peers into the future, foreseeing a media landscape dominated by a highly fragmented, though active audience, intense media competition, and scarce advertising dollars. By embracing new technologies, however, Pavlik shows how professional journalism and media can hold on to their role as a vital information lifeline and continue to operate as the tool of a successful democracy.
