Leveraging Artificial Intelligence in Engineering, Management, and Safety of Infrastructure M.Z. Naser, 2022-11-17 The design, construction, and upkeep of infrastructure is comprised of a multitude of dimensions spanning a highly complex paradigm of interconnected opportunities and challenges. While traditional methods fall short of adequately accounting for such complexity, artificial intelligence (AI) presents novel and out-of-the-box solutions that effectively tackle the growing demands of our infrastructure. The convergence between AI and civil engineering is an emerging frontier with tremendous potential. The book is likely to provide a boost to the state of infrastructure engineering by fostering a new look at civil engineering that capitalizes on AI as its main driver. It highlights the ongoing push to adopt and leverage AI to realize contemporary, intelligent, safe, and resilient infrastructure. The book comprises interdisciplinary and novel works from across the globe. It presents findings from innovative efforts supplemented with physical tests, numerical simulations, and case studies – all of which can be used as benchmarks to carry out future experiments and/or facilitate the development of future AI models in structural engineering, traffic engineering, construction engineering, and construction materials. The book will serve as a guide for a wide range of audiences, including senior undergraduate and graduate students, professionals, and government officials of civil, traffic, and computer engineering backgrounds, as well as for those engaged in urban planning and human sciences.

HSE and Environment Agency Prosecution: The New Climate is an accessible reference work that provides guidance to ensure that companies have the correct, stringent risk management and procedures in place in order to protect themselves against exposure to such fines. Through the use of worked cases studies, checklists and charts the expert advice provided is put into context, whether you are a practitioner needing to advise your client, a company director, an in-house lawyer, or a health and safety professional. Split into four sections, this new title covers: Managing Risk; The Law; Enforcement and Sentencing; Inquests and Claims.

*Regulating Food-borne Illness* Richard Hyde, 2015-08-27 When faced with tackling food-borne illness, regulators have a number of competing goals. They must investigate in order to discover the source of the illness. Once the source is identified they must take action to prevent further cases of illness occurring. Finally, once the illness is under control, they may wish to take enforcement action against those responsible. *Regulating Food-Borne Illness* uses interviews and documentary analysis to examine the actions of regulators and considers how they balance these three tasks. Central to the regulators' role is the collection of information. Without information about the source, control or enforcement action cannot be taken. Investigation must therefore take place to produce the necessary information. Utilising theoretical frameworks drawn from regulation and biosecurity, *Regulating Food-Borne Illness* shows that control is prioritised, and that investigatory steps are chosen in order to ensure that the information necessary for control, rather than enforcement, is collected. This has the effect of reducing the possibility that enforcement action can be taken. The difficulty of evidence gathering and case-building in food-borne illness cases is exposed, and the author considers the methods aimed at reducing the difficulty of bringing successful enforcement action.

She Persisted Lawrence Harbison, 2021-11-01 *She Persisted: One Hundred Monologues from Plays by Women over Forty* is a collection of monologues from plays by members of Honor Roll!, an advocacy group of women over forty. About Honor Roll!: Honor Roll! is an advocacy and action group of women+ playwrights over forty—and our allies—whose goal is our inclusion in theater. The term women+ refers to a spectrum of gender identification that includes women, non-binary identifiers, and trans. We are the generation excluded at the outset of our careers because of sexism, now overlooked because of ageism. We celebrate diversity in theater, and work to call attention to the negative impact of age discrimination alongside gender, race, ethnicity, faith, socioeconomic status, disability, and sexual orientation in the American Theatre and beyond. These women are in their forties and fifties and sixties, and they have been writing a long time, and they are at the height of their craft. These are tight, complex, nuanced pieces of writing, which no one has seen because for too long they weren't looking. These are important writers, and important plays. —Theresa Rebeck, from the introduction

*Fluorine in Heterocyclic Chemistry Volume 2* Valentine Nenajdenko, 2014-07-08 This two-volume work combines comprehensive information on the chemistry of the fluorinated heterocycles. The material has been divided such that the first volume is dedicated to 5-membered fluorinated heterocycles and macrocycles, while the second volume combines data connected with the chemistry of fluorine containing 6-membered heterocycles. Both volumes will be of interest to synthetic organic chemists in general, and particularly for those colleagues working in the fields of heterocyclic-compound chemistry, materials

chemistry, medicinal chemistry, and fluorine chemistry. All information is presented and classified clearly to be effective source for broad auditory of chemists. It will be interesting for scientists working in the field of inorganic and coordination chemistry. Fluorinated heterocycles are becoming increasingly important in many areas including the pharmaceutical industry, materials science and agriculture. The presence of fluorine can result in substantial functional changes in the biological as well as physicochemical properties of organic compounds. Incorporation of fluorine into drug molecules can greatly affect their physicochemical properties, such as bond strength, lipophilicity, bioavailability, conformation, electrostatic potential, dipole moment, pKa etc. as well as pharmacokinetic properties, such as tissue distribution, rate of metabolism and pharmacological properties, such as pharmacodynamics and toxicology.

Construction Safety, Health and Well-being in the COVID-19 era Patrick Manu,Clara

Cheung,Akilu Yunusa-Kaltungo,Fidelis Emuze,Tarcisio Abreu Saurin,Bonaventura H. W. Hadikusumo,2023-09-12 This edited book presents a significant and timely contribution to our understanding of a broad range of issues pertaining to COVID-19 and its relationship to occupational safety, health and well-being (OSHW) in the global construction industry. The editors first introduce the industry and its poor OSHW history before highlighting some of the broader impacts of the pandemic on the sector. The book is then divided into two sections. Section One focuses on the management of COVID-19 transmission risk. It captures insights, practices, technologies and lessons learned in relation to what has and is being done to prevent or mitigate the risk of COVID-19 transmission among the construction workforce. Construction Safety, Health and Well-being in the COVID-19 Era also details case studies, lessons and best practices for managing sites and workforces when infections inevitably do occur. Section Two brings together international chapters discussing the impacts of COVID-19 on the OSHW of the construction workforce both on and off-site, as well as the management of those impacts. Furthermore, this presents implications of the pandemic (at the short-, medium-, and long-term) for other performance measures of construction projects such as cost, schedule, quality and, most importantly, how the pursuit/non-pursuit of such performance measures have impacted/will impact the OSHW of construction workers and professionals in the industry. This book addresses the gap in literature by offering global perspectives on the OSHW impacts and implications of COVID-19 in the construction industry and will help its wide readership (including construction industry organisations, professionals, researchers, government bodies/policy makers and students) to understand a broad suite of issues

pertaining to COVID-19 and its relationship to OSHW in construction.
