**Critical CALL – Proceedings of the 2015 EUROCALL Conference, Padova, Italy** Francesca Helm, Linda Bradley, Marta Guarda, Sylvie Thouësny, 2015-12-02 The theme of the conference this year was Critical CALL, drawing inspiration from the work carried out in the broader field of Critical Applied Linguistics. The term 'critical' has many possible interpretations, and as Pennycook (2001) outlines, has many concerns. It was from these that we decided on the conference theme, in particular the notion that we should question the assumptions that lie at the basis of our praxis, ideas that have become 'naturalized' and are not called into question. Over 200 presentations were delivered in 68 different sessions, both in English and Italian, on topics related specifically to the theme and also more general CALL topics. 94 of these were submitted as extended papers and appear in this volume of proceedings.

**Collaborative Design Management** Stephen Emmitt, Kirti Ruikar, 2013-04-12 The design process has always been central to construction, but recent years have seen its significance increase, and the ways of approaching it multiply. To an increasing degree, other stakeholders such as contractors have input at the design stage, and the designer's role includes tasks that were traditionally the realm of other professions. This presents challenges as well as opportunities, and both are introduced, discussed, and analysed in Collaborative Design Management. Case studies from the likes of ARUP, Buro Happold, VINCI Construction UK Ltd, and CIOB show how technologies (BIM, podcasting), innovative working (information management, collaboration), and the evolution of roles (the designer-contractor interface, environmental compliance) have changed design management as a process. Starting from a basic level, the reader is introduced to the key themes and background to the design management role, including definitions of the responsibilities now commonly involved, and the strategic importance of design. Influential technologies currently in use are evaluated, and the importance they are likely to have in future is explored. This combination of case studies from leading practitioners, clear explanations of design management roles and activities, and an exploration of how to successfully achieve collaborative design management makes this a highly topical and uniquely valuable book. This is essential reading for professionals and students of all levels interested in construction design management, from all AEC backgrounds.
