100 Activities for Teaching Research Methods Catherine Dawson,2016-08-08 A sourcebook of exercises, games, scenarios and role plays, this practical, user-friendly guide provides a complete and valuable resource for research methods tutors, teachers and lecturers. Developed to complement and enhance existing course materials, the 100 ready-to-use activities encourage innovative and engaging classroom practice in seven areas: finding and using sources of information planning a research project conducting research using and analyzing data disseminating results acting ethically developing deeper research skills. Each of the activities is divided into a section on tutor notes and student handouts. Tutor notes contain clear guidance about the purpose, level and type of activity, along with a range of discussion notes that signpost key issues and research insights. Important terms, related activities and further reading suggestions are also included. Not only does the A4 format make the student handouts easy to photocopy, they are also available to download and print directly from the book's companion website for easy distribution in class.

Media and the American Child George Comstock,Erica Scharrer,2010-07-27 Media and the American Child summarizes the research on all forms of media on children, looking at how much time they spend with media everyday, television programming and its impact on children, how advertising has changed to appeal directly to children and the effects on children and the consumer behavior of parents, the relationship between media use and scholastic achievement, the influence of violence in media on anti-social behavior, and the role of media in influencing attitudes on body image, sex and work roles, fashion, & lifestyle. The average American child, aged 2-17, watches 25 hours of TV per week, plays 1 hr per day of video or computer games, and spends an additional 36 min per day on the internet. 19% of children watch more than 35 hrs per week of TV. This in the face of research that shows TV watching beyond 10 hours per week decreases scholastic performance. In 1991, George Comstock published Television and the American Child, which immediately became THE standard reference for the research community of the effects of television on children. Since then, interest in the topic has mushroomed, as the availability and access of media to children has become more widespread and occurs earlier in their lifetimes. No longer restricted to television, media impacts children through the internet, computer and video games, as well as television and the movies. There are videos designed for infants, claiming to improve cognitive development, television programs aimed for younger and younger children-even pre-literates, computer programs aimed for toddlers, and increasingly graphic, interactive violent computer games. Presents the most recent research on the media use of young people Investigates the content of children's media and addresses areas of great concern including violence, sexual behavior, and commercialization Discusses policy making in the area of children and the media Focuses on experiences unique to children and adolescents

Interpreting Qualitative Data David Silverman,2024-01-25 In his signature pragmatic and friendly style, David Silverman acts as your stand-in supervisor in the seventh edition of this book, taking you step-by-step through different methods for making sense of qualitative data. Whether you are interested in analysing visual images, interviews, focus groups or online data, this book provides a clear framework for using qualitative data to answer your research questions. The book provides: • A strong grounding in research design principles so you can embed best practice into your research project. • Diverse real-world examples so you can see how principles are applied in practice. • Coverage of new developments in qualitative research including working with online data. If you are new to qualitative research or conducting your first research project in the social sciences, this book gives you the practical grounding in qualitative methods you need to get started.

Efficient Lighting Applications and Case Studies Scott C. Dunning,Albert Thumann,2020-12-18 With the increased concern for energy conservation in recent years, much attention has been focused on lighting energy consumption and methods for reducing it. Along with this concern for energy efficient lighting has come the realization that lighting has profound effects on worker productivity as well as important aesthetic qualities. This book presents an introduction to lighting design and energy efficiency which can be utilized while maintaining the quality of illumination. Topics include lighting energy management, selection of lamps, task lighting, lighting design, lighting control, reflectors, ballast selection, natural daylighting, wireless lighting control, and case studies.

Inside Family Viewing (Routledge Revivals) James Lull,2014-04-23 First published in 1990, this title presents a rich account of how television intersects with family life in American and other world cultures. From an analysis of the political and cultural significance of China's most important television series to detailed descriptions of how families in the United States interpret and use television at home, James Lull's ethnographic work marks an important stage in the study of the role of the mass media in contemporary culture. This title will be of interest not only to those in media and communications, but also to those in the broader fields of cultural anthropology and sociology.

A Multimodal Approach to Video Games and the Player Experience Weimin Toh,2018-10-10 This volume puts forth an original theoretical framework, the ludonarrative model, for studying video games which foregrounds the empirical study of the player experience. The book provides a comprehensive introduction to and description of the model, which draws on theoretical frameworks from multimodal discourse analysis, game studies, and social semiotics, and its development out of participant observation and qualitative interviews from the empirical study of a group of players. The volume then applies this approach to shed light on how players' experiences in a game influence how they understand and make use of game components in order to progress its narrative. The book concludes with a frame by frame analysis of a popular game to demonstrate the model's principles in action and its subsequent broader applicability to analyzing video game interaction and design. Offering a new way forward for video game research, this volume is key reading for students and scholars in multimodality, discourse analysis, game studies, interactive storytelling, and new media.

