The Key to Everything Matt Keller,2015-09-29 For two decades, pastor and leadership consultant Matt Keller has worked with hundreds of influencers, and he has learned that the greatest enhancer or greatest limiter to a person's success is whether someone is teachable. In *The Key to Everything*, Keller shows how teachability isn't something that some people are born with and others aren't. It is a characteristic that can be learned and grown. In fact, the only way to succeed in life is to possess teachability in an ever-increasing fashion, and *The Key to Everything* reveals how to do just that.

Measuring Literacy National Research Council,Division of Behavioral and Social Sciences and Education,Center for Education,Board on Testing and Assessment,Committee on Performance Levels for Adult Literacy,2006-01-13 The National Assessment of Adult Literacy (NAAL) is a household survey conducted periodically by the Department of Education that evaluates the literacy skills of a sample of adults in the United States ages 16 and older. NAAL results are used to characterize adults' literacy skills and to inform policy and programmatic decisions. The Committee on Performance Levels for Adult Literacy was convened at the Department's request for assistance in determining a means for booking assessment results that would be useful and understandable for NAAL'S many varied

audiences. Through a process detailed in the book, the committee determined that five performance level categories should be used to characterize adults' literacy skills: nonliterate in English, below basic literacy, basic literacy, intermediate literacy, and advanced literacy. This book documents the process the committee used to determine these performance categories, estimates the percentages of adults whose literacy skills fall into each category, recommends ways to communicate about adults' literacy skills based on NAAL, and makes suggestions for ways to improve future assessments of adult literacy.
