The Cybersecurity Self-Help Guide Arun Soni,2021-10-18

Cybercrime is increasing at an exponential rate. Every day, new hacking techniques and tools are being developed by threat actors to bypass security systems and access private data. Most people do not know how to secure themselves, their devices, and their media shared online. Especially now, cybercriminals appear to be ahead of cybersecurity experts across cyberspace. During the coronavirus pandemic, we witnessed the peak of cybercrime, which is likely to be sustained even after the pandemic. This book is an up-to-date self-help guide for everyone who connects to the Internet and uses technology. It is designed to spread awareness about cybersecurity by explaining techniques and methods that should be implemented practically by readers. Arun Soni is an international award-winning author who has written 159 books on information technology. He is also a Certified Ethical Hacker (CEH v8) from the EC-Council US. His achievements have been covered by major newspapers and portals, such as Business Standard, The Economic Times, Indian Express, The Tribune, Times of India, Yahoo News, and Rediff.com. He is the recipient of multiple international records for this incomparable feat. His vast international exposure in cybersecurity and writing make this book special. This book will be a tremendous help to everybody and will be considered a bible on cybersecurity.

Information Technology and Intelligent Transportation Systems
V.E. Balas,L.C. Jain,X. Zhao,2017-08-18 Intelligent transport systems are on the increase. They employ a variety of technologies, from basic management systems to more advanced application systems, with information technology – including wireless communication, computational technologies, floating car data/cellular data such as sensing technologies and video vehicle detection – playing a major role. This book presents the proceedings of the 2nd International Conference on Information Technology and Intelligent Transportation Systems (ITITS 2017), held in Xi'an, People's Republic of China, in June 2017. The conference provides a platform for professionals and researchers from industry and academia to present and discuss recent advances in the field of information technology and intelligent transportation systems; organizations and researchers involved in these fields, including distinguished academics from around the world, explore theoretical and applied topics such as emergency vehicle notification systems, automatic road enforcement, collision avoidance systems and cooperative systems. ITITS 2017 received more than 200 papers from 4 countries, and the 65 accepted papers appear in this book, which will be of interest to all those involved with the development of intelligent transport systems.

Digital Watermarking for Machine Learning Model Lixin Fan,Chee Seng Chan,Qiang Yang,2023-05-29 Machine learning (ML) models, especially large pretrained deep learning (DL) models, are of high economic value and must be properly protected with regard to intellectual property rights (IPR). Model watermarking methods are proposed to embed watermarks into the target model, so that, in the event it is stolen, the model's

owner can extract the pre-defined watermarks to assert ownership. Model watermarking methods adopt frequently used techniques like backdoor training, multi-task learning, decision boundary analysis etc. to generate secret conditions that constitute model watermarks or fingerprints only known to model owners. These methods have little or no effect on model performance, which makes them applicable to a wide variety of contexts. In terms of robustness, embedded watermarks must be robustly detectable against varying adversarial attacks that attempt to remove the watermarks. The efficacy of model watermarking methods is showcased in diverse applications including image classification, image generation, image captions, natural language processing and reinforcement learning. This book covers the motivations, fundamentals, techniques and protocols for protecting ML models using watermarking. Furthermore, it showcases cutting-edge work in e.g. model watermarking, signature and passport embedding and their use cases in distributed federated learning settings.