Maya Imagery, Architecture, and Activity Kaylee R. Spencer,B01,2015-05-01 Maya Imagery, Architecture, and Activity privileges art historical perspectives in addressing the ways the ancient Maya organized, manipulated, created, interacted with, and conceived of the world around them. The Maya provide a particularly strong example of the ways in which the built and imaged environment are intentionally oriented relative to political, religious, economic, and other spatial constructs. In examining space, the contributors of this volume demonstrate the core interrelationships inherent in a wide variety of places and spaces, both concrete and abstract. They explore the links between spatial order and cosmic order and the possibility that such connections have sociopolitical consequences. This book will prove useful not just to Mayanists but to art historians in other fields and scholars from a variety of disciplines, including anthropology, archaeology, geography, and landscape architecture.

Human-Computer Interaction -- INTERACT 2013 Paula Kotzé,Gary Marsden,Gitte Lindgaard,Janet Wesson,Marco Winckler,2013-07-30 The four-volume set LNCS 8117-8120 constitutes the refereed proceedings of the 14th IFIP TC13 International Conference on Human-Computer Interaction, INTERACT 2013, held in Cape Town, South Africa, in September 2013. Analyzing Music in Advertising Nicolai Graakjaer,2014-11-27 The study of music in commercials is well-suited for exploring the persuasive impact that music has beyond the ability to entertain, edify, and purify its audience. This book focuses on music in commercials from an interpretive text analytical perspective, answering hitherto neglected questions: What characterizes music in commercials compared to other commercial music and other music on TV? How does music in commercials relate to music 'outside' the universe of commercials? How and what can music in commercials signify? Author Nicolai Graakjær sets a new benchmark for the international scholarly study of music on television and its pervading influence on consumer choice.

Fun in the sun Shilpa Thotli,Harish Thotli, Come let's run to the hill with Leo and spend a beautiful sunny day with him and his pal Tim. Have you observed that the majority of preschool and early reader books follow the technique of teaching random three-letter words, initial words, and phrases? Random words and sentences do not instill a love of reading in children. This is why we wanted to give the little early readers a bit more flavor, so we made storybooks with three-letter words. Reading a storybook instead of some random words can offer children more excitement and provide their preschool learning a much-needed boost. Our goal is to not only provide an immersive reading experience for the children through a delicate storyline and bright illustrations but also to involve them in the process. We want kids to think about and participate in the story. This is why we've included coloring pages and other interactive activities, as well as worksheets where kids can test their memory and reading skills, and a section where they'll be asked a few questions about themselves in line with the story so they can express their thoughts. All of our books have been created with the goal of being the best preschool or beginning readers books available. Why spend time teaching your children only phonics and first words when they can read entire books?

Reading 'CSI' Michael Allen,2007-08-20 This is what we know, this is the truth: CSI is a global television phenomenon. It began in 2000 with CSI: Crime Scene Investigation, a dark procedural drama about forensic science set within the neon escapism of Las Vegas, in which Grissom and his team search within the very vitals of the murder victims they investigate. Nearly 17 million viewers tuned in each week and CSI: Crime Scene Investigation fast became America's number one show. The success of the series moved it into franchise territory, continuing in 2002 with the body beautifuls and dismembereds of CSI: Miami (now the world's biggest television show) and again in 2004 extending the francise to the melancholic noir of post-9/11 New York with CSI: NY. Reading 'CSI' pieces together the evidence in order to understand what the CSI shows mean to contemporary television culture, both in America and beyond. The varied, intellectually curious and often polemic responses to CSI from critics, journalists and industry professionals focus on a range of issues from the pornographic quality of the CGI effects, the relationship of characters to their narratives, and the reaction of the fans, to the semiotics of Horatio Caine's sunglasses. This in depth, compulsive read also includes a full episode guide.

The Animation Studies Reader Nichola Dobson,Annabelle Honess Roe,Amy Ratelle,Caroline Ruddell,2018-10-18 The Animation Studies Reader brings together both key writings within animation studies and new material in emerging areas of the field. The collection provides readers with seminal texts that ground animation studies within the contexts of theory and aesthetics, form and genre, and issues of representation. The first section collates key readings on animation theory, on how we might conceptualise animation, and on some of the fundamental qualities of animation. New material is also introduced in this section specifically addressing questions raised by the nature, style and materiality of animation. The second section outlines some of the main forms that animation takes, which includes discussions of genre. Although this section cannot be exhaustive, the material chosen is particularly useful as it provides samples of analysis that can illuminate some of the issues the first section of the book raises. The third section focuses on issues of representation and how the medium of animation might have an impact on how bodies, gender, sexuality, race and ethnicity are represented. These representations can only be read through an understanding of the questions that the first two sections of the book raise; we can only decode these representations if we take into account form and genre, and theoretical conceptualisations such as visual pleasure, spectacle, the uncanny, realism etc.
